

Ladybugs

- Eat aphids — 100 a day!
- Not all are red!

- They hide in winter and sleep in a group.
- Lay their eggs in a safe place.
- 2 wings are under their shell.
- They taste bad.

Bees

- Pollen sticks to them.
- When a bee stings it dies.
- The female does all the work.
- The queen bee lays the eggs.
- They live in a hive.
- They collect nectar from flowers.
- They smell with antennae.

Butterflies

- They start out as an egg.
- All different sizes.
- Their wings have to dry before they fly.
- They always stay the same size.

Caterpillar

- Eat a lot to grow.
- Shed their skin.
- Make a chrysalis.
- Eat through their egg.
- They turn into a butterfly.
