

Helping Transform Inclusive, Accessible Employment Opportunities and Workforce Development Practices using Technology

August 2022

Welcome to the first new edition of our Distinctability newsletter. With a focus on assistive and supportive technologies, our aim is to update you with informative articles, tools and innovations in the space, along with news on what we and our partners are up to.

We hope our resources, and the knowledge we share will help you with your accessibility and inclusion initiatives, not only in employment but in educational transition and in the lives of people with hidden disabilities, as well as support professionals.

NEW Self-Referral Process for employees and service users

This month we've launched our new Self-Referral process for potential users of Brain in Hand. Whilst the service is specifically directed at individuals who have the need, it is a process designed for:

- Employers who want to offer Brain in Hand to their staff as a vital support tool for stress or mental health needs to increase accessibility, job performance and organizational impact.
- Employment, Educational or Support Service Providers who want to offer Brain in Hand to their clients or those they offer a service to.

Distinctability provides you with an internal registration website and secure application process. Our specialist coaches then assess and setup Brain in Hand with the individuals directly. This way the motivation comes directly from where it is most needed.
