

# ***BrewFoam Cleaner***

## **Foaming Chlorinated Alkaline Detergent**

### **DESCRIPTION**

**BrewFoam Cleaner** is a self-foaming, chlorinated alkaline cleaner with a blend of surfactants, water conditioners and detergents designed for exterior cleaning of brewery and beverage equipment. **BrewFoam Cleaner** is an effective cleaner for use in environmental cleaning in the brewing facility.

### **Advantages/Properties**

- Removes brewing soils from equipment.
- Foam cleaner clings to vertical surfaces providing extended contact time.
- Self-foaming product that can be dispensed through wall-mounted and portable foam equipment.
- Chlorine assists in stain removal and improves rinseability.

### **DIRECTIONS FOR USE**

#### **Foam Cleaning**

1. Rinse equipment with potable water to drain.
2. Using either a portable or wall-mounted foamer, apply **BrewFoam Cleaner** at 2 to 6 oz. per gallon of ambient temperature water.
3. Allow foam to adhere to the surface for 10-15 minutes. **Do not allow foam to dry on equipment surface.**
4. Rinse with potable water.
5. Sanitize equipment with the recommended Zee Company sanitizer.

#### **Manual Cleaning**

1. Dilute 2-8 ounces per gallon, depending on soil load. Apply using a scrub pad or brush to surface to be cleaned. Rinse equipment with potable water to drain.
2. **Do not allow cleaning solution to dry on equipment surface.**
3. Sanitize equipment with the recommended Zee Company sanitizer.

**Contact Zee Company for SDS documentation.**

*DO NOT MIX THIS PRODUCT WITH ANY OTHER CHEMICAL UNLESS DIRECTED TO DO SO BY ZEE COMPANY!* Avoid contact with acid products. Dangerous gasses may be released.

**PHYSICAL PROPERTIES**

Appearance:	Clear liquid
Weight per gallon:	9.47 pounds
Color:	Straw to light yellow
Odor:	Chlorine
pH	<12.5
Chemical Stability:	Stable
Biodegradability:	Complete
