

HOURLY ADULT SERVICES

We provide young adults (18-35) with disabilities Supportive Home Care, Daily Living Skills, Respite and Transportation services in their home, at The Haase House and in the community. Participants are provided with many opportunities to attain skills that will help them reach their greatest potential, such as: functional academics, health and wellness, community integration and safety, age-appropriate leisure activities, along with volunteering and building social circles. We will continue to explore expanding these services.

CUSTOMIZED PROGRAMMING

Our structure is very different than the typical adult day-program in that we provide daily life-skill programming that is tailored to each individual's goals. We work closely with families, individuals, guardians, school staff, employers and caseworkers to assure we are providing specific, enriching and self-determined activities to make progress toward their life goals and greater independence. In our comfortable, calm and safe home setting, we have many opportunities to readily address social skills and help strengthen their abilities for relationship-building and respectful engagement with others.

COMMUNITY CONNECTION

In addition to services that focus on skill training, we strongly believe that relationship-building and building a sense of community is critical for persons with disabilities. One popular aspect at THH are the "Special Events" offered to any young adult 18+ with a disability at a very low cost. Special events are intended to get our participants together with other in the community to broaden social opportunities, learn to enjoy new activities, and build new, lasting relationships. Our support services also strive to go into the community at least twice a day to shop, eat, or enjoy some sort of local event or activity.

WHAT DOES THE HAASE HOUSE DO FOR YOUNG ADULTS WITH DISABILITIES?

We are dedicated to providing self-determined, goal-directed support services, interventions, and experiences in a comfortable home setting, optimizing the practice of life skills in “real-life” opportunities.

At THH, we function as a “family” within the home setting as we strongly believe this will lead to improved relationships in families or in supported living settings.

Typical and frequent community integration is vital to help individuals grow to be a good neighbor, employee and citizen. Life-long learning for greater independence and personal growth are the main focuses at The Haase House.

"We are truly thankful for the support and guidance we have received from the wonderful staff at The Haase House. Our daughter recently transitioned into independent living, and the services she receives from Mary, Laura and the rest of the staff are such an important part of her success. They provide a safe, caring environment for their clients to learn, grow, and achieve their full potential."
