DURABILITY & DESIGN

POLYMER FLAKE is a truly customizable design solution. Our unique approach to color and sizing allows you to economically personalize your floor and enhance everyday spaces.

DISCLAIMER: The colors shown in this catalog may not be exact due to printing process limitations. For absolute color fidelity, colors should always be selected from physical samples. All FLAKE blends pictured in 1/4" size unless marked otherwise.

SIZE
MATTERS

Color isn't the only way to customize
POLYMER FLAKE—FLAKE size can transform
the look of any project. Create subtle and
aggregate-like finishes with smaller sizes or
bold patterns with larger sizes.

---	---	--	--	--	--	--

Variegated FLAKE may vary slightly from lot-to-lot due to the nature of the manufacturing process. To ensure optimal color consistency when using multiple lots, variegated colors should be intermixed prior to use.

FLUORESCENT

*Fluorescent colors are **NOT** UV stable and are only intended for indoor use.

**ENHANCING
EVERYDAY
SPACES™**

Our Process - Barrie Concrete Finishes

At Barrie Concrete Finishes, we believe in quality, transparency, and customization. Our process ensures you get a durable, professional-grade floor that suits your space and style.

1. Initial Consultation & Design Selection

- Site Visit & Assessment: We start by visiting your location to inspect the concrete condition and discuss your needs.
- Design & Color Selection: We bring samples of solid colors, full flake finishes, and other options to help you choose the best look for your space.
- Quoting: Before starting, we provide a quote of costs based on your floor's condition and the selected finish.

2. Surface Preparation

- Cleaning & Degreasing: We remove all dirt, oil, and contaminants to ensure proper adhesion.
- 2 Stage Diamond Grinding: We grind the floor using industrial diamond tooling, creating a perfect surface for epoxy bonding. **During this process we utilize industrial vacuums to keep dust down**
- Concrete Repairs: Any cracks, pits, or imperfections are filled and leveled for a seamless finish.

3. Base Coat Application

- High-Quality 100 % Epoxy Coating: We apply a professional-grade base coat, ensuring strong adhesion and long-lasting durability.

4. Decorative Finishing

- Full Flake System: If you choose a flake finish, we broadcast vinyl flakes across the surface to create a durable, textured look.
- Solid Color Epoxy (Two Coats): For a sleek, scratch-resistant solid color, we apply two coats of epoxy to achieve maximum coverage and durability.

5. Anti-Slip & Topcoat Application

- Anti-Slip Silica Sand: We include an anti-slip additive for improved traction and safety.
- UV-Stable Topcoat: A premium, industrial-strength clear **Polyaspartic** topcoat is applied, protecting the floor from scratches, chemicals, and fading over time.

6. Curing & Final Inspection

- Curing Time: Floors are ready for light foot traffic in 12-24 hours and vehicles in 48-72 hours, depending on the coating used.
- Quality Check & Walkthrough: We conduct a final inspection to ensure a flawless finish and provide maintenance tips to keep your floor looking great for years.
