

How do you get  
home from  
School?  
Graphing

This is a great graph to do on the first day of school!

It is an introduction into graphing. PLUS, you get to double check how each student is getting home. Very important in kindergarten on the first day of school. ☺

This packet includes icons for a whole group graph. I have included colored icons for the class graph. Then the students will write his/her name on the icon which represents how he/she gets home from school. Students can also color the icon. Then as a whole group students tape their icon in the correct column. You can discuss results as a group.

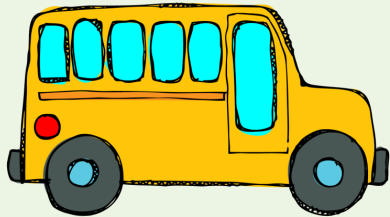

- Note- for the first day I would always print a collection of the student icons and quickly cut them out. It saves time on the first day.

Also included in this packet is an independent recording sheet. The students will record how many icons for each and write the number. They will also color the icons to match the class graph.

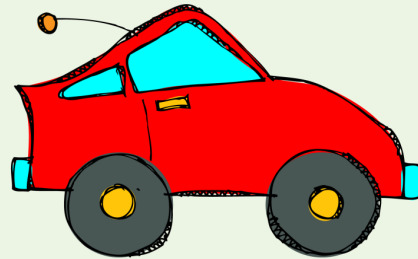

## Icon Meanings

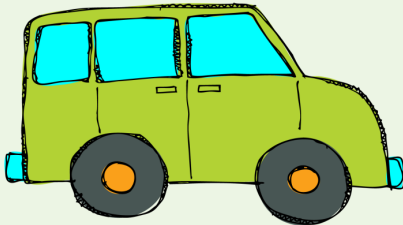

This is the meaning for each icon but you are welcome to change them to fit your classroom.

BUS

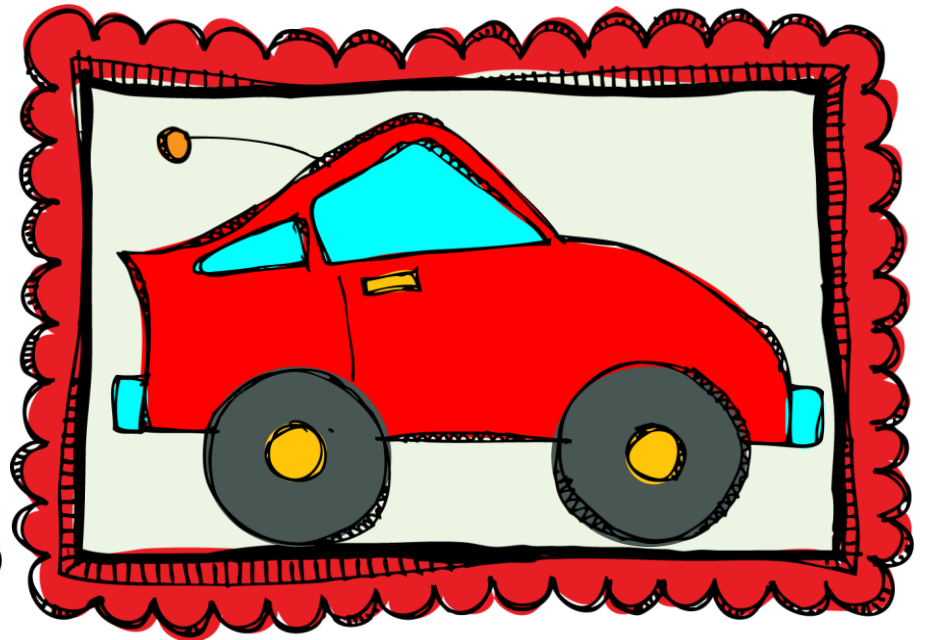

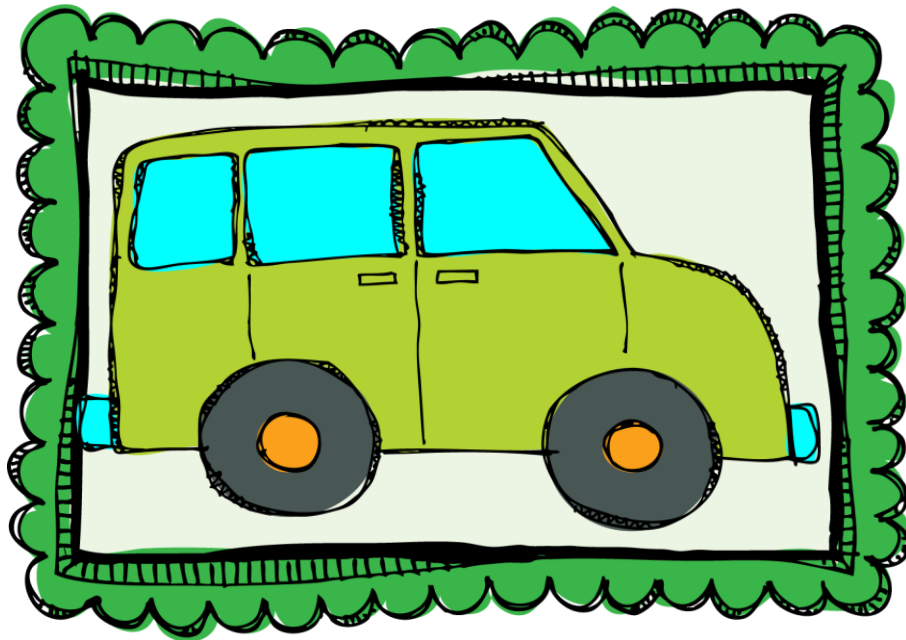

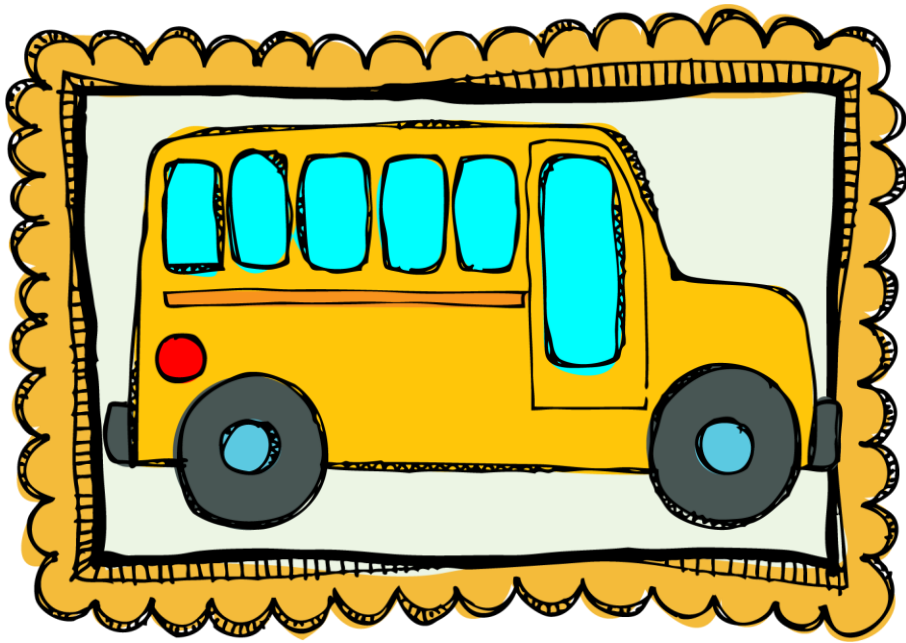

Parent Pick Up

Daycare Van

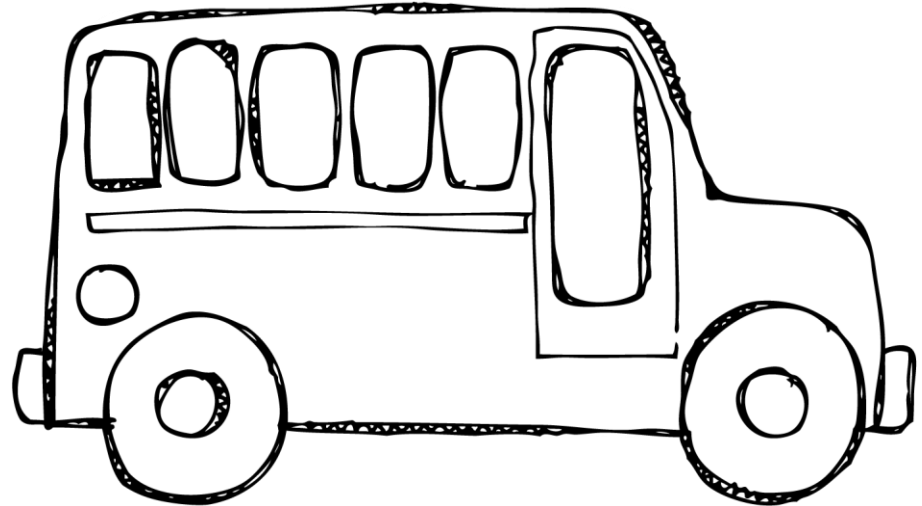

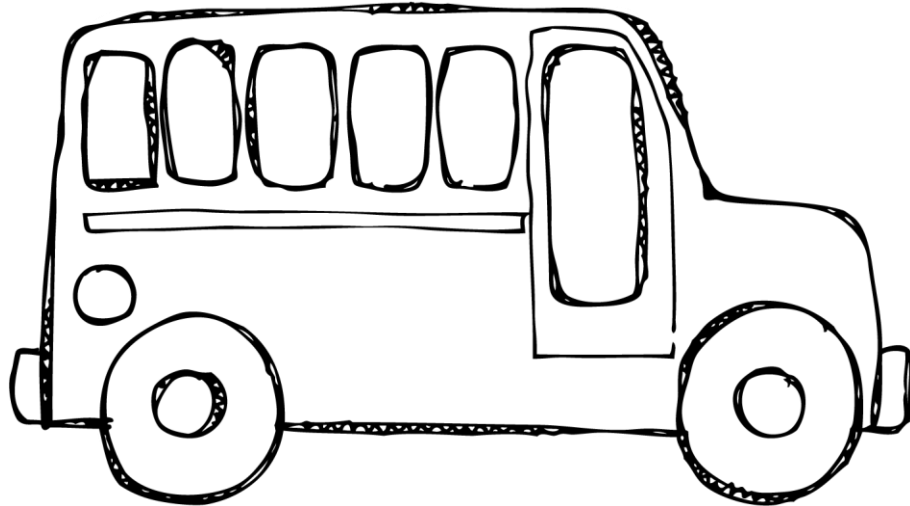

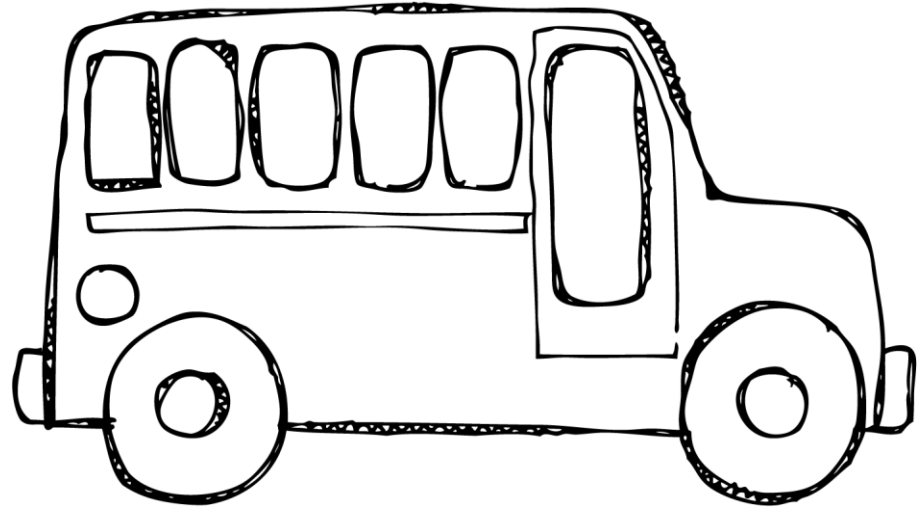

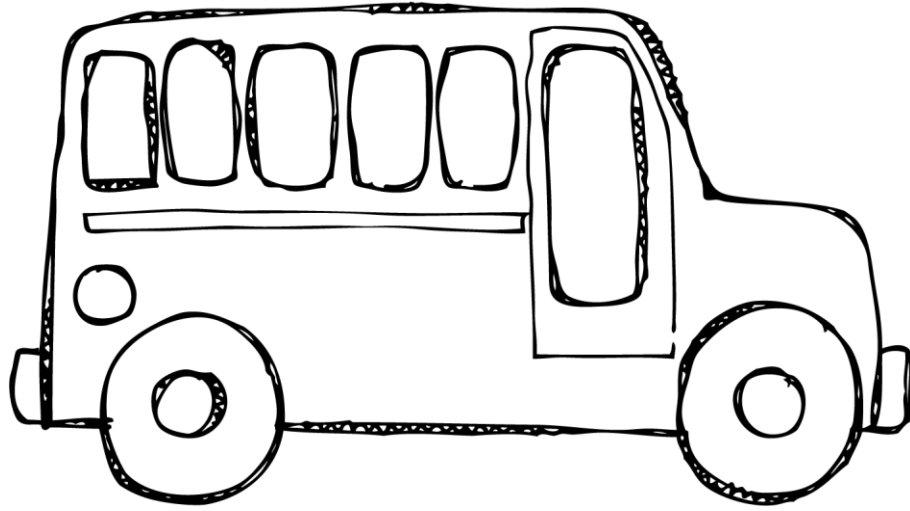

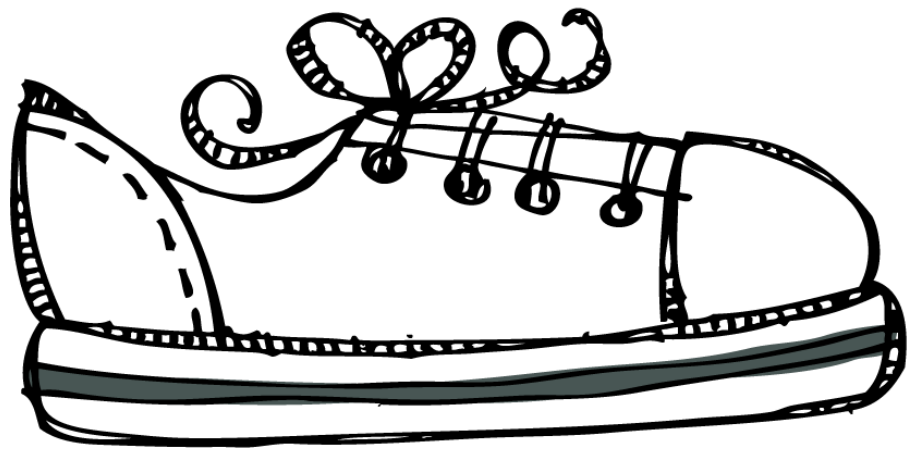

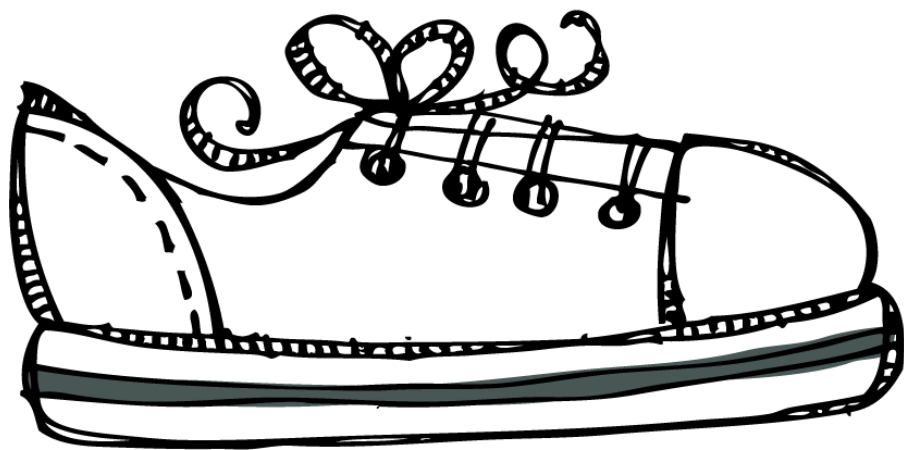

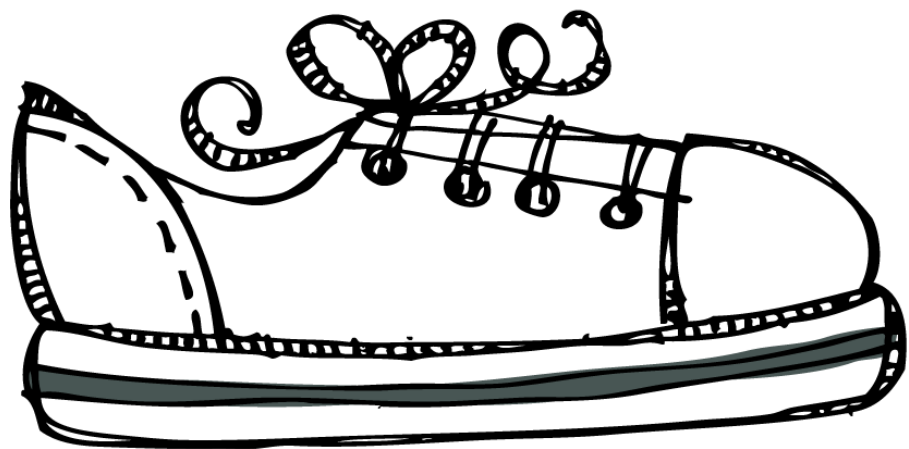

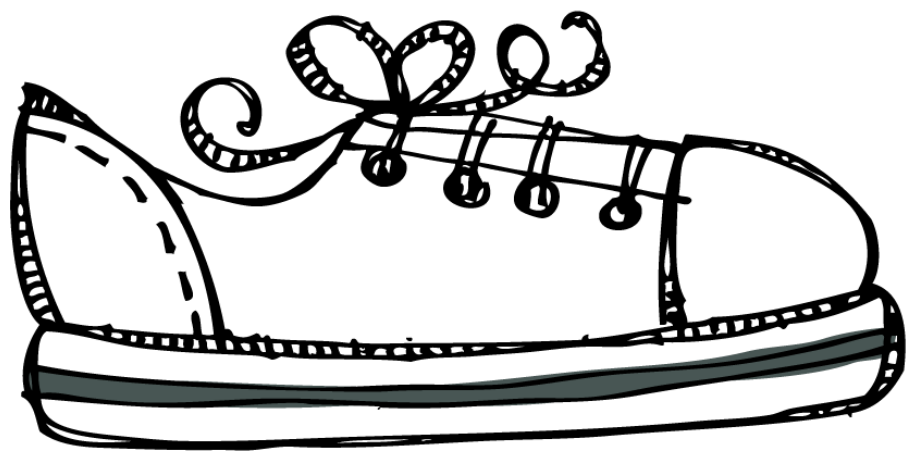

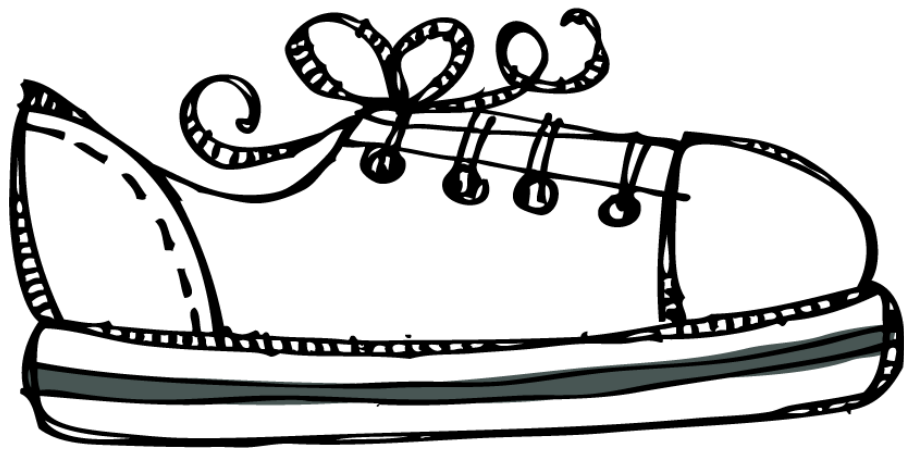

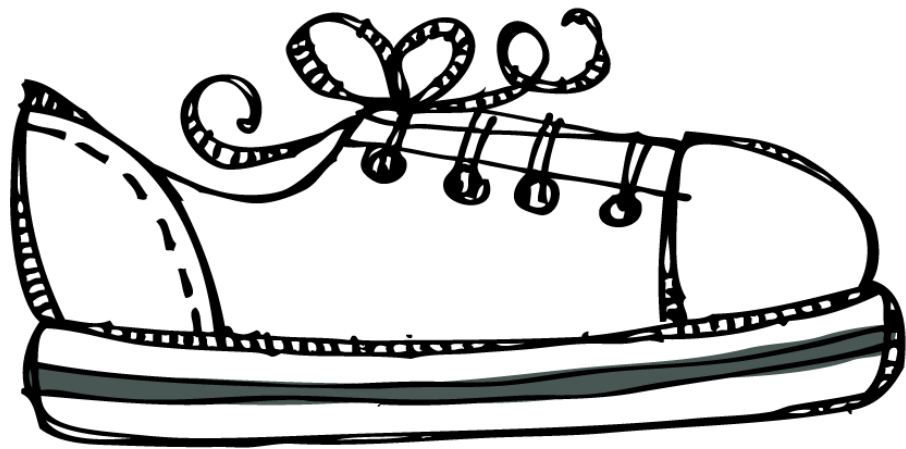

Walk

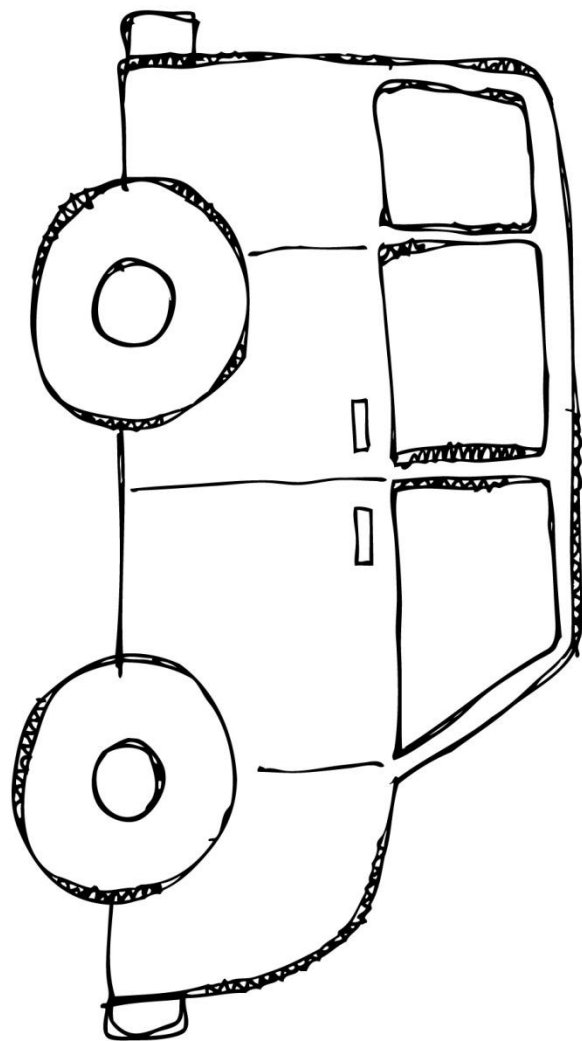

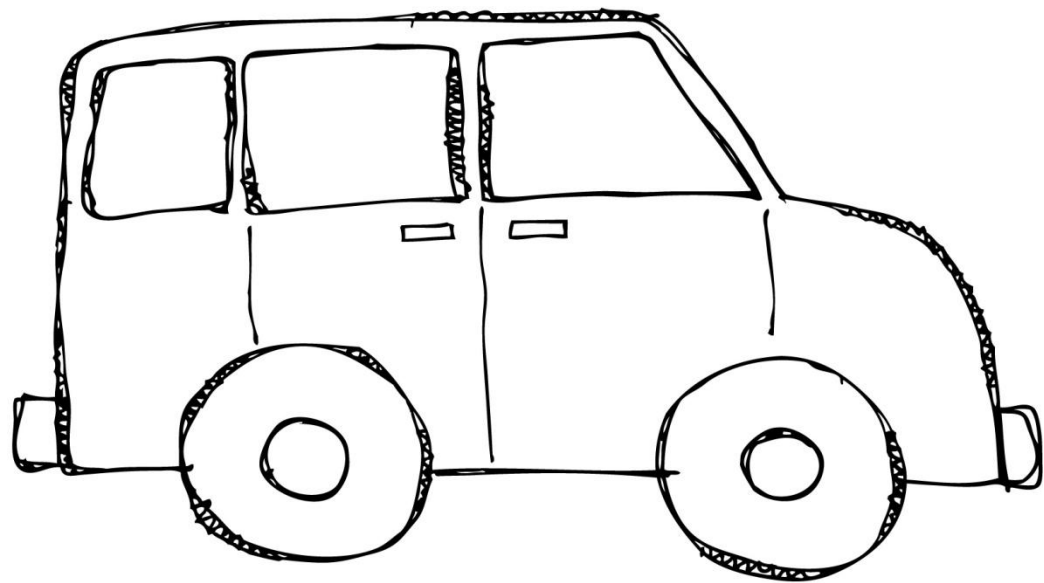

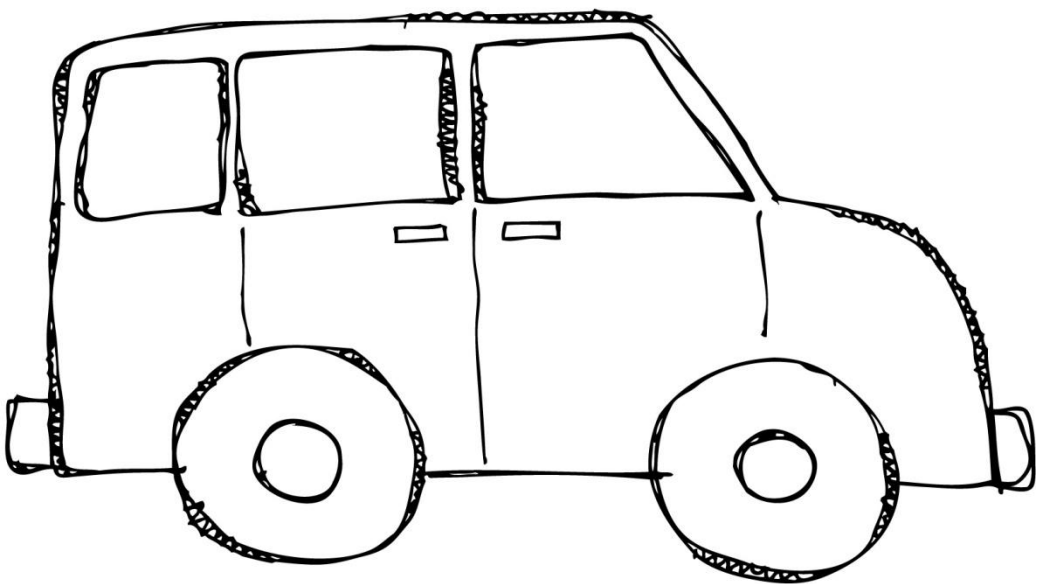

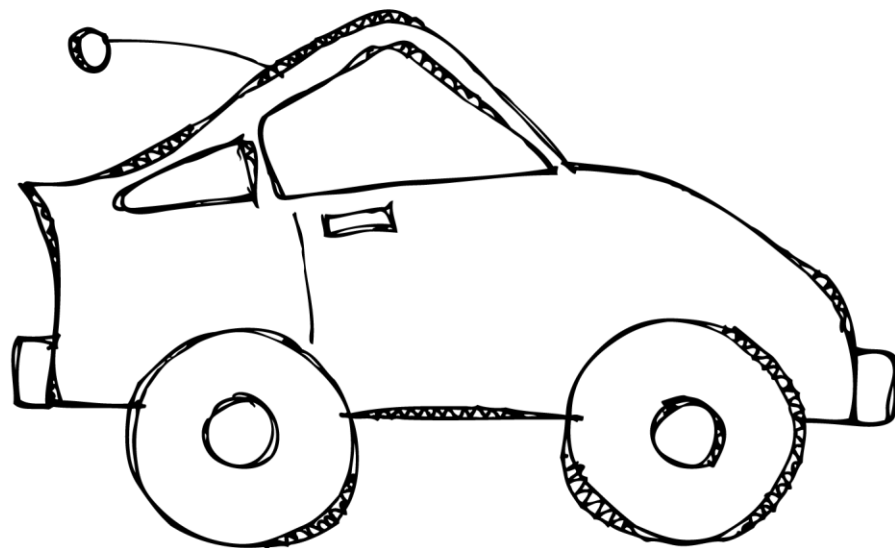

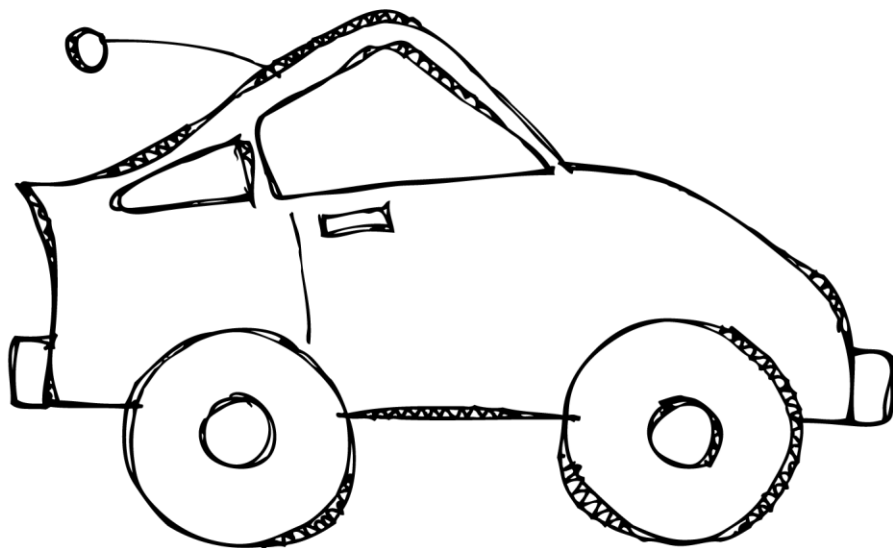

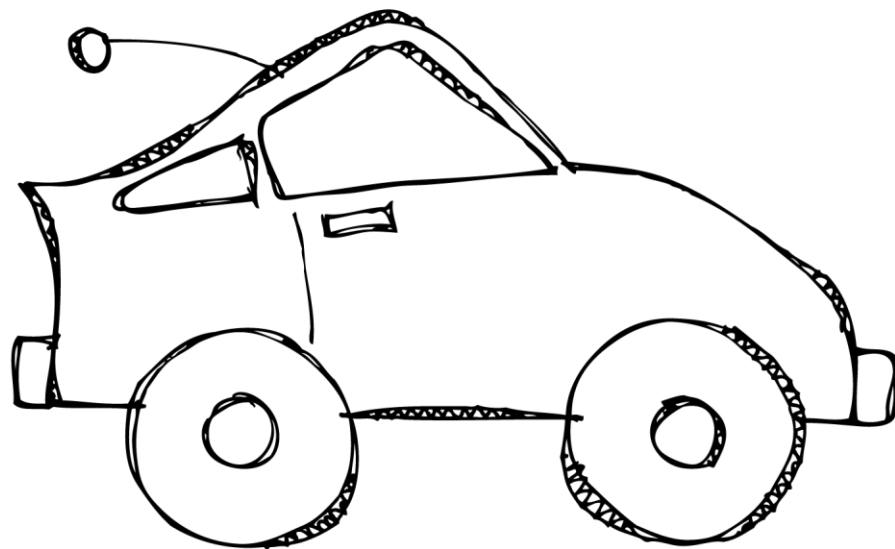

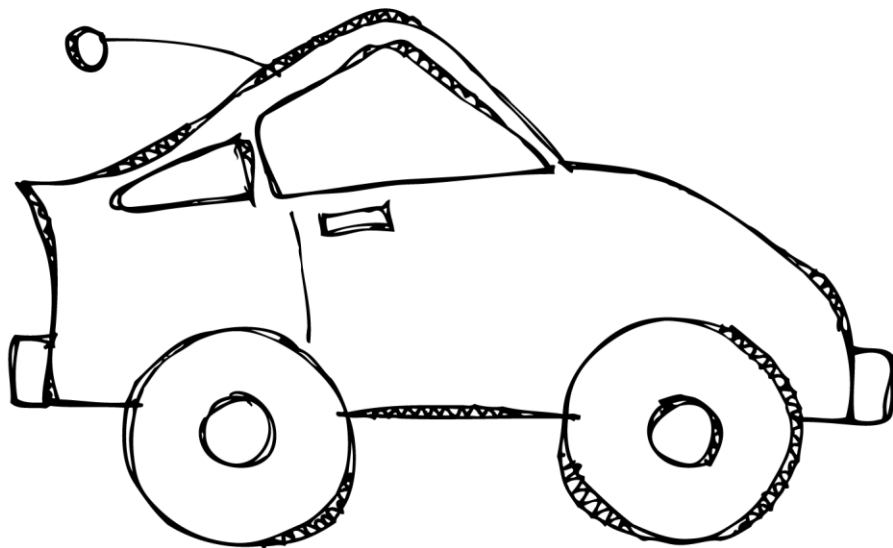

# Student Icons

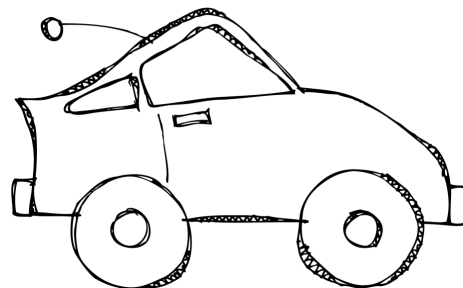

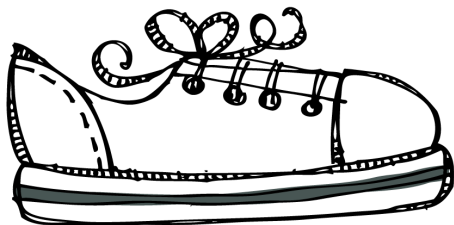

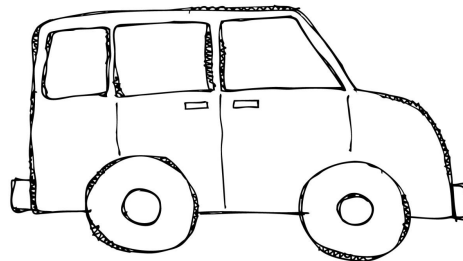

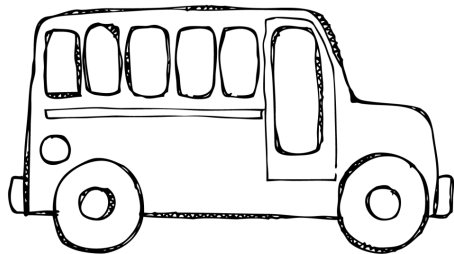

Name: \_\_\_\_\_

Class Graph – How do you get home from School?  
Record the information from the class graph.

Color the icons to match your class graph.

Thank You!

Thank you for purchasing the graphing packet.
