

AOIS

**Agentic Operating
Intelligence System**

AOIS ESG Investor Brief

Governance-first AI. ESG by design.

Every action. Every agent. Every time.

ESG Is Now Mandatory

Enterprises and governments face rising regulatory and stakeholder demands to prove ESG alignment. Compliance is no longer optional - new frameworks such as the EU CSRD, SEC climate disclosures, and UN SDGs require verifiable ESG reporting. At the same time, investors, customers, and regulators expect real-time assurance, not annual reports that lag reality.

Most AI and automation systems today operate as black boxes, creating ESG blind spots and compliance risk. AOIS closes this gap by embedding sustainability, ethics, and governance into every action, every agent, every time - ensuring agentic operations are accountable by default.

\$53T ESG assets projected by 2025 (1/3 of global AUM)

>80% Fortune 500 companies now publish ESG reports

3x Increase in ESG-related regulations since 2018

(Source: Bloomberg, PwC, OECD)

Mandatory Reporting

EU CSRD, SEC, UN SDGs now require ESG assurance

Real-Time Oversight

Enterprises need continuous ESG evidence for AI/automation

Governance Built-In

AOIS is the only platform enforcing ESG at runtime

AOIS as an ESG Investment Opportunity

AOIS operates at the **intersection of AI and ESG compliance**. Investors gain exposure to both growth markets — with **risk managed through governance-first design**.

Growth Market

- Global AI spend projected **\$300B+** by **2030**
- ESG compliance market expanding rapidly
- AOIS bridges both domains

ESG Differentiator

- Governance-first architecture
- ESG enforcement at runtime
- Aligns with CSRD, SEC, ISO, UN SDGs

De-risked Investment

- Prevents compliance failures
- Audit-ready ESG logs & evidence
- Designed for enterprise + government adoption

READY TO EXPLORE AOIS?

AOIS combines **AI growth** with **ESG assurance**.

Join us in building **sustainable, ethical, and compliant automation** for enterprises and governments.
