

1987-2004 Mustang Cruise Button Box Leash Electronics Pulse Leash Box Installation Guide

Rev. 1.0 © 2023 Accutach Co.

Read the Cruise Button Box Install Guide first! www.accutach.com

The Leash Electronics system requires that battery voltage be applied to its inputs to control the transbrake, bump and scramble boost inputs. The OFF button will toggle the transbrake on and off. The RESUME button will control the bump function. The ON button will control scramble boost. The COAST button will control a ground input to a line lock box. This document only shows the wiring diagram for this application. Read the Install Guide first.
