# Safety Rules and Procedures Question Companion

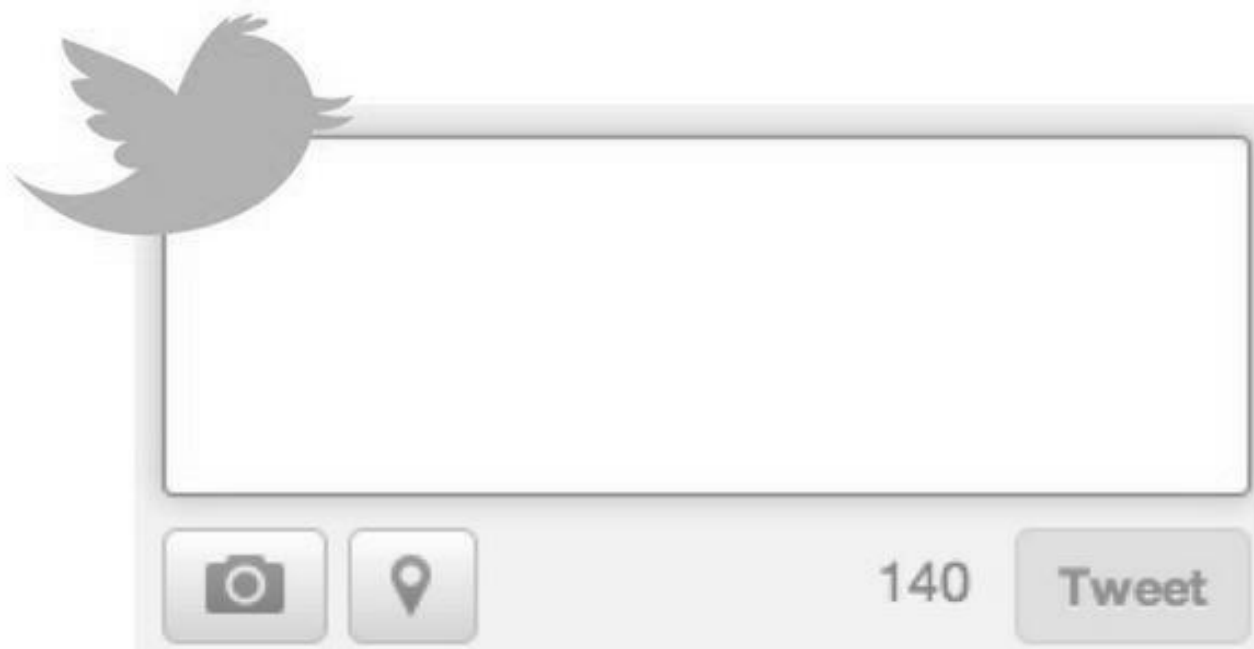

For 1-5, choose the best answer.

1. Ivan comes in for science class and sees materials on the table. Since he knows what the materials are used for, he puts on his goggles and gets started. What lab rule did Ivan break?
  - a. Keep your area neat and clean.
  - b. Read all the directions before starting any lab.
  - c. Wear proper protective gear during a lab.
  - d. Know the location and use of all safety equipment.
2. Bree is on step 6 of a lab with 7 steps and is a little confused by the wording in the instructions. What should she do?
  - a. Go ahead and finish since she is almost at the end.
  - b. Ask her lab partner what he thinks and go with that.
  - c. Ask her teacher to clarify the directions.
  - d. Reread the directions and make a guess on what they are telling her to do.
3. Liam and Andrew are working in the lab with a scalpel. Since they are working with a sharp object they should make sure to –
  - a. know the location of the eye wash station.
  - b. avoid wearing baggy clothes that can catch fire.
  - c. always cut towards themselves.
  - d. wear proper safety gear like goggles and gloves.
4. Samantha and Andrea are playing around with the pipettes in a lab and accidentally knock a beaker over. What should they do?
  - a. Clean it up quickly so the teacher doesn't see.
  - b. Move to another table so they can use a different beaker.
  - c. Tell the teacher what they did and follow her directions.
  - d. Leave the spill and blame it on the next group.
5. True or False: Injuries can occur and science lab equipment may also get damaged or broken if the safety rules and procedures are not followed.
  - a. True
  - b. False

Fill in the blank(s) with the correct answer for 6-9.

6. You should know the \_\_\_\_\_ and \_\_\_\_\_ of all safety equipment.
7. Amber notices that the materials on her table are all spread out and mixed together. In order to stay safe, Amber should \_\_\_\_\_ her lab area.
8. Kannon reads all the directions for the lab, puts on his goggles, and starts working on the lab before the bell rings so he can be sure to finish. What did he do wrong?

9. James runs out of a chemical during the lab and decides to get more from the table next to him. A better idea would have been to ask the \_\_\_\_\_.
10. Write a tweet below using 140 characters or less (including spaces) that describes lab safety.

A stylized Twitter interface for writing a tweet. It features a large text input area, a camera icon, a location pin icon, a character count of 140, and a 'Tweet' button.
