RE: Critical information regarding the single largest medical mistake in the history of modern medicine, the COVID VACCINE.

Dear Monica Garcia,

I'm certain you will understand the grave implications of the following sentence. The COVID vaccine theory is based on production of a neutralizing antibody that binds the COVID virus before the virus can infect lung cells. Well, that means the antibody actually has to be present in the lung.

The lung is essentially a balloon that is mostly air and the lung barrier must be able to prevent water molecules from filling our lung, otherwise we drown in our own fluids. Well, this "blood lung barrier" that I did NOT invent, will STOP antibody molecules that are 145,000 Daltons in size. Water molecules are only 18 Daltons in size and this lung barrier can stop the net influx of water molecules into our lung. The antibody molecule is formed in the blood/lymph. Yes, ironically, NOT one scientist on earth has published an active transport model showing how extremely large antibody molecules move across this blood lung barrier. Essentially, there IS NO VIABLE path for the neutralizing antibody that forms in the blood after a COVID vaccine, across the lung barrier into the lung. You get what that means? The COVID vaccine's paradigm is fatally flawed. The single biggest mistake in the history of medicine.

Well, now you've been informed. So, any actions you take based on the COVID vaccine mandate (the COVID vaccine is based on pure science fiction right now) will have to be reversed BECAUSE THE COVID VACCINE'S PARADIGM IS SCIENCE FICTION.

You think I'm spouting "misinformation"? Then, how come a CALIFORNIA MEDICAL BOARD member, Dr. Harold Krauss understands the seriousness of my information and agrees that it should be moved up the medical/leadership chain of command here in California?

You have ACCOUNTABILITY the moment you receive this email.

Think for yourself. Dr. Anthony Fauci represents "science fiction", not SCIENCE. Dr. Fauci was informed of all this over a year ago, and when all this comes to light, HE WILL GO TO PRISON.

I have MANY reputable objective scientists who have reviewed all my information and are astounded at the LACK of rigorous science behind the COVID vaccine.

I have sent Dr. Fauci a 74 page letter detailing every aspect of this. Dr. Fauci will GO TO PRISON. Dr. Fauci is a dumb idiot who is clearly senile and not capable of rational objective thought.

If you have any concerns, clearly I am available to enlighten you. Mayor Garcetti has been informed many times and has responded inadequately. All your actions following this email to you will be subject to review by many scientists in the future. Behave appropriately and do the right thing.

The author of the original FDA COVID vaccine study can't answer any of these questions. The New England Journal of Medicine Chief Editor will lose his job once this all comes to light. There is not a single scientist or physician that has been able to answer these questions, because THERE IS NO ANSWER. The antibody is the ultimate "RED HERRING".

## Introduction

To:

The California Medical Board and Kimberley McReynolds,

This information was sent to the NIH, many CDC directors, many FDA directors.

This is the single largest mistake in the history of modern medicine. Mr. Felderbaum (FDA Media Director) was notified and to be certain that the FDA does the correct thing, I am informing all members of the FDA legal counsel team of this issue also.

There are only two questions that expose the bizarre nature of this medical mistake. Any layman can see the bizarre nature of the poor logic.

1. Do you believe the COVID vaccine "works" because of a neutralizing antibody in the lung alveolus that binds Covid viruses, preventing them from infecting lung alveolar cells?

2. Then, how did this very large 150,000 Dalton COVID IgG antibody cross the blood lung barrier (aka the alveolar wall) into the lung alveolus? This lung alveolar wall can impede the net movement of WATER molecules that are only 18 Daltons in weight, from filling our lung alveoli.

Why would a molecule (the COVID IgG antibody) which is 8000 times larger than a water molecule be able to cross this alveolar wall? There is not a single peer reviewed paper on earth that describes an active transport mechanism that can move IgG antibodies from the capillary (we all agree that IgG antibodies are created in the blood/lymph), across the lung alveolar wall (which can impede the net influx of tiny water molecules), into the lung alveolar sac, where the infections are taking place. lol. yes, you've heard of the "emperor's new clothes"? This is the modern version of that, except a million times worse.

It's incredible. The gargantuan size of the mistake. As an aside, the blood BRAIN barrier typically has a size limit for molecules that can passively diffuse through it of no greater than 500 Daltons. But, do you really believe that the blood LUNG barrier must allow a 150,000 Dalton IgG molecule to simply diffuse across it?

Would the FDA ever approve a medication or vaccine that doesn't have a valid hypothesis? The COVID vaccine has NO hypothesis right now. There is NOT a single peer reviewed publication on earth, that describes an active transport system which can "teleport" very large IgG covid antibodies from the blood THROUGH the blood lung barrier, into the lung alveolus where the lung alveolar epithelial cells are being infected.

LOL. Yeah. Ironic. The "anti-vaxxers" were correct.

I have let the CDC know. They seem incompetent. Let's see if the FDA leaders are actually scientific or just operate under politics and "group think".

This information was sent to many media outlets and many reporters.

The "thalidomide" issue? Compared to this mistake, the thalidomide controversy was duck soup. This is possibly the single biggest mistake the FDA ever made, in it's entire

history.

Let's do the right thing and require the pharmaceutical companies to explain themselves.

The "immunity" to lawsuits is likely only to be valid as long as there is "good faith" in providing the covid vaccine. Once, a serious fatal flaw such as this is disclosed, but the covid vaccine STILL FDA approved in spite of this knowledge of the fatal flaw in the hypothesis, a different legal picture emerges.

If the COVID vaccine has a major flaw in its hypothesis, and the scientific leadership DON'T know how the COVID vaccine works, aren't the ones spreading misinformation Dr. Anthony Fauci and the CDC/FDA?

I am being pro-active with this. I have "enemy" physicians who are trying to "threaten" me and claiming that I am spreading "misinformation" and that my medical license may be revoked.

No, what I am doing is exposing the very inadequate science behind the COVID vaccine.

I would like a zoom meeting with a couple of your board members because we need to bring this to the medical leadership in California. I also want to report Dr. Barbara Ferrer for refusing to acknowledge my emails regarding this, refusing to return my phone calls regarding this most serious of issues.

If in fact the COVID vaccine doesn't have the benefit of the "neutralizing antibody" in the lung, then the R/B of the vaccine looks drastically worse. Then, continuing to mandate the COVID vaccine is "doing harm", contrary to the oath we took as physicians.

Please set up a meeting for me with your board members ASAP. I cannot think of another issue that is more pressing for the California Medical Board, the CDC, and the FDA right now.

On Tuesday, September 21, 2021, 04:19:37 PM PDT, McReynolds, Kimberle@MBC <[kimberle.mcreeynolds@mbc.ca.gov](mailto:kimberle.mcreeynolds@mbc.ca.gov)> wrote:

Dr. Lee,

Please find my responses below to your questions:

Q1. Can I lose my license if my peers file a complaint with the medical Board of California?

A1. The Medical Board of California's mission is consumer protection and one of the ways it accomplishes this mission is through the enforcement of the Medical Practice Act, and other laws,

that pertain to the practice of medicine in California. Publicly spreading false COVID-19 information may be considered unprofessional conduct and could be grounds for disciplinary action. The Board will review complaints it receives about its licensees on this topic, as it does with all complaints. To date, no accusation has been filed against a licensee regarding this issue. The Board is unable to provide further information regarding its complaints and investigations as they are both confidential by law. To see a live list of disciplinary actions/accusations filed against physicians, please visit:<https://www.mbc.ca.gov/Resources/Publications/Alerts.aspx>

Q2. Can I talk with the Board Members?

A2. Yes, email your questions/comments to [Webmaster@mbc.ca.gov](mailto:Webmaster@mbc.ca.gov) and they will be forwarded to all Board Members.

Q3. Can I file a report on the medical leadership?

A3. Yes, please include the information in the email to the webmaster and the information will be forwarded to the Board Members.

Thank you
