# Making the title text animate in DIVI

**SECTION SETTINGS → CONTENT → BACKGROUND** (this pic stays still)

**FULLWIDTH SLIDER SETTINGS → DESIGN TAB → ANIMATION**

## Capitalizing slide titles for websites

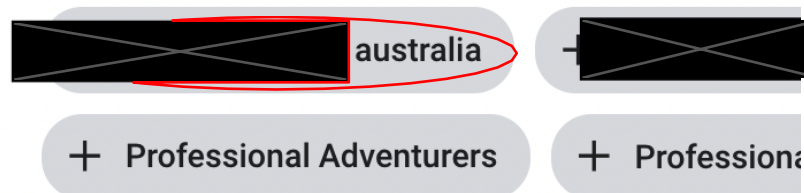

1. Wondering why “australia” was lowercase in this AdWord . . .

n, australia

2. Examining the AdWord, I narrowed it down . . .

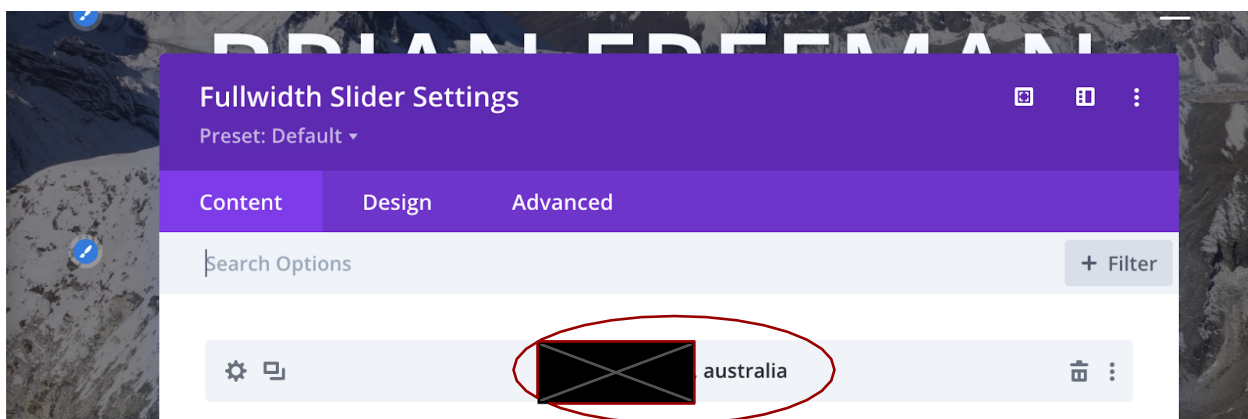

These suggestions are based on your final URL

3. Although the title APPEARS in all caps on the front end:

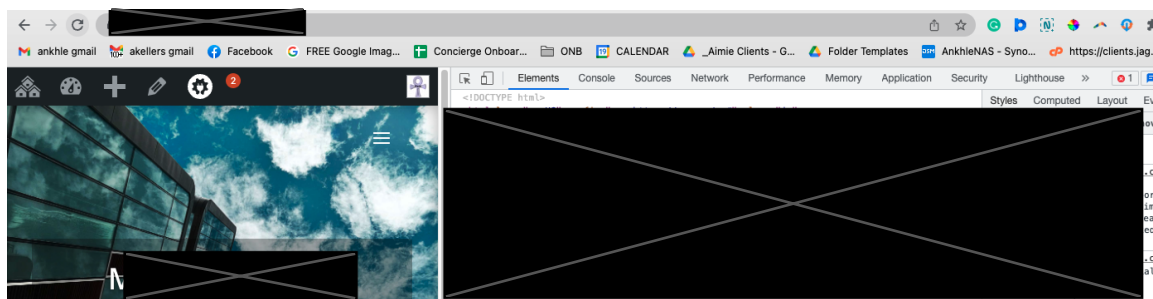

4. Behind the scenes, it is actually written in lowercase!

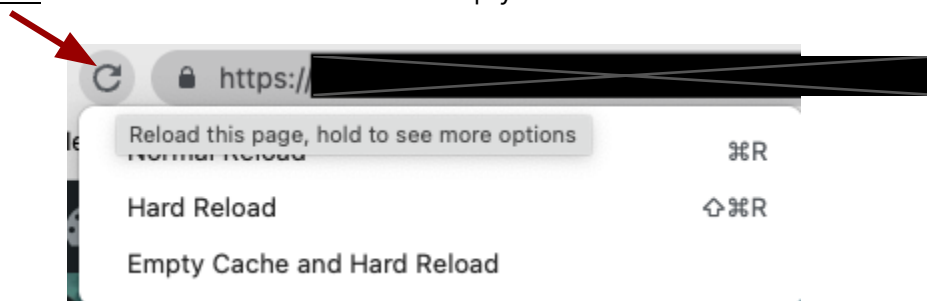

## Clearing Cache for a Single Page

Sometimes, you just want to clear the cache for a single website.

Press `cmd+option+I` to open developer mode.

Click and **hold** the refresh button and select 'Empty Cache and Hard Reload'

Close the developer screen by clicking the 'X' in the top-right corner.

## Hiding “no results found” Message

Before blogs are published on sites, DIVI shows this message on the blog page:

### No Results Found

The page you requested could not be found. Try refining your search, or use the navigation above to locate the post.

If you want to remove it, go to DIVI → Theme Options → Custom CSS (scroll to bottom)

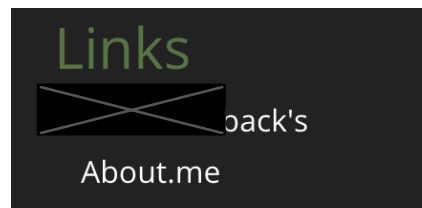

**Here is the code for copy/paste:**

```
.et_pb_ajax_pagination_container .not-found-title, .not-found-title + p {display:none}
```

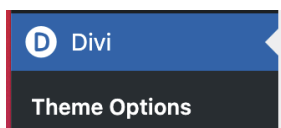

Save Changes

## DIVI Widget - Changing the Footer Width

Sometimes Widget links are too long for a single line:

To adjust, click DIVI theme options:

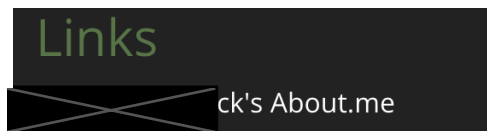

Scroll to the bottom and paste:

```
1 @media (min-width: 981px) {
2
3 #footer-widgets .footer-widget:first-of-type {
4     width: 63.5%;
5 }
6 }
```

Click

Save Changes

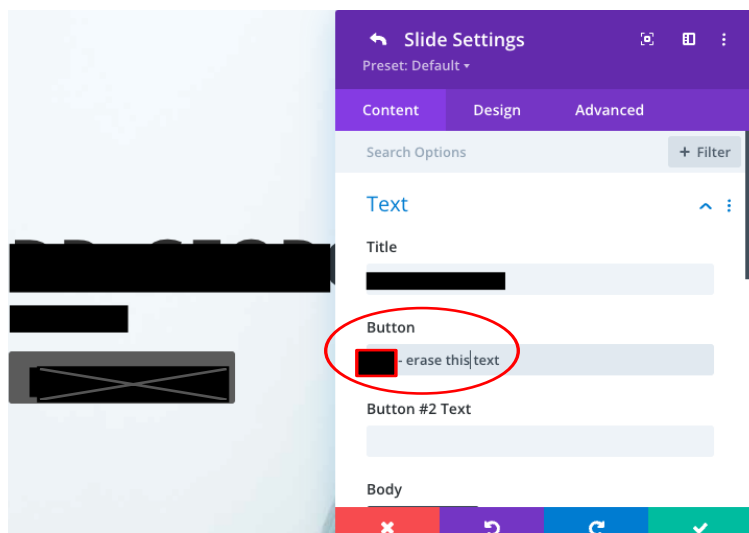

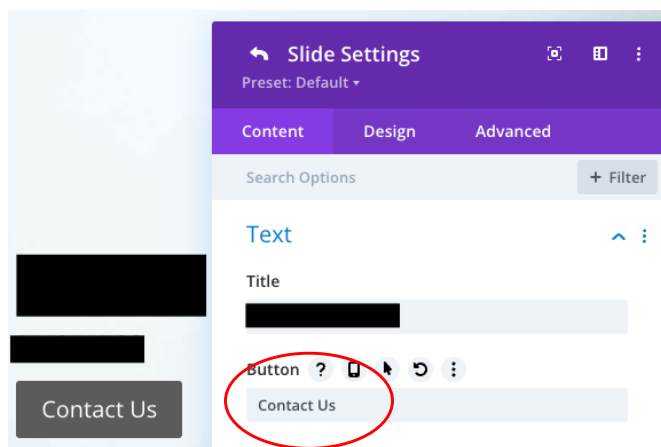

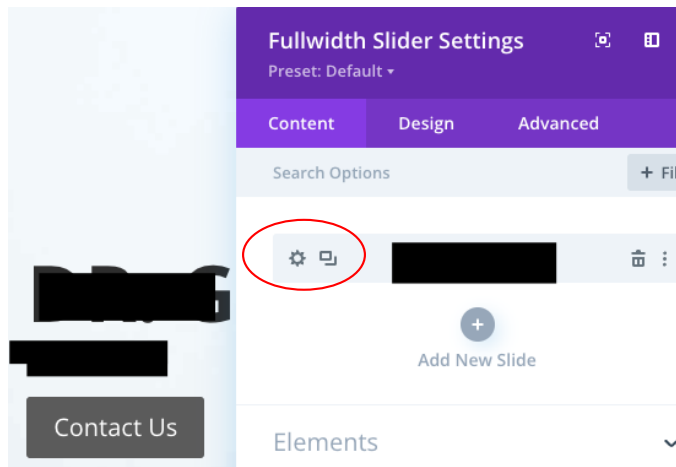

TADA!

**Here is the code for copy/paste:**

```
@media (min-width: 981px) {
#footer-widgets .footer-widget:first-of-type {
    width: 63.5%;
}
}
```

## Getting rid of the “Contact Us” button
