

The Suds Lab: DIY Stain Remover

Ingredients:

1 Part Dish Soap (Dawn)

1 Part Baking Soda

Small airtight container (2oz travel size works)

Funnel

Scrubbing tool (wire brush, cleaning brush, or old toothbrush)

Instructions:

- 1. Add equal parts:** Add equal parts dish soap and baking soda.
- 2. Stir:** Stir well until the consistency matches toothpaste
- 3. Apply to Stain:** Apply to stain and scrub. Rinse and repeat 1-2 additional times.
- 4. Soak for 15ish minutes:** Apply layer to stained area and let sit for 15-30 minutes.
- 5. Rinse:** Use cold water rinse to verify stain is gone and then wash as usual.
- 6. Dry:** Air dry and repeat as needed
- 7. Store and Use:** Store in airtight container. Shake or mix paste prior to next use.
