

CUSTOM CABINETS, CABINET DOORS

KINGSTON CABINETS CATALOGUE V2

Custom Builds, Cabinet Refacing, Cabinet Matching

Look through our wide selection of Canadian made cabinet doors in thermofoil, MDF and hardwood. This catalog offers door options for cabinet refacing, custom builds, and cabinet matching. After choosing your grade, profile and finish put the final touches on your kitchen with our knob, handle, and hinge selections.

CUSTOM CABINETS

Combine any of our door options with white melamine, maple melamine, or birch plywood cabinet boxes, then finish with our selection of accessories. Cabinets come in 5/8" or 3/4" builds, lock and dowel construction, soft-close doors & drawers, 10-year builders' warranty. Canadian made. Customizable within 1/16".

1. Choose your cabinet box material

White Melamine

5/8", 3/4"

Maple Melamine

5/8", 3/4"

Birch Plywood

3/4"

2. Choose your cabinet door profile and finish from any of our Thermofoil, MDF or Hardwood options.

CABINET REFACING, CABINET MATCHING

Our wide variety of cabinet doors allows us to make edits to existing kitchens demolition free. This comes in the form of cabinet refacing or matching the current door style and re-organizing or adding additional cabinetry. Do you want to know if we can match a cabinet? Or a quick estimate on refacing? No problem:

- 1- Take photos of the existing kitchen

- 2- Include which door(s) you are interested in
- 3- Email this information to brett@kingstoncabinetry.ca , or text/call (613) 583-6831

RIGID THERMO-FOIL

Thermofoil doors are a budget-friendly alternative that fit beautifully into a modern kitchen. This thermoplastic coating is non-porous, making it resistant to liquid substances.

MEDIUM-DENSITY FIBREBOARD (MDF)

MDF is rapidly gaining popularity in cabinet construction. MDF, like wood, expands and contracts with fluctuations in temperature and humidity making it resistant to warping or cracking. MDF is made from very fine particles and does not have a noticeable grain, providing the perfect canvas for a smooth sprayed finish.

HARDWOODS

Birch

Yellow birch is the wood through which nature best expresses its sparkling personality. Its nuanced natural colors and fine grain give it a unique, attractive, and joyful personality. If you like wood with beautiful, discreet, and delicate patterns, yellow birch will meet your expectations.

Maple

Maple has a both a strong and delicate personality. Since it is one of the most common and widely used North American woods, we could even say that it's as faithful as an old friend! Maple has a refined appearance, does not have much grain and has very little variation in color, which gives your cabinets a very delicate and homogenous appearance. If you don't like the look of wood grain and you want a soft and uniform tone, maple is for you.

Cherry

Elegance, classicism, luxury...the best words for describing cherry wood. The lovely smoothness and rich warm reddish colors of cherry wood are sure to charm and provide a magnificent finish. Its greatest characteristic is a shimmering effect when light hits it and caresses its grain. Cherry wood's sophisticated personality radically enhances your décor and gives your kitchen a remarkably distinctive look.

Hickory

Hickory offers a unique esthetic, featuring contrasting colors and very expressive grain, giving your room an inimitable rustic style. It also offers an unmatched combination of strength, durability, rigidity, and impact resistance not found in any other type of North American wood. Its esthetics and unique mechanical characteristics contribute to making hickory the best choice for anyone wanting to combine rusticity and distinction.

Black Walnut

Noble and refined, walnut is one of the most distinctive types of wood in North America. This wood symbolizes energy, vitality, and strength. Considered a deluxe product, it is best suited to high-end projects. If you are looking for wood that offers luxury and distinction, black walnut will satisfy your highest expectations.
