

NEW Manual Syringe Guns for glues & pastes

Adhesives Glues Pastes Silicones Solvents Paints Grease Epoxies Gels

New SyringeGun hand applicators are ideal for the controlled dispensing of gels, pastes, resins, glues, grease and many other fluids. A reusable dispenser in sizes 30cc or 55cc.

Attach a clear, black or amber barrel, slot into the gun handle, squeeze the trigger for a powerful 7:1 ratio leverage. Makes easy work of thick pastes and the ergonomic design does not wear the hands during use.

Supplied as a single gun or with barrel, piston and tip kits. Covered by a 1 Year warranty and available direct from stock.

Typical applications include silicone RTV gasket beads, grease with brush tip nozzles, potting small components, applying shots of roach gels or bait pastes, repair work, re-work or field work.

All guns are supplied with instruction guide.

Industrial Silicone Free
Grade Safe Components

Benefits

- Portable - no air or battery required
- Hold trigger for controlled "shot"
- Reduces over application - less waste
- Speeds up application of fluids
- In 2 barrel sizes
- Applies watery liquids to thick pastes
- Robust build and design with 1 year cover
- Ships direct from stock

Every gun is supplied with a barrel, piston, tip cap and tip. Kits are supplied with packs of each part.

When the trigger is pressed, the rod moves 1/8" down (3mm) so a shot can be made. Repeat squeezing of the trigger is for making beads.

The lever on the gun is lifted to easily pull the rod back when changing barrels. The barrel is attached to the gun by bayonet a slot in or a quick, secure, leak free seal. This gun does not use an O-ring seal so is low maintenance.

Please contact us for options on barrel sizes, colours, tips and advice on accessories specific to your dispense applications.
