HARTWOOD CONSULTING GROUP

Capabilities and Competencies

Founded in 2007 as TNDA Technologies, Inc. (currently DBA Hartwood Consulting Group), Hartwood provides comprehensive Knowledge Management solutions enabling customers to quantify, qualify, and query data services through strategic communication, collaboration tools, and efficient process workflows.

FOCUS AREAS

Change Management (Organizational) – Supporting Leadership's direction in changing the way the organization operate for both large and small modifications.

Process Improvement – Defining and refining organizational processes for efficiency and integration with technology.

Service Management - We focus on helping organizations define their services, their service catalog, and the processes required to deliver those services to the satisfaction of the organization and the user of those services.

Knowledge Management – KM strategy and framework creation and integration support.

Records Management – Providing subject matter expertise on federal government regulations, policies, and interaction with supporting technologies.

Strategic Communications – From the communications plan generation and the identification of the stakeholders to the creation of the communication products through to distribution.

Governance – Establishing and implementing data and information governance policies and procedures.

Why Choose Hartwood as your Services Agent?

- Proven services delivery models
- Responsive to urgent business needs while maintaining compliance to established cost, schedule, and quality (deliverable) require-ments
- Expertise and understanding of the unique reporting directives and challenges facing agencies
- Trusted source for helping to manage critical business processes, with documented success supporting enterprise change needs
- Seamless support to organizations through a people-oriented approach.
