# Watchlist Investing

Patiently finding and following great public companies

## **Issue #33 | January 2024**

"One person said to me, 'I have a list of 300 potentially attractive stocks, and I constantly watch them, waiting for just one of them to become cheap enough to buy.' Well, that's a reasonable thing to do. But how many people have that kind of discipline? Not one in 100." – Charlie Munger

#### In this issue:

| • | Editorial comments           |   |
|---|------------------------------|---|
| • | Deep Dive: Mainfreight, Ltd. | ) |
|   | Current Watchlist            | C |

*Companies in this issue:* C.H. Robinson (CHRW), FedEx (FDX), Old Dominion Freight Line (ODFL), Triumph Financial (TFIN), United Parcel Service (UPS)

This first issue of 2024 is dedicated to Charlie Munger, my hero and intellectual grandfather, who died just shy of his 100<sup>th</sup> birthday, in November 2023.

Charlie's wisdom continues to guide my thinking in investing and in life.

Editorial comments / notes: Last year I began a transition to providing more updates on companies already on the Watchlist rather than just one-and-done Deep Dives. In 2024, I would like to strike the right balance between the updates, which are important to the type of patient, disciplined investing I subscribe to, and prospecting for new names to add to it. My initial thinking for the year is as follows:

- 1. Three to four new names, such as this month's Deep Dive on Mainfreight
- 2. Two or three industry updates, such as the May 2023 banking industry update, to give specific updates on multiple companies within the broader context of the industry
- 3. Half a dozen or more specific company updates (the two-pagers)
- 4. Russell Rebalancing additions and deletions (double issue June/July)
- 5. One or two Deep Dive refreshments. Some early issues, like Hingham Savings, will be three years old this year. It is time to provide comprehensive updates to a few of them.
- 6. Berkshire Hathaway update in April. This is a "cornerstone" issue on the calendar every year.

This list looks like a solid year's work and deserving (I hope) of the \$299 price tag.

## **Deep Dive**

### Mainfreight, Ltd

(Tickers: XNZE: MFT | OTC: MFGHF | Disclosures: None)

Mainfreight came on my radar thanks to <u>Jessie Rancourt</u>, a friend and fellow value investor, who mentioned it during a subscriber meetup a few months ago.

Mainfreight is in the supply chain logistics industry, an extremely broad category covering a huge segment of the world economy and harboring (pun intended) many niches and specialties. I decided a look at the company would fit in well with my coverage of **Old Dominion Freight**Line (ODFL | Disclosure: None) in the U.S. less-than-truckload space and Triumph Financial (TFIN | Disclosure: Long) in the banking-cum-truckload finance space.

Mainfreight is based in New Zealand with offices around the world and provides shipping services to companies primarily in customer verticals such as food, beverage, DIY, pharmaceuticals, perishables, and retail. Its three segments give a good idea of how it makes money: transport (via road and rail, sometimes with its own fleet), air & ocean (contracting with other service providers), and warehousing (though its own or contracted space).

The company is run by its founder and appears to have maintained a decentralized, entrepreneurial culture. I like what I see in the numbers, in management, and the fact that it is an interesting combination of network benefits and semi-capital intensity. There's also ample room for reinvestment and a long runway ahead. It is a worthy addition to the Watchlist.

A simple but not easy growth strategy (from the 2019 annual report):

#### THE KEY TO NETWORK INTENSIFICATION

- > Be where our customers need us
- > Trust those closest to our customers to make the decisions. They know more and can do a better, faster, job than someone 100 kms away
- Expand the network to maintain continuous custody of customers' freight and control quality

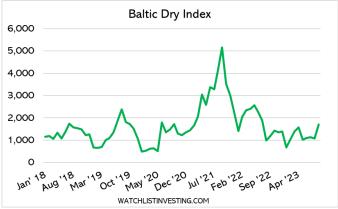

#### **INDUSTRY OVERVIEW:**

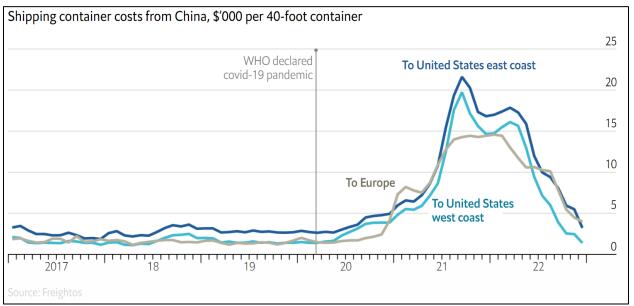

The worldwide market for shipping / logistics services is huge at about \$10.7 trillion or 10% of world GDP in 2023. Third-party logistics services, like those provided by Mainfreight, account for \$1.3 trillion worldwide, still a huge number. Safe to say that the market is highly competitive and not subject to control by just a handful of competitors, though there are some very large players. Demand for services depends on world GDP and cross-border trading volume. E-commerce is a driving factor in the industry.

One measure of worldwide pricing of logistics services is the Baltic Dry Index. The spike in mid-2021 is evident no matter what index you use. Pandemic-induced demand caused havoc on the global supply chain and resulted in delays and prices going through the roof.

Here's data provided by the Economist in January 2023:

Ocean Freight: Measured in TEUs (twenty-foot equivalent units), ocean freight forwarding volume worldwide was around 67 million units. Note that the global volume for total TEUs through all ports was 851 million units in 2021. Globally, the capacity of container ships has increased from 11 million dwt (deadweight tons) in 1980 to 26 million dwt in 1990; 64 million dwt in 2000; 169 million dwt in 2010; 275 million dwt in 2020, and 293 million dwt in 2023.

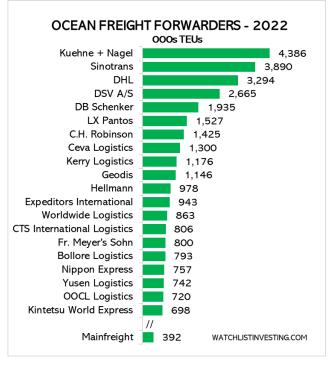

In 2023, Mainfreight moved 0.43 million TEUs over ocean (ranking 29<sup>th</sup>) while Kuehne + Nagel, the largest, moved 4.39 million. C.H. Robinson, by contrast, ranked 7<sup>th</sup> with 1.43 million TEUs.

**Air Freight:** The global air freight market was forecast to be about 57.7 million metric tons in 2023. In dollar terms it is valued at approximately \$142 billion. Kuehne + Nagel again ranks first in air freight while Mainfreight comes in at 28<sup>th</sup>.

**Land Freight:** Global land freight statistics are hard to come by and not as relevant as regional or local statistics.

In 2022, Mainfreight moved 7.3 million tons of freight over land.

**Warehouse Space:** Mainfreight had just over 1 million square meters of warehouse space at the end of 2022. This compares to

K+N having 10.3 million square meters. Here K+N ranks  $15^{th}$  while Mainfreight doesn't even make the list. The industry leader for dry storage warehouses is DHL with 150 million square feet across 520 warehouses. Second is Ryder Supply Chain Solutions with 95 million square feet and over 300 warehouses.

#### **BUSINESS MODEL:**

The business model of a logistics company is simple when it gets right down to it, though the execution is difficult. It's all about moving goods as efficiently as possible from Point A to Point B.

Logistics companies come in all sorts of flavors. On the one extreme are asset-based companies that own the physical infrastructure. Others are non-asset-based ("asset light"<sup>2</sup>) and simply manage the shipping process (to greatly simplify), contracting with asset-based companies for their space and availability.

Companies like FedEx and UPS own a ton of delivery infrastructure and move packages across the globe all the way to your doorstep. On the other end of the spectrum is a company like C.H. Robinson whose job it is to employ people who manage the shipping process on behalf of others, contracting with land, ocean, and air freight companies to move parcels anywhere they need to go and handling customs / border paperwork, etc.

Revenue / net fixed assets provides a good indication of capital intensity. You see Mainfreight is more asset intensive, which reflects the company's ownership of physical delivery and warehouse assets. Both asset-based and asset-light logistics businesses can have moats protecting returns on capital.

| COMPANY                              | TICKER      | REVENUE   | NET FIXED<br>ASSETS | REVENUE /<br>NFA |
|--------------------------------------|-------------|-----------|---------------------|------------------|
| FedEx Corporation                    | FDX         | \$90,155  | \$58,045            | \$1.55           |
| United Parcel Service Inc            | UPS         | \$100,338 | \$38,474            | \$2.61           |
| Mainfreight Limited                  | MFGHF       | \$3,523   | \$1,298             | \$2.71           |

#### PARTY TIME!!!

The logistics industry can be split into five different segments:

1PL (First Party Logistics): The producer or receiver of goods, handling their own logistics. Example: A manufacturer using its own trucks to transport products.

2PL (Second Party Logistics): Provides transportation services such as shipping or trucking companies. Example: A dedicated freight carrier or a commercial cargo shipping line.

3PL (Third Party Logistics): Offers comprehensive logistics services including transportation, warehousing, and fulfillment. Example: FedEx or UPS providing package delivery, warehousing, and distribution.

4PL (Fourth Party Logistics): Manages resources, technology, and infrastructure of the entire supply chain for a client. Example: Amazon's fulfilment services on its ecommerce platform.

5PL (Fifth Party Logistics): Provides strategic, innovative supply chain solutions, often through technology and data analysis. Example: A company like IBM offering integrated supply chain solutions with advanced analytics.

<sup>&</sup>lt;sup>2</sup> RXO, a recent spinoff of XPO, annoyingly mentions the fact it considers itself an asset-light company no less than 14 times in its 2022 10K, including four times in half a page in the company overview section. It reads more like an advertisement than a statement of fact. – End rant –

Page 6

#### **COMPANY HISTORY:**

Mainfreight continues to be run by its founder, Bruce Plested. The company has grown steadily, becoming one of the largest logistics companies in New Zealand and ranks in the top 30 worldwide. The history below is largely sourced from the company's website.

| 1978 | Mainfreight founded by Bruce Plested on March 6 <sup>th</sup>                           |
|------|---|
| 1979 | 100-year vision adopted   |
| 1984 | First Air & Ocean branches open in Christchurch and Auckland, New Zealand               |
| 1989 | Began operating in Australia as Mainline Distribution                                   |
| 1991 | First warehousing branch opens in Auckland  |
| 1994 | Acquired of Daily Freightways and Chemcouriers in New Zealand                           |
| 1996 | Listed on the New Zealand Stock Exchange  |
| 1998 | Opened 50 <sup>th</sup> branch and celebrated 1,000 <sup>th</sup> employee              |
| 1998 | Entered Asian market with partial acquisition in Hong Kong (balance acquired in 2007)   |
| 1999 | Entered the United States market through the acquisition of CaroTrans (balance in 2000) |
| 2003 | Acquired Owens Group in New Zealand (balance in 2005)                                   |
| 2004 | Opened 100 <sup>th</sup> branch   |
| 2006 | Welcomed 3,000 <sup>th</sup> employee   |
| 2007 | Expanded into the United States with the acquisition of Target Logistics (34 offices)   |
| 2009 | Revenue reaches NZ \$1 billion  |
| 2011 | Opened 200 <sup>th</sup> branch and welcomed 5,000 <sup>th</sup> employee               |
| 2011 | Acquired Netherlands-based Wim Bosman Group   |
| 2014 | Celebrated operations in 20 countries   |
| 2022 | Opened 300 <sup>th</sup> branch and welcomed 10,000 <sup>th</sup> employee              |
| 2023 | Global warehousing footprint exceeds 1 million square meters                            |

#### MANAGEMENT / OWNERSHIP:

- **Bruce Plested, Chairman and Founder (81):** Plested founded Mainfreight and has chaired the board since 2002. He has eschewed a salary and directors fees since at least 2014. He owns 14.8% of the company.
- **Don Braid, Managing Director (63):** Braid has been with Mainfreight 29 years and was in the industry 16 years prior to that. He was paid \$3.5 million in 2023. He owns 2.9% of the company.

In addition to Plested and Braid, the Mainfreight board consists of four independent directors, each of whom is paid \$120,000 for their services. Update: As of January 2024, the company nominated two additional independent directors.

Page 7

#### **KEY VARIABLES / METRICS:**

#### **Key Metric #1: Volume**

A logistics business is all about moving "stuff". How much stuff can be measured in tons (or tonnes)<sup>3</sup> on land and air, or twenty-foot-equivalent units (TEUs) for sea freight. Also important is the volume of warehouse space. Related are the number of branches and countries, which give an idea of the level of worldwide breadth the company has achieved.

| Volume                           | 2014    | 2015    | 2016    | 2017      | 2018      | 2019      | 2020      | 2021      | 2022      | 2023      |
|----------------------------------|---------|---------|---------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|
| Land freight tonnes              | (1)     |         |         | 6,148,933 | 6,866,867 | 7,349,327 | 7,700,213 | 7,660,242 | 7,286,572 | 7,321,452 |
| Air freight tonnes               | 73,367  | 86,547  | 113,120 | 121,553   | 127,174   | 126,669   | 126,071   | 114,736   | 138,279   | 126,941   |
| Sea freight TEUs                 | 230,320 | 251,685 | 267,144 | 280,539   | 311,586   | 342,143   | 337,504   | 347,638   | 424,610   | 392,279   |
| Warehouse footprint (sq. meters) | 410,979 | 465,042 | 524,795 | 578,724   | 614,037   | 679,225   | 729,684   | 804,288   | 929,502   | 1,041,016 |
| Branches                         | 233     | 242     | 239     | 239       | 247       | 260       | 282       | 297       | 305       | 331       |
| Countries                        | 20      | 20      | 21      | 21        | 22        | 24        | 26        | 26        | 25        | 26        |

1. Data on land freight tonnes prior to 2017 did not include Europe and would not be comparable. No company-wide total was available to back into European volume.

## **Key Metric #2: Capital intensity Key Metric #3: Operating margin**

| Capital requirements & ROCE            |     | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021   | 2022   | 2023   |

| Pre-tax return on capital employed     |     | 28.8%  | 23.7%  | 22.5%  | 23.4%  | 23.7%  | 26.9%  | 19.8%  | 18.1%  | 29.1%  | 29.8%  |
| After-tax assuming 25% tax rate)       |     | 21.6%  | 17.8%  | 16.9%  | 17.6%  | 17.8%  | 20.2%  | 14.9%  | 13.6%  | 21.9%  | 22.3%  |

 $1. \ Core \ working \ capital = total \ current \ assets \ minus \ cash, \ trade \ creditors \ \& \ accruals, \ and \ employee \ entitlements.$ 

Capital intensity and operating margin cannot be assessed wholly independent of one another since they interplay depending on business type. Trends over time are important. In the case of Mainfreight, it's clear that its investment in net fixed assets (primarily warehouse space, as seen in the growth in the volume section), is causing the business to operate with more capital per dollar of revenue. Said another way, revenue per capital is declining, as seen in the bolded figures below.

On the other hand, looking at operating margin we see an upward trend from around 6% in 2014 to almost 11% in 2023. Note that the freight boom in the 2022 into 2023 surely pushed margins above trend.

Put capital intensity and margins together and you get pre-tax return on capital employed. Mainfreight clearly has made a tradeoff between gaining more margin at the expense of greater capital intensity. One can look at this in several ways. First is the 'why bother' question to which the answer is (I think) that investing in physical infrastructure allows greater control of the system which results in greater customer service, which results in greater growth. The other aspect is the ability to put capital to work at satisfactory rates of return. Sure, a high return business is great, but the *value* of a business with a slightly lower return profile with greater and longer reinvestment prospects could be higher, all things being equal.

-

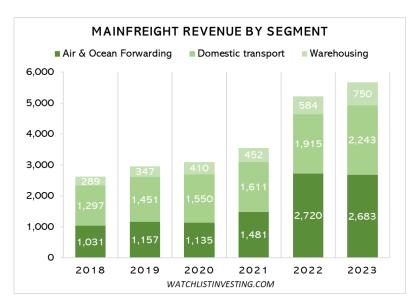

<sup>&</sup>lt;sup>3</sup> I'll use ton and tonne interchangeably. However, it is important to note that ton is imperial units and is equal to 2,000 pounds. A tonne is metric and equal to 1,000 kilograms or 2,204 pounds.

<sup>1.</sup> Core working capital = total current assets minus cash, trade creditors & accruals, and employee entitlements.

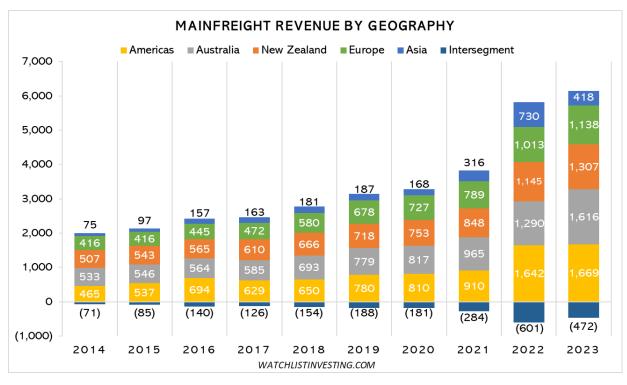

Mainfreight breaks its revenue down by segment and by region. Looking at each gives us a clue as to the growth trajectory of the business. Unfortunately, the segment revenue detail gets a little fuzzy prior to 2018. Nonetheless, it shows the company's international expansion efforts, with warehousing and air & ocean forwarding growing by over 2.5x compared to *just* 1.7x for domestic transport.

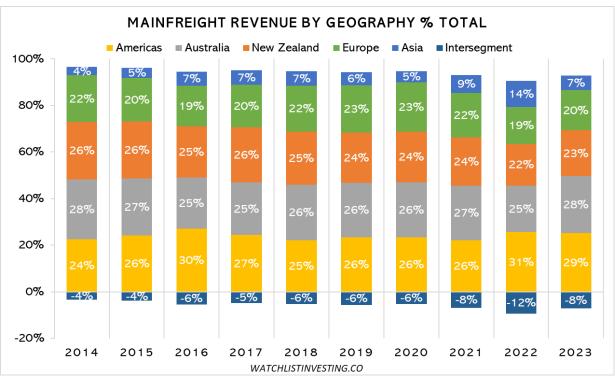

Turning to geography, we can

see the clear shift toward Australia as the first natural expansion point for the business and then to the Americas, which now represents the largest revenue segment by geography.

<sup>2.</sup> Data on land freight tonnes prior to 2017 could not be determined.

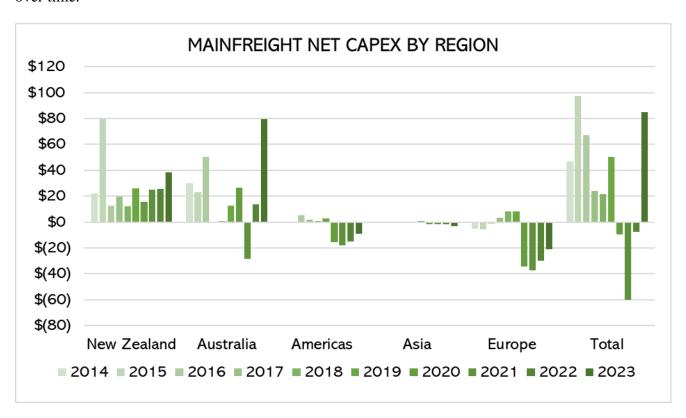

Here I think it is worth discussing capital expenditure to put a finer point on the type of business being conducted in each region. Mainfreight is, first and foremost, a New Zealand company. It began in NZ and grew to become the one of the largest logistics companies on the island. Its natural expansion from there was to Australia. This is reflected in capex by region (see chart on next page).

In New Zealand primarily and to a lesser extent in Australia, Mainfreight operates as an assetintensive logistics company. It owns trucks and warehouses, the physical infrastructure necessary to move goods around. Its activities in the other regions are more heavily focused on the brokerage side and warehousing as evidenced by the growth in revenues with comparatively little (or negative) net investment in the Americas, Asia, and Europe.

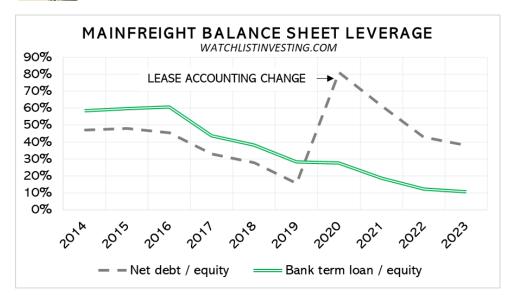

To put an even finer point on America, Mainfreight has its eyes set on competing in the less-than-truckload (LTL) space in the United States, becoming a registered motor carrier in the country. The company is not naïve when it comes to the difficulties it faces. From the 2023 annual report:

It [the company's experience over the past two years] has also exposed our weaknesses and lack of maturity in this market, and a shortage of customers across market verticals that provide regular, daily freight volumes, no matter the economic cycle... However, the growth we did experience has allowed us to find some measure of scale in what will become our biggest market...

The report goes on to say that the company is planning to acquire land and build new facilities, including cold storage and perishable facilities. One would expect capex to reflect this buildout over time.

Since 2014, Mainfreight has grown while improving its financial health. Leverage is shown two ways since the 2020 accounting change capitalizing leases skews the numbers upward in that year. However, the trend over the subsequent three years is apparent.

#### **Interim Results (6 Months September 2023):**

Mainfreight's results for the first half of fiscal year 2024 reflect the weakness seen across the industry. Reduced freight volumes and pricing industrywide hit Mainfreight to the tune of a 22% decline in revenue and a 43% decline in profits.

New Zealand and Australian markets were relative bright

spots with revenue down 14% and 9%, respectively. Profits in those regions declined 18% and 10.6%, respectively. The America's segment fared worst with revenue down 42% and pre-tax profit down 80%. Go back and look at the shipping container cost at the beginning of the industry section to see the steep decline from 2022 to 2023.

Operating margin came in just under 8% for the 2023 period compared to 10.4% for the same period in 2022. This suggests that the business is probably back to normal and not falling off a cliff, even though it might seem like that in isolation.

In response to the slowdown, management cut its capex guidance by \$113 million to \$563 million for FY 24 and 25 combined. Expectations are for the second half to improve marginally.

#### **CAPITAL ALLOCATION:**

Accounting made analyzing Mainfreight's capital allocation a bit tricky<sup>4</sup>, but in the end came down to a few big buckets:

- 1. Dividends at 36% of net income
- 2. Growth capex at 13%
- 3. Debt and lease payments of 34%
- 4. Increase in cash of 17%

| <b>Mainfreight Core Capital Alloc</b> | cation 2014-23 |
|---------------------------------------|----------------|
| Net income                            | 1,720 100%     |

Working capital is not a constraint on growth,

as evidenced by the mere \$15 million increase in core working capital since 2013, all while revenue has tripled.

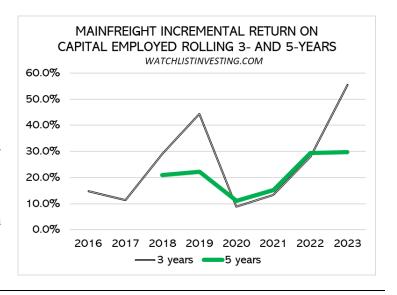

The company spent most of its net investment in capex on physical property. The growth in warehouse space from 2014 to 2023 tells that story.

| Warehouse footprint detail | 2014         | 2015    | 2016    | 2017    | 2018    | 2019    | 2020    | 2021    | 2022    | 2023      |

<sup>&</sup>lt;sup>4</sup> This was in part due to being less familiar with IFRS accounting standards, including the fact that Mainfreight revalues its property from time to time (in accordance with IFRS), and the lease accounting.

A rolling average of incremental returns on capital employed (pre-tax) demonstrates that Mainfreight has invested shareholder capital well. Rolling returns troughed in 2020 on both a 3- and 5-year basis at 10% and have been rebounding since that time.

Another standout is the lack of activity in the share count. Since 2013, it's increased from 99.2 million shares to just 100.7 million shares, a CAGR of 0.15%.

#### **VALUATION:**

One thing I've somehow managed to do is avoid looking at the price / market cap of this company, something not always easy to do during the research process.

Mainfreight almost undoubtedly has been over-earning the last two years. Starting with FY 2023 revenues of \$5.7 billion and adjusting them by 25% (slightly more than the interim decline in revenues of 22%) results in revenues of \$4.3 billion. It seems the current margin of 8% would account for reversion to the mean from the 10%+ highs while allowing for a slight improvement from the 2013 to 2020 average of 6.6%. Applying an 8% pre-tax margin to \$4.3 billion gives us operating income of \$344 million; less 25% tax and we're at \$258 million, rounded down (conservatively) to a nice \$250 million of after-tax earnings.

Mainfreight grew revenues by 6.7% on average between 2014 and 2021. If we assume 7% growth that results in revenues growing by \$300 million next year. With each dollar of revenue requiring \$0.36 of capital, the company must retain \$108 million to grow, reducing the distributable cash flow to \$142 million. Using a 10% discount rate less 7% growth that produces a multiple of 33x this distributable cash flow, or about \$4.7 billion. *As a reminder, these are New Zealand Dollars*.

Now to check the price... Shares trade on the New Zealand exchange at around NZ\$71. With 100.7 million shares that gives it a market value of \$7.1 billion. Add on net debt of \$700 million and the total enterprise value is \$7.8 billion, or 65% greater than the calculated value above.

Knowing the enterprise value, we can take the \$250 million after-tax earnings and divide it in, resulting in a current earnings yield of about 3.2%. Such a low earnings yield implies lots of high growth going forward. Mainfreight seems to have a bright future, but I'm not sure it's *that* bright.

Page 14

#### RISKS:

Valuation aside, I see a few risks in Mainfreight:

- 1. **Key man risk:** Founder, Bruce Plested, has had a huge impact on the company. Eventually he will no longer be running the show. However, his #2, Don Braid, has been with the company for three decades and would likely continue running the company as he has in the past, building on the 100-year vision of Plested. The company also has a 10% profit sharing program to incentivize employees to take care of the bottom line.
- 2. **Capital investment:** Building an asset-heavy company risks building warehouses and other infrastructure in the wrong locations. Mainfreight seems to have a good track record of building infrastructure but it's possible that shifts in trade lanes could render owned infrastructure less valuable.
- 3. **US LTL:** The company has an aim to enter the less-than-truckload space in the United States. Such an entry will require a large investment in physical infrastructure and risks ill investment or botched execution. The LTL market is a great business for large, established incumbents, and it's unclear exactly how Mainfreight intends to break in and compete. Presumably they will start local/regional and expand trade lanes as they gain experience, however, the company hasn't to my knowledge fully explained their strategy.
- 4. **Reliance on New Zealand and Australia**: These two countries make up a large portion of revenues and have been receiving the bulk of capital expenditure dollars. As the fortunes of the countries go so will Mainfreight. Both countries appear to be growing modestly with inflation coming down. New Zealand in particular is suffering from very high housing costs, which could impact growth and demand.

#### **SUMMARY / CONCLUSION:**

Mainfreight falls into the category of businesses with highly satisfactory returns on capital and the ability to deploy that capital at attractive rates of return. The company is run by its founder and a long-time managing director (CEO), who favors organic growth, a steady dividend, and not touching the share count. The company is following the industry in returning to a more normalized level of operations but appears to be well situated long term. I'd like to see shares cut in half to be interested in buying. Aside from valuation Mainfreight has all the attributes I like to see in a business which is why I'm adding it to the Watchlist. It will also complement Old Dominion and Saia in the logistics segment.

Stay rational! —Adam

Note: Mainfreight trades on the New Zealand Exchange under the symbol MFT. There is an active unsponsored ADR by BNY Mellon (MFGHF) and there appears to be an inactive unsponsored ADR by Citi (MFGHY), both with a ratio of 2 ADRs per underlying.<sup>5</sup>

<sup>5</sup> As of this writing shares traded on the New Zealand Exchange at NZ\$71. ADRs (MFGHF) traded at US\$44. The USD/NZD exchange rate is about \$0.61 USD to NZD. The implied USD price is \$43.31, meaning there's a slight advantage to buying direct.

Click <a href="here">here</a> to see the latest Watchlist and Suspect List on Google Sheets.

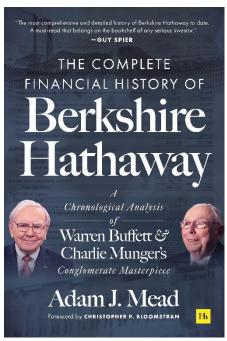

After nearly two decades as an individual investor, a decade in commercial credit at various banks, and a few years managing money for friends/family in the background, I decided to go full-time managing money for clients in 2020. Watchlist Investing is an extension—albeit separate and distinct—of what I do day-to-day as a practicing capital allocator. Inverting the margin of safety principle, I hope to add value to readers above and beyond the nominal cost of the newsletter.

My investing style is influenced by my background growing up in a family of business owners. I followed suit selling firewood through high school and founding a welding business in college. Looking at stocks as businesses is natural to me. My investing approach rests on fundamental value investing tenets, but it's adapted to suit my style. I'm 100% certain I'm not the best investor or analyst, but I hope to improve over time.

Between 2016 and 2021, I wrote a book on Berkshire Hathaway. *The Complete Financial History of Berkshire Hathaway* was and is my passion project. I hope it brings new shareholders up to speed on the company and provides a fresh look to long-time shareholders, in addition to serving as a resource/reference book. It can be purchased <a href="here">here</a>. I also created <a href="here">www.theoraclesclassroom.com</a> as an extension of the book, which includes an archive of a lot of BRK material.

Plain language/bottom line: NOTHING - and I mean nothing at all - of what I write, imply, link to, comment on, etc. should be considered investment advice. This newsletter is intended as a general publication for information/educational/entertainment purposes and is not and should not be considered investment advice or an offer to buy or sell securities. I'm licensed as a registered investment advisor and have a fiduciary duty to put clients first. That means ahead of all subscribers and me. Watchlist Investing subscribers are NOT my clients. All of that said, I will endeavor to let subscribers know when I or clients own the securities I discuss, but I have no duty to keep you informed if anything changes. Good morals (and the law) also mean I won't use this publication to tout or pump and dump securities, etc. I don't want to go anywhere within 500 miles of that gray line.
