Q2: How many years have you been an active embalmer?

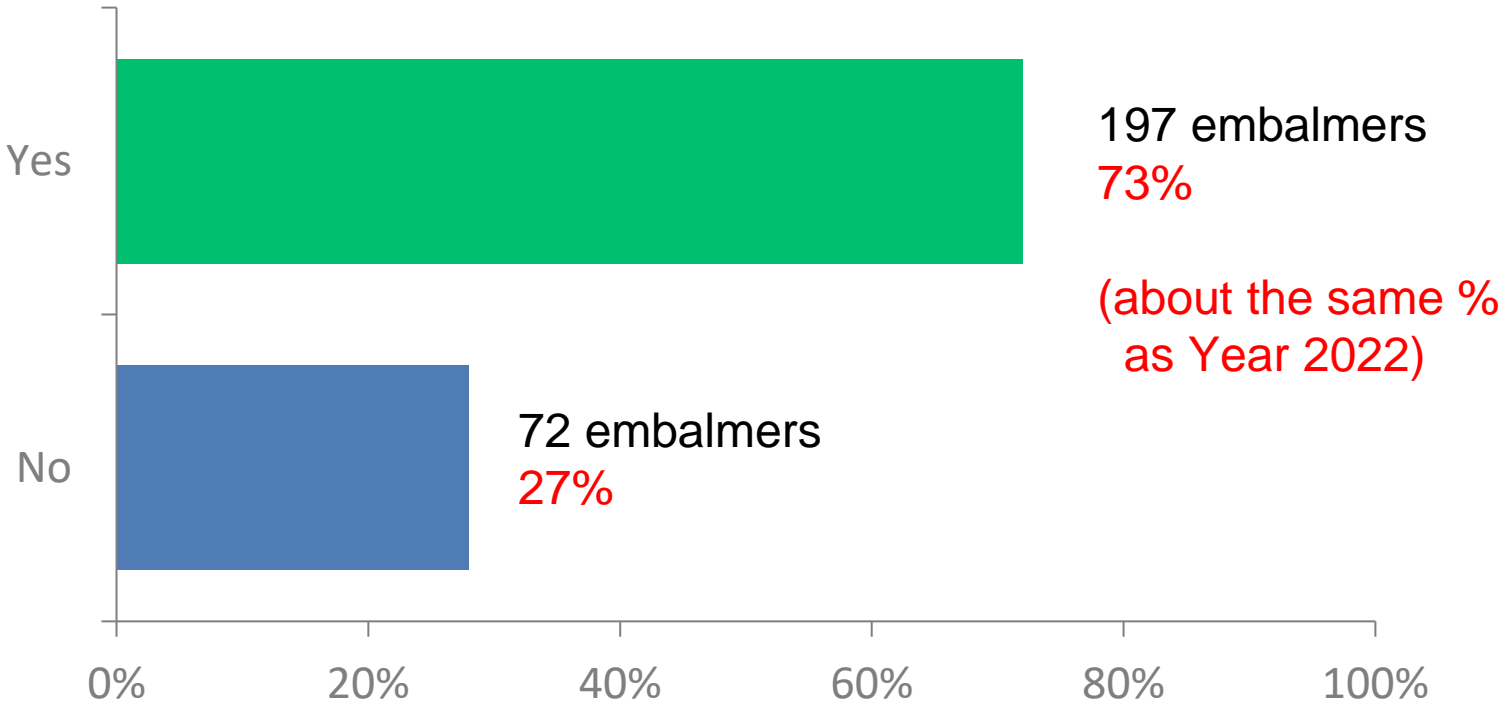

Answered: 269 Skipped: 0

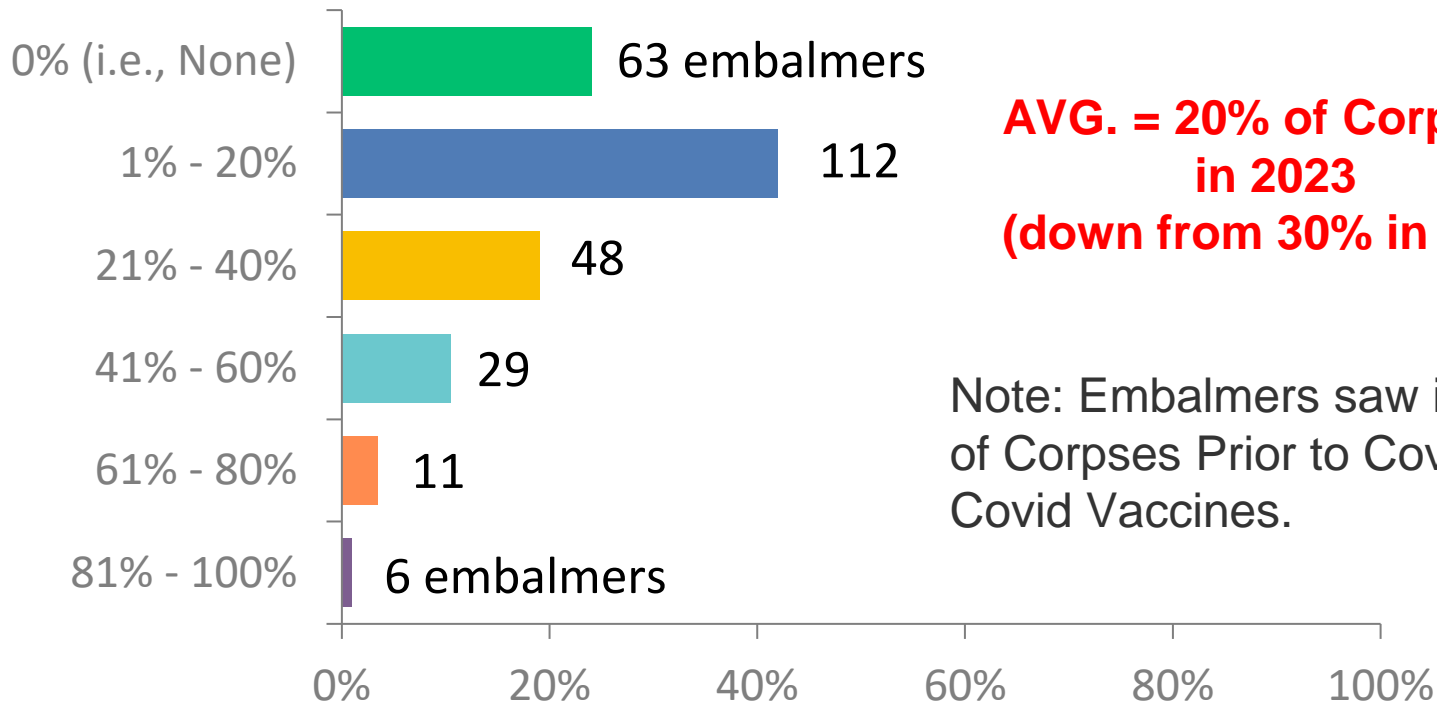

Q3: How many corpses do you personally embalm per year?

Q4: Did you observe any large whitish “fibrous” structures/clots (as seen in photo above) in the corpses that you embalmed in Year 2023?

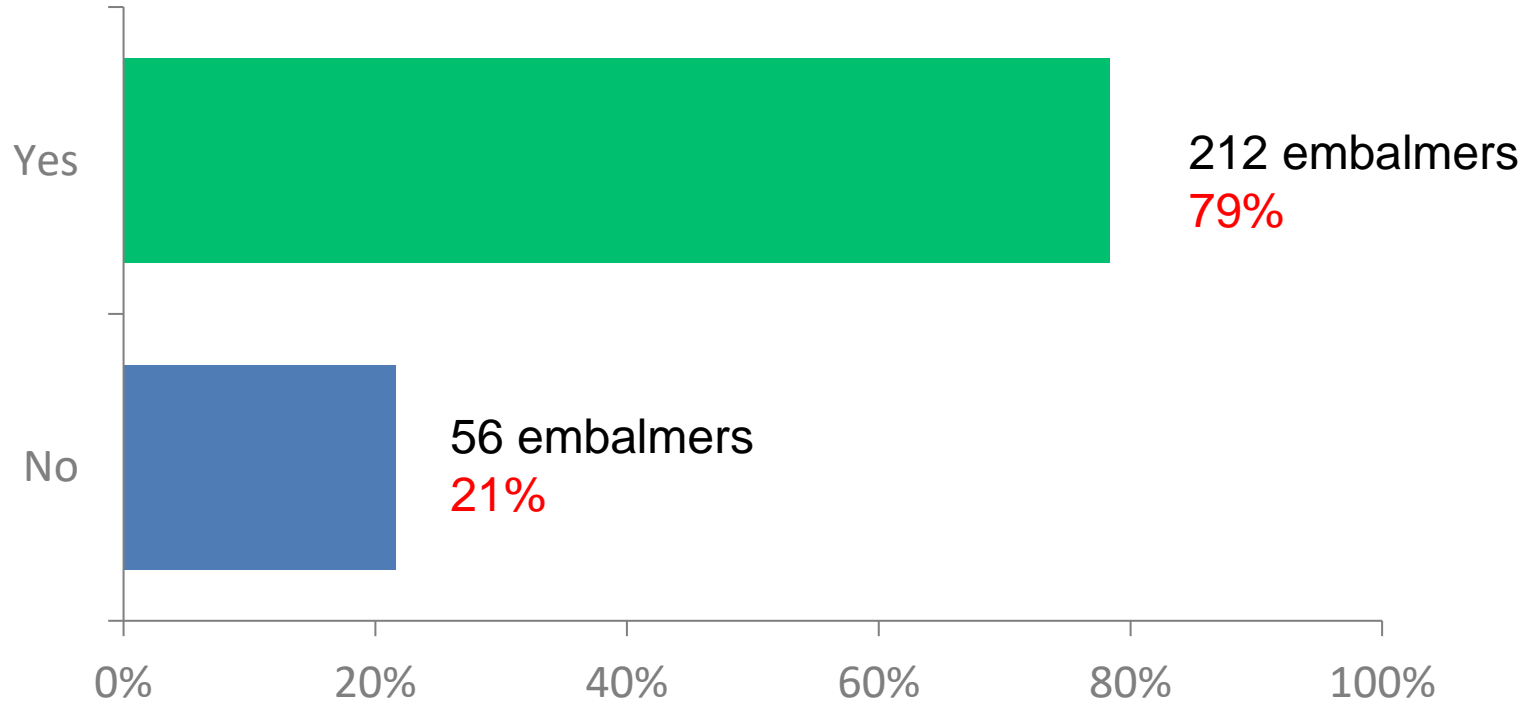

Q5: What percentage of the corpses in the Year 2023 that you have embalmed have had the large whitish "fibrous" structures/clots? (Please select only one answer.)

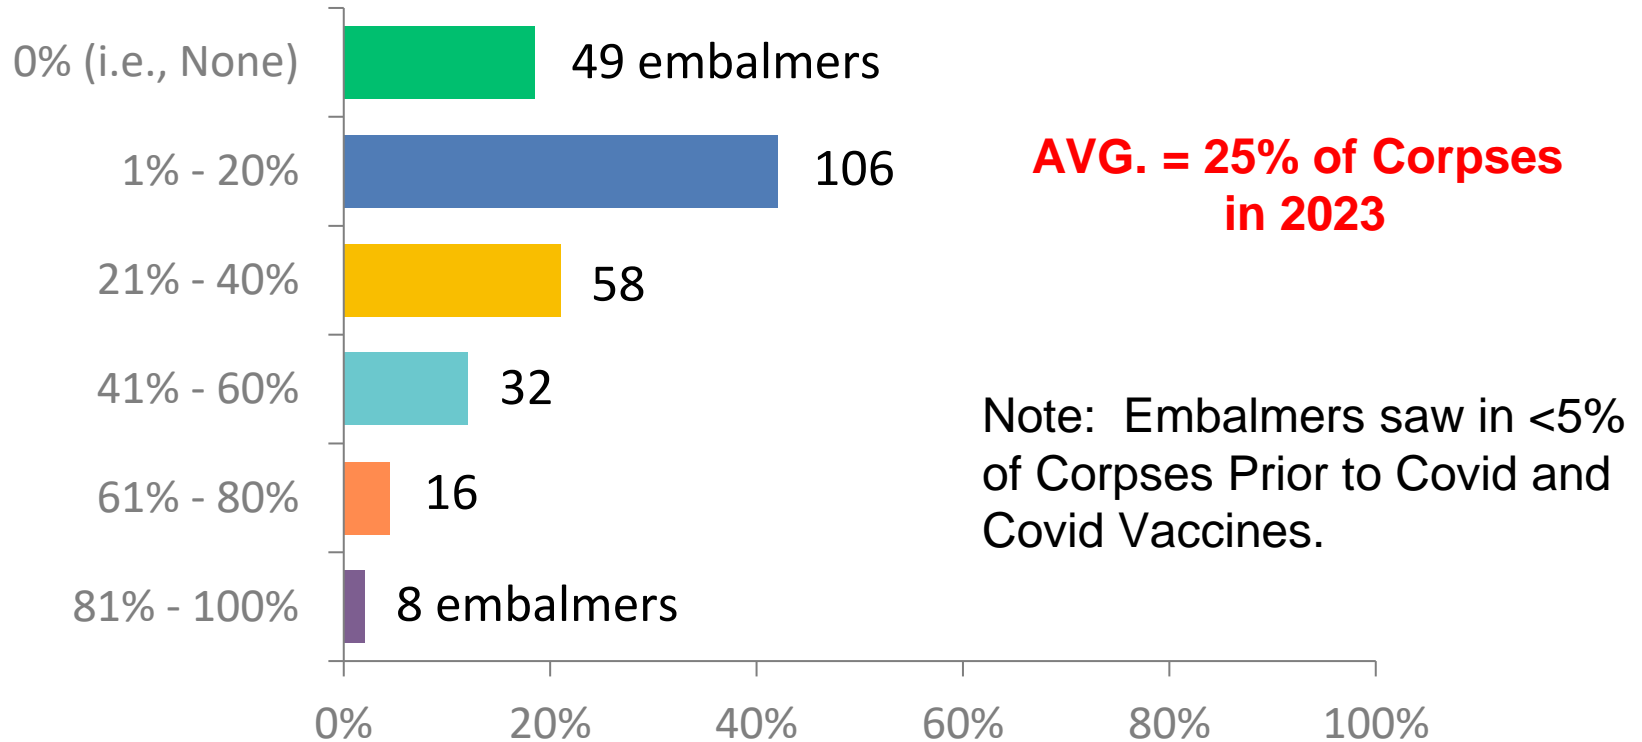

**AVG. = 20% of Corpses
in 2023
(down from 30% in 2022)**

Note: Embalmers saw in 0%
of Corpses Prior to Covid and
Covid Vaccines.

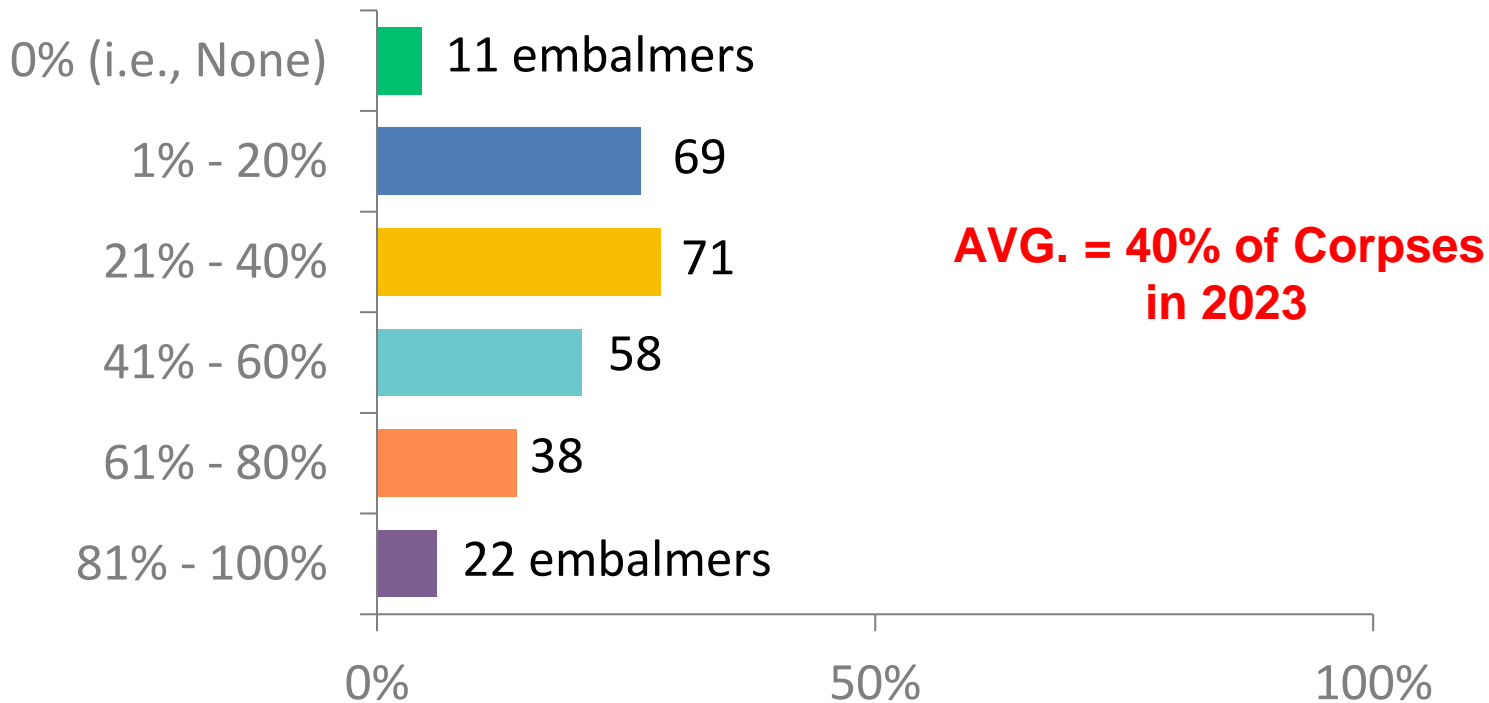

Q6: Did you observe any “micro-clotting” in the corpses that you embalmed in Year 2023, as evidenced by the appearance of “coffee grounds” or “dirty blood” in the drainage?

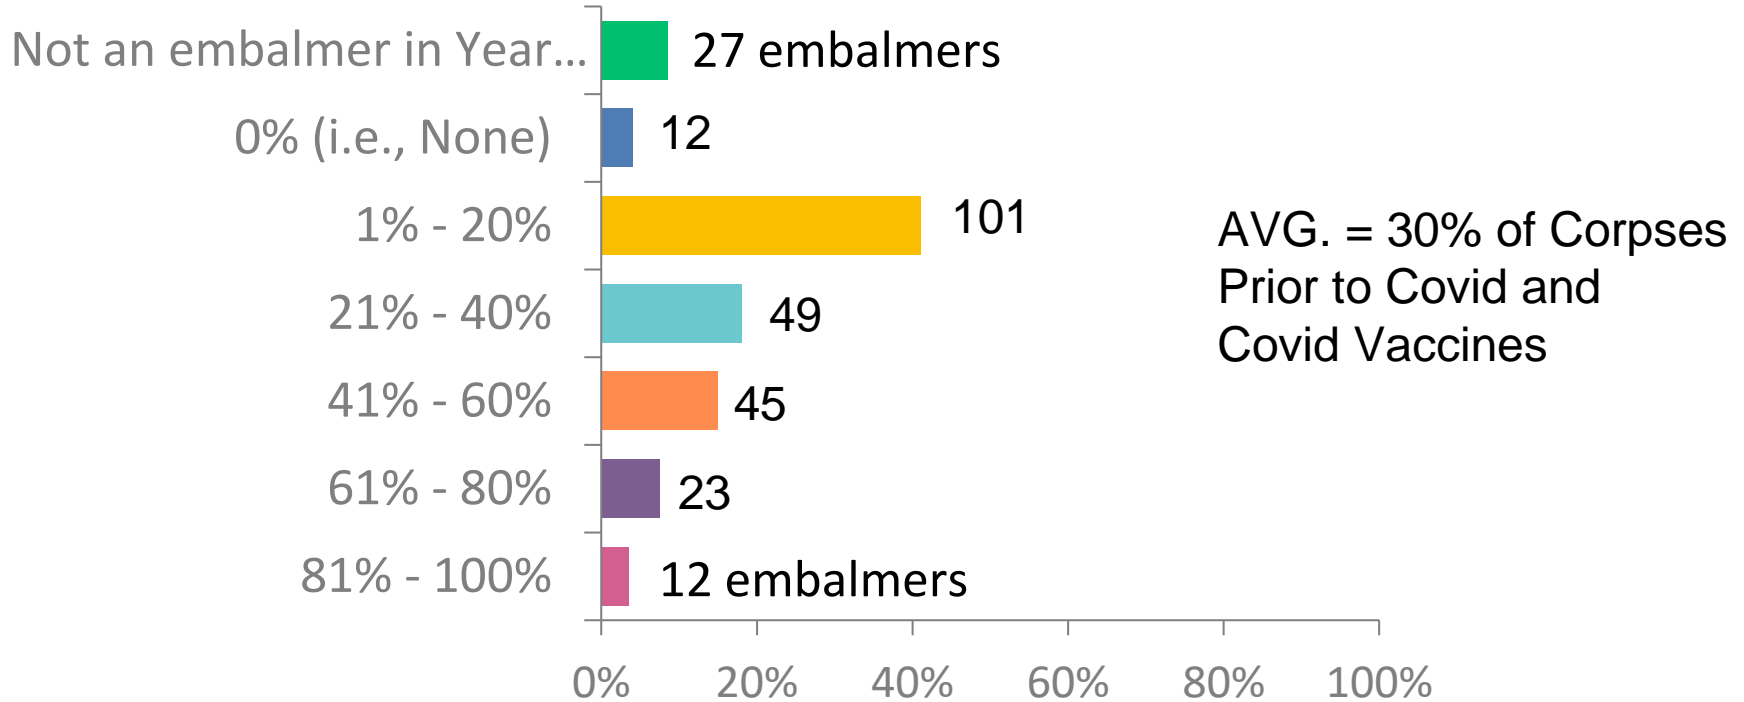

Q7: What percentage of the corpses in Year 2023 that you have embalmed have had the micro-clotting/"coffee grounds"/"dirty blood"?

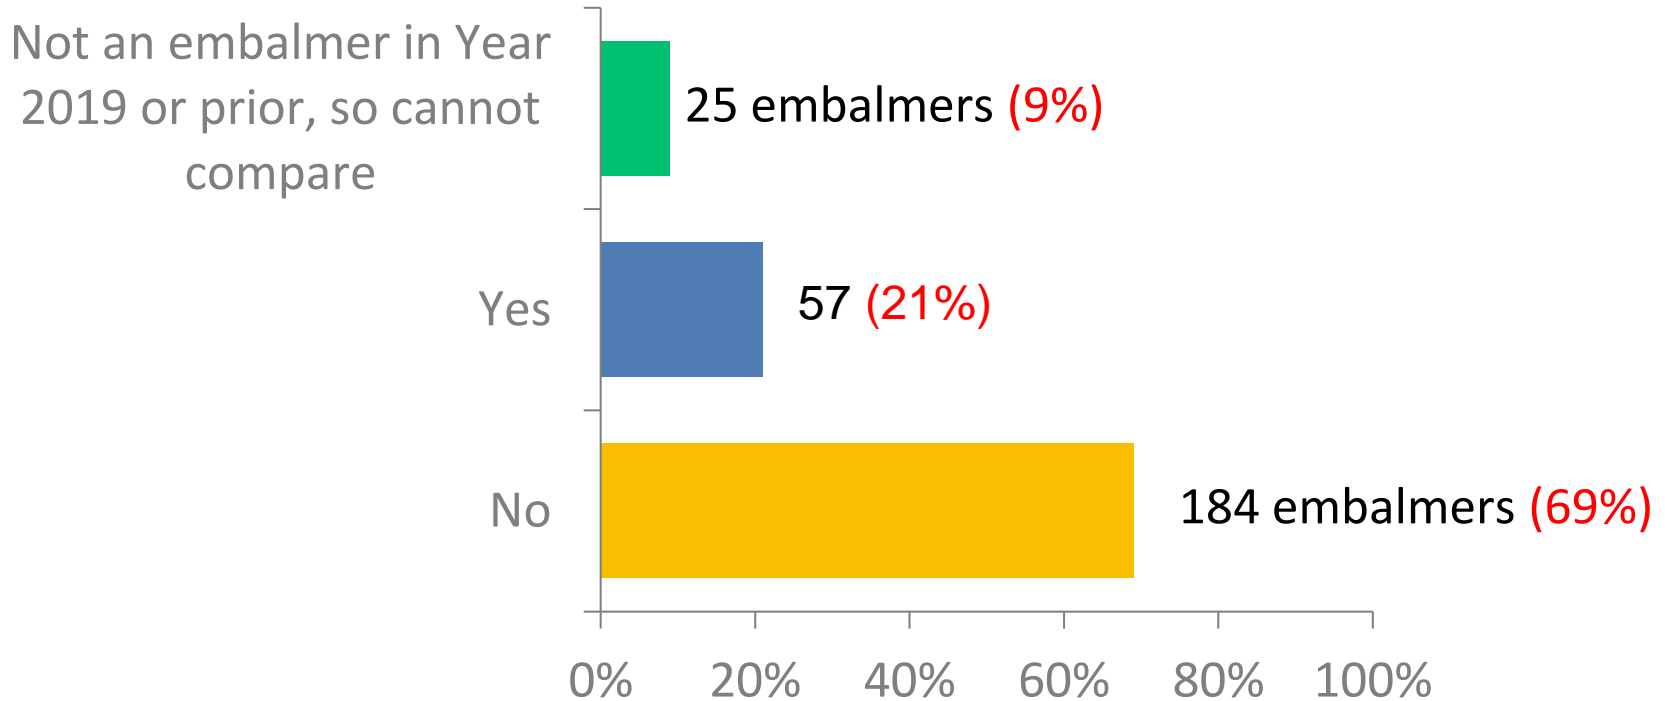

Q8: What percentage of the corpses in Year 2023 that you have embalmed have had traditional “grape jelly” blood clots?

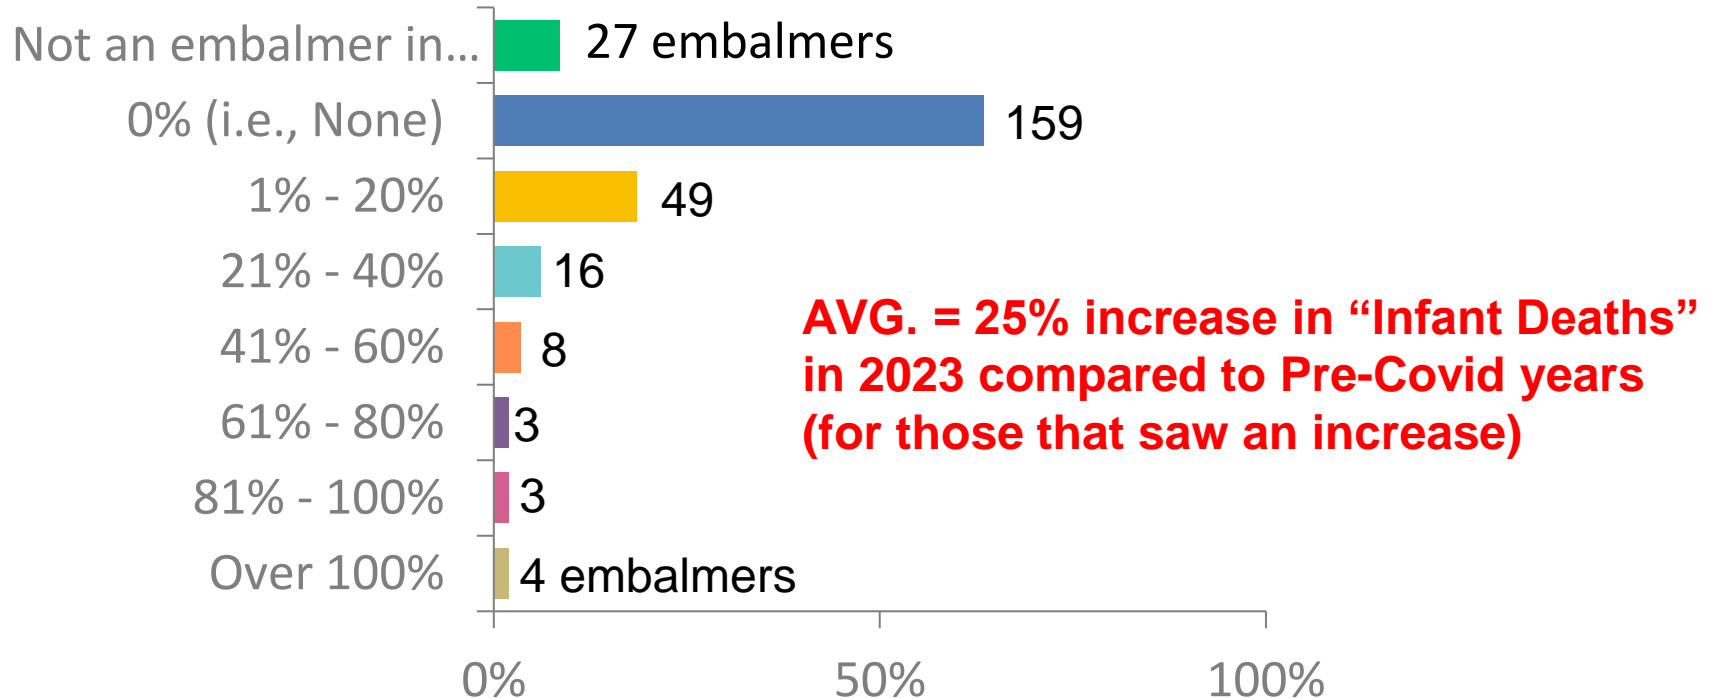

Q9: Prior to and including Year 2019, what percentage of the corpses that you embalmed had traditional “grape jelly” blood clots?

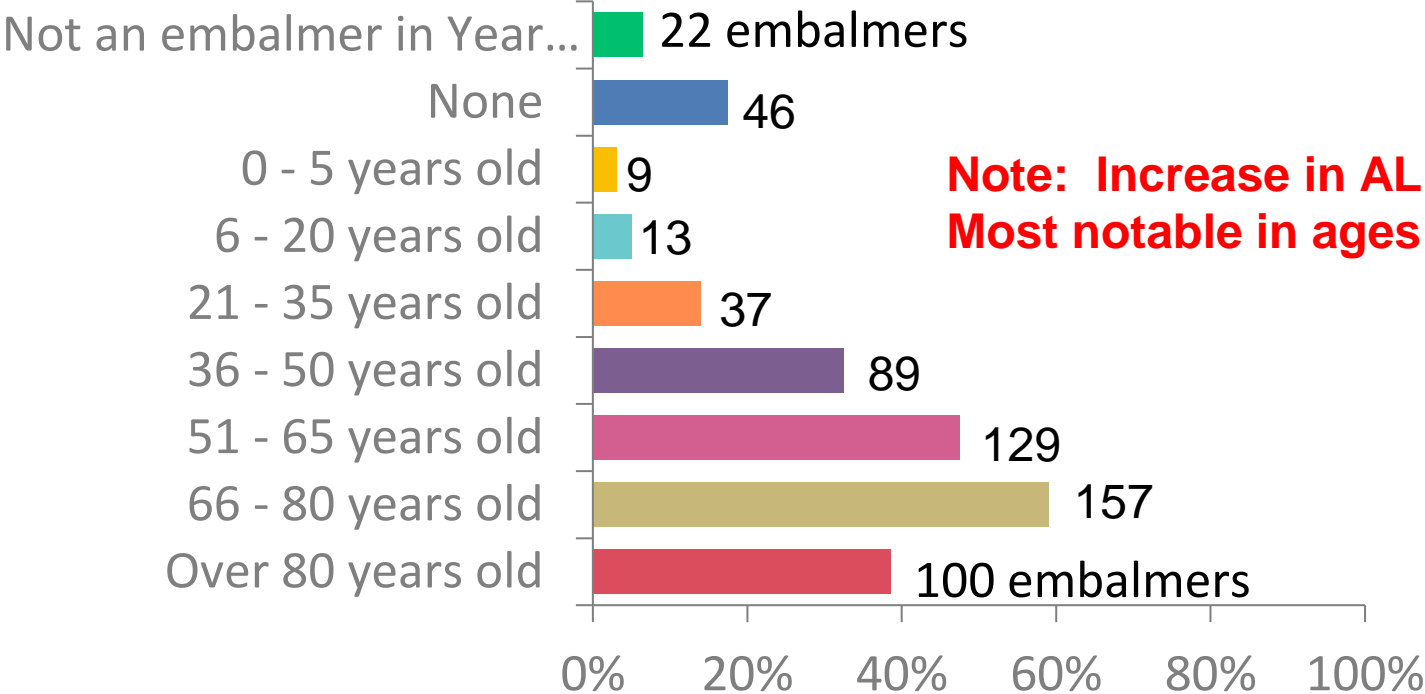

Q10: Did you embalm an increased number of infant deaths (i.e., miscarriages, fetal demises, stillborns, SIDS) in Year 2023 when compared to Years 2019 and prior?

Q11: What was the percent increase in embalmings of infant deaths (i.e., miscarriages, fetal demises, stillborns, SIDS) in Year 2023 when compared to Years 2019 and prior?

Q12: What age groups (CHECK ALL THAT APPLY) did you observe an increase in the number of clots (any type) in Year 2023 when compared to Years 2019 and prior? (Please check ALL age groups that apply. Please select “None” if you have not seen an increase in any age group.)

Note: Increase in ALL age groups. Most notable in ages 36 and up.

CONCLUSIONS

- “White Fibrous Clots” Still an Issue (was 0% Pre-Covid/job)
 - Over 70% still seeing in 2023 in average of 20% of corpses
- “Micro-Clotting” Still an Issue (was <5% Pre-Covid/job)
 - Close to 80% still seeing in 2023 in average of 25% of corpses
- “Grape Jelly” Clots Still an Issue (was 30% Pre-Covid/job)
 - Over 95% seeing in 2023 in average of 40% of corpses
- About 20% of embalmers are seeing an increase in “Infant Deaths” of approx. 25% in 2023 compared to Pre-Covid/job
- Embalmers are seeing an overall increase in clotting (all types) in ALL age groups; most notable in ages 36 and up
- FDA & CDC should investigate immediately, incl. possible link to Covid vaccines
