

Company Statement - Platypus Dental Group

At Platypus Dental Group, we are mindful of the **recent geopolitical developments contributing to fuel supply pressures** within Australia, and the **resulting upward movement in underlying costs throughout our broader economy**.

We recognise that these changes affect not only businesses, but also the everyday lives of our patients and community. In times of uncertainty, our responsibility remains clear: **To provide consistent, high-quality care while maintaining transparency, stability, and a deeper sense of purpose in what we do.**

As previously communicated, **we reaffirm our commitment to maintaining our current pricing structure through to June 2027.** This commitment reflects our long-term approach to patient care; one grounded not only in accessibility and trust, but in **purpose-driven dentistry** that seeks to create meaningful, lasting impact for every individual we serve.

Sustainability remains an important consideration in how we operate; **balancing economic realities with responsible sourcing, efficient resource use, and long-term thinking.** Our aim is not only to navigate present challenges, but to build a practice that continues to serve our team, our community and our environment well into the future.

At every level of our organisation, **patient wellbeing remains at the centre of our decision-making.** We will continue to monitor the evolving economic landscape carefully and act with prudence, integrity, and an unwavering commitment to creating positive impact through dentistry.

Thank you for your continued trust in Platypus Dental.
