Date: \_\_\_\_\_

Observe and Draw Your Bug.

Is it an insect? 😊 ☹️

What is an Insect?

An insect has:

Hello Science Friends,

Thanks for stopping by and downloading the One Day-Fun Day Insect Investigation. I made this to go along with the Love Bug Valentine's Day cards that you can find on my science blog [littlemisshypothesis.blogspot.com](http://littlemisshypothesis.blogspot.com). You can use the search feature on the science blog to find that post with the freebie. Using plastic bugs I purchased from Dollar Tree my students will investigate and discover if they have a true insect or not. The investigation mat is made to be used independently. I am using this activity for Valentine's Day science. I am printing the bug jar Valentine's I mentioned above, that are free on my blog, gluing on the bugs and I will pass them out to my students. Each child will be able to use a hand lens and bug card with the investigation mat to determine if they have a true insect or not. I hope you and your children enjoy our One Day-Fun Day Investigation too. If you are interested in more Science with young children that fosters the developing young scientist, check out my I Can Be A Scientist My Five Senses Unit available in my teacher store! Please note that this work is protected by copyright and is for a single classroom download. This file is not intended to be distributed by any means. I appreciate your understanding.

Thank you,
