**Re: Well #3 (PR#81-2019)
Ponderosa Pines Water Company (PWS ID#00106)
Final Approval**

Dear Jeff:

On August 19, 2022, our office received confirmation that the above project was completed according to the plans submitted and conditions set forth in the August 1, 2022 conditional approval letter.

Final approval is issued at this time, and the facility is approved for use. Please note the following sample schedule changes:

- The water system will need to take quarterly radionuclides at the entry point (entry point A that represents water from Well #2 and Well #3). This sample schedule will be set to start in October 2022, so please take samples of radionuclides in 4th quarter 2022. If the results from this round of radionuclides are non-detect, then the water system may be eligible for a reduction in monitoring. This reduction can be discussed with Jeff Freund at Deschutes County Health Department.
- SOC and VOC sampling schedules are set to annual monitoring for entry point A. Since the monitoring for these are due for entry point A by the end of 2022, this schedule will be met with normal sampling this year. An annual sample schedule will also exist for 2023, unless a monitoring reduction is available based on sample results.
- The water system will also need to conduct two 6-month rounds of lead and copper tap sampling at the original (20) sample sites with Well #3 in use. The first 6-month round should take place before December 31, 2022 and the second 6-month

round should take place between January 1 and June 30, 2023.

If you have any questions, please feel free to call me at (971) 201-9794.

Sincerely,

A handwritten signature in black ink, appearing to read 'Carrie Gentry', with a stylized flourish at the end.
