We are pleased to introduce 2 new diameters of Smooth Flow Tapered Tips to our existing range. Previously, our smallest diameter tapered tip was the 27 gauge size with an inner diameter of 0.20mm.

Our new 30 gauge size has an inner diameter of just 0.15mm and our new 32 gauge size has an inner diameter of just 0.10mm.

Tapered style dispensing tips offer many benefits for handling materials including high viscosity glues, gels and pastes. The smooth flow design reduces the pressure that is required to apply materials whether manually or with pneumatic dispensers.

The double helix luer lock thread ensures a leak free attachment. These 2 new gauge sizes allow very small deposits to be achieved from standard parts that are available from stock.
