

2024 Chipper Guidelines Ponderosa Pines (PPPOA)

The 2024 free community chipping program is intended to help residents maintain defensible space around structures and along access routes.

How does this work:

Members will **notify us** using the information at the bottom of the page and drop off the material to be chipped in two locations in Ponderosa Pines. The map included marks the two locations.

Things that CANNOT go in the pile:

- Non wood/brush items. Metal items of any kind are particularly dangerous for the crew and machinery!!
- Rocks, dirt, or mud, roots, or stumps (chipper piles cannot have brush that has been dragged along the ground or piled with machinery that makes it full of dirt, mud, pebbles, or rocks, all of which can damage chipper blades).
- Rakings or piles of needles, leaves, or grass

Guidelines

Material in excess of 6" in diameter cannot be chipped. Please do not bag or tie up your vegetation. Piles should be stacked with the cut ends facing the same way.

Arrange the stack this way!

Not this way
