RE: 1. Potential exposing Google to the largest class action lawsuit in history/censorship
2. Potentially criminal activity by Pfizer for being informed of the FATAL flaw in the COVID vaccine paradigm, yet continuing to roll out the COVID vaccine to millions of American children.

DATE: November 4, 2021

Please Forward to GOOGLE CHIEF LEGAL COUNSEL, Mrs. Halimah DeLaine Prado, All State Attorney Generals, All Directors of Pfizer, Inc.

Dear. Mrs. Halimah Delaine Prado and all U.S. District Attorneys and Pfizer,

Imagine for a moment that you are "protecting" a fatally flawed COVID Vaccine with your censorship of anti-vaccine YouTube videos.

Okay. Now back to reality. The COVID Vaccine is based on a fatally flawed COVID vaccine paradigm. It is this simple, with only ONE question, I expose the COVID vaccine's fatal flaw. **HOW DID THIS VERY LARGE ANTIBODY CROSS THE LUNG BARRIER INTO THE LUNG ALVEOLUS WHERE THE VIRUS IS INFECTING CELLS?**

See? Now YOU are PROMOTING "anti-science" with your censorship. The lung barrier can prevent the net influx of TINY water molecules from filling our lung alveoli, of which we have 500 million apiece. Sorry, but antibody molecules are 8000 TIMES heavier than water molecules. A water molecule is 18 Daltons in weight. A COVID antibody is approximately 145,000 Daltons in weight. There is NOT a single peer-reviewed publication on earth that describes an active transport model that can MOVE an IgG antibody from the blood (where the COVID antibody is formed), through the lung barrier, INTO the lung alveolus. So guess what? YOU ARE TRYING TO PREVENT THE REAL SCIENCE FROM COMING OUT. WOW. As a lawyer, didn't you always know that free speech was important? Guess what, IF YOU'RE IN THE MOOD TO CENSOR, YOU BETTER BE ABSOLUTELY CERTAIN YOU ARE CORRECT, BECAUSE IF YOU'RE NOT, YOU'RE PROPAGATING MISINFORMATION YOURSELF AND YOU OPEN GOOGLE UP TO POTENTIAL CLASS ACTION LAWSUITS WHICH COULD EVENTUALLY BANKRUPT GOOGLE. At the very minimum, just YOUR career might be ruined for exposing GOOGLE and it's parent ABC to hundreds of thousands of lawsuits. Pfizer's CEO and many directors were already sent this information.... they are taking the bury their head in the sand approach (or who knows, they might be trying to track me down to silence me?).

Ah, see. You didn't have this issue before I presented this information to you. Sorry Mrs. Prado, but you now officially have this information and there are eyes everywhere watching. :)

The very non-scientific Editor in Chief of the New England Journal of Medicine didn't have an answer worth mentioning. Dr. Baden, the author of the first COVID mRNA vaccine paper December 2020, stuck his head in the sand (not what you would expect if he actually had a decent scientific response), Dr. Francis Collins, as a christian with very high morals, should feel especially guilty but I'm sure he's going to pretend he didn't get my dozens of emails from different email accounts. Dr. Anthony Fauci is very possibly desperately looking for an old friend who is a good "cleaner", because this information will probably bankrupt him and take away and whiff of dignity, that he ever had. Many, many academic researchers/doctors/health care affiliated persons are appalled that a mistake this gargantuan in size was perpetuated this long, now to the point of MANDATING FOR CHILDREN, when they hear my very relevant questions and point out the ridiculousness of the COVID vaccine paradigm (yes, this means that the flu vaccine antibody doesn't do anything either). Just pointing out a very interesting related fact here, many of you have children that recently grew up and went to college. Guess what? Their last measles vaccine was about 15 years ago. Amazing isn't it? The measles vaccine didn't need a booster for 15 years, but the COVID vaccine needs a booster every 4 months? You really think the scientists have their shit together? :)

State Attorney Generals, please do the right thing and protect the people in your respective states. The people in your state who are resisting the COVID vaccine mandate HAPPEN TO BE CORRECT. The COVID vaccine is based on a completely fatally flawed paradigm. THERE IS NO VIABLE PATH FOR THE ANTIBODY

WHICH WAS MADE IN THE BLOOD/LYMPH TO PASS THROUGH THE LUNG BARRIER INTO THE LUNG ALVEOLUS WHERE COVID IS INFECTING LUNG CELLS. At the minimum, create a paper trail and ask the COVID vaccine companies to provide their understanding of HOW this extremely large molecule crossed the blood lung barrier into the lung alveolus where COVID is infecting lung alveolar cells. They won't be able to explain it. Any lame attempt, just run it by me. I can destroy their lame attempts at defending this idiocy that is the COVID vaccine. BUT, the COVID neutralizing antibody IS the paradigm under which the COVID vaccine was given FDA approval. Now, the hypothesis underlying the COVID vaccine shouldn't be TOP SECRET, should it?

Mrs. Prado. So, do the right thing. Call OFF THE YOUTUBE CENSORSHIP. This is not a battle you will win. Just imagine the fury of the public when they realize the antibody can't even get into the lung. YOU were trying to keep "anti-vaccine" information out of their hands and THESE PARENTS vaccinated their children and THEY WILL BE PISSED. If you have kids, you know. Anyone trying to hurt your kids, well, take them behind the woodshed and take care of business.

Yes, see, I will also forward this to tons of reporters and cc a few here AND I do believe all the State Attorney Generals will be SHOCKED that the pharmaceutical industry is so sloppy with their vetting. Anyone, does this smell like THERANOS 2.0?

Tech isn't that smart. We aren't fooled. Just do the right thing. No point in trying to kill me (damn it, many people think my life is at risk, so I have to sleep at different places every nite). Many science journalists have my info. They are just waiting for this stupid **CANCEL CULTURE** to die down a bit, so they don't lose their jobs, but killing me won't stop this. Aren't we all here to HELP the human race? I didn't just discover this stupid fatal flaw in the COVID vaccine, I actually discovered the behavioral change that can be adopted by more than 90% of COVID patients which will DRASTICALLY improve their survival chances, and guess what? This damn CANCEL CULTURE won't even allow me to PAY to put an infomercial out in a local newspaper to GET THE DAMN TRUE INFO OUT!!!! SO, STOP THE DAMN CENSORSHIP!!!!

Re: Your recent decision to censor anti-Covid vaccine information, may result in the mother of class action lawsuits against GOOGLE that potentially ENDS GOOGLE.

Dear Mr. Sundar Pichai

Democracy dies in darkness? So, am I allowed to shed some light on this COVID vaccine mandate madness?

There is only one question that shows the idiocy that is the COVID vaccine mandate.

The COVID vaccine results in the formation of a neutralizing antibody in the blood/lymph. The antibody neutralizes the COVID virus in the lung before the virus can infect a lung cell. Well, in the most ***gargantuan mistake*** in the history of modern medicine, guess what? **NOT ONE SCIENTIST checked to see how this very large antibody crosses from the blood, THROUGH the lung barrier, into the lung alveolus.**

This Lung barrier (aka the blood-lung-barrier, google it, millions of hits) can stop the net influx of water molecules into our lung, and still let oxygen and carbon dioxide diffuse across it (Kind of like a gore-tex jacket). But, it can essentially drastically slow down water molecules which are TINY. Antibody molecules (IgG antibody molecules weigh approximately 145,000 DALTONS, 8000 times heavier than a water molecule). This antibody molecule CANNOT cross this lung barrier easily, if at all. There isn't a single peer-reviewed published paper on earth that describes an active transport process that can move these very large COVID antibodies across this lung barrier. THEN, HOW CAN THE VACCINE HELP PREVENT INFECTION??????

You remember Theranos? Well, this is INFINITELY A BIGGER PROBLEM.

I've let the New England Journal of Medicine Chief Editor know. No scientific response. I've let the CDC directors know, left many messages, emailed many directors. I've let the FDA know, including a 30 minute phone chat with the Media Director. He was in shock too. I've let many VP's at Pfizer know. Their reply? The data "indicates" the vaccine works. Don't we have to have a better answer than this, if we are going to sacrifice our children and pregnant women to this sacrilege of science, the COVID stupid vaccine? Now, I've let GOOGLE know. And guess what? If you don't let me keep getting this correct information out to the public, guess what? You fucking moron. YOU'RE PART OF THE MISINFORMATION NOW.

Do you fucking get it? Censorship is for idiots and for North Korea, NOT FOR AMERICA YOU FUCKING MORON. YOU WILL KILL PEOPLE AND THE PUBLIC WILL BE KEPT FROM GETTING MY INFORMATION AND THEY MAY GET THE FUCKING STUPID COVID VACCINE AND SUFFER SEVERE SIDE EFFECTS AND THE PUBLIC WILL HAVE A CASE AGAINST YOU, BECAUSE GUESS WHAT? YOU'VE BEEN DELIVERED THIS FUCKING INFORMATION.

Some of my colleagues thought I might be "spreading MISINFORMATION". Yeah, since when is asking extremely relevant questions that point out the fundamental flaw of a vaccine that is being rolled out throughout the world, when are such pointed relevant questions "misinformation"? Guess what? I called the California Medical Board, and talked to them, sent them a lot of my information. They were SHOCKED. NO TALK OF ME LOSING MY MEDICAL LICENSE.

This is the single biggest medical mistake in the history of medicine. And guess what? Now that you're informed, you're part of the cover up OR part of the solution. At the VERY least, after being informed of all this information, the only SCIENTIFIC next step is to do more research and figure this

shit out. NOT CENSORING ANTI-VACCINE INFORMATION. Or ask me, because although the scientific community doesn't seem to have a clue of why their COVID vaccine works, in spite of the neutralizing antibody NOT being able to get into the lung, I do know. And I have informed Dr. Anthony Fauci. WHO WILL BE PUT IN PRISON WHEN ALL THIS SURFACES.

People, wake the fuck up. Stop with the madness. Stop with the censor-ship. Stop with the vaccine snobbishness. Stop with the Cancel-culture.

Wake up. You aren't woke yet. You are all hypnotized. MASS HYPNOSIS and YOU LET DUMB (FAUCI) AND DUMBER (BIDEN OR BADEN) HYPNOTIZE YOU?????? Think back to 5 years ago. YOU THINK THIS SHIT WOULD HAVE EVER EXISTED?????

Use all the rational training and education that you've had in your fucking life. THIS ISN'T RIGHT AND YOU KNOW IT. Ah, you can't fight it? It's too big? YOU'RE FUCKING GOOGLE.

Well, imagine what the public will think when they realize the fucking scientific/medical/political /technology leadership didn't know what the hell they were doing, yet they wanted to mandate this shit and censor anti-vaccine information.

Wake up. You ARE NOT ON THE SIDE OF SCIENCE. And guess what? You are now on the side of "misinformation" if you don't help stop this madness that is the COVID vaccine with its terribly flawed hypothesis.

Don't use my cussing as an excuse not to rationally assess this. ALL YOU HAVE TO DO IS KEEP AN OPEN MIND. WAKE THE FUCK UP.

Disappointed in the pretend technology. You and I both know, technology? LMAO. Programming written by nerds who know nothing about human nature; humans are flawed and NOT rational and would prefer to belong to a group and engage in group-think. Don't ever think that you're so superior to others. You're not. You've made one of the stupidest decisions in the history of earth. So, you're a scientist? No. Then, what makes you think the science that it out there is set in stone? It's not. So, stop the fucking censoring.

Ah polio you say? What I'm not allowed to "theorize" now? FUCK YOU. Here's a fucking theory for you. Here's what I think happened and why POLIO went away. Yeah, I'm allowed a FUCKING OPINION. My theory. The moment scientists and researchers realized that the mode of transmission for the polio virus was fecal-oral, if you don't know what that means, it means OTHER PEOPLE'S SHIT HAS TO GET IN YOUR MOUTH. Damn, that's fucking hard to do, keep other people's shit out of my mouth. But, damn it, I'm gonna get fucking paralyzed if I can't do it. Gonna take all my willpower to keep other people's shit out of my mouth, but by golly, I'M GONNA DO IT. And then polio went away. Yeah? You believe in science???? Then, there's no way to disprove my fucking theory is there? Who knows how much this theory of keeping my fucking mouth closed and keeping other peoples' shit out of my mouth helped eradicate polio, but it could have been 1% responsible or fucking 99% of the reason polio went away. You see? KEEP A FUCKING OPEN MIND AND STOP WITH THE FUCKING CENSORING.

Ah, you want to talk about measles. I'm not saying I know. I'm just gonna theorize, if you won't kill me for theorizing. Here's a theory for you, on what may have made the incidence of measles DROP over 50 years in the U.S. Dozens of eyeballs spot new red dots on a child's face. The one measure that is extremely well known to science and medicine to prevent viral spread is implemented, ISOLATION of the kid with red dots on his face for a week or so. Ha. Isn't that effective? These

days, teacher's eyeballs don't even have to be used. Just the mom's eyeballs and AMAZING vision that can spot red dots on her child's face before he/she ever gets to school, and it's ISOLATION. So, that's my theory. The fucking Pharmaceutical industry theory? The measles vaccine did it all. Well, sorry fellas. In science, you've gotta fucking disprove MY THEORY. VISION and ISOLATION is a fantastic duo and EXTREMELY EFFECTIVE at preventing viral spread. Could be 1% of the reason why measles declined in the U.S. or it could be 99% of the reason, GET IT?????? The only way we eliminate the very amazingly useful effect of visualization and ISOLATION, is by taking 5000 VACCINE SNOBS and blindfolding them for 5 years straight..... then we can ELIMINATE the very good effect of vision/isolation.... GET IT?????? YOU DON'T HAVE SCIENCE ALL ON YOUR SIDE, WAKE THE FUCK UP.

Re: Critical, a PR nightmare for Pfizer, and possible potential criminal activity by Pfizer, Inc.

Dear Dr. Albert Bourla and to the LA District Attorney's Office,

Your Chief Legal Counsel has no understanding of science and infectious disease/biochemistry/physiology. His less than transparent action in responding to my critical email, informing Pfizer of its critical COVID vaccine paradigm flaw may potentially bankrupt Pfizer and result in tens of thousands of lawsuits, with no veil of "immunity", as I will so carefully explain below.

This is the information that was sent to him. It is this simple. The COVID vaccine results in an antibody in the blood. The theory is that the antibody in the lung

binds virus before it can infect lung cells. In the single biggest mistake in the history of modern medicine, THERE IS NO PATH for the antibody to get into the lung, and NO ONE CHECKED.

The lung barrier (a.k.a. "blood lung barrier", "blood-air barrier", "alveolar wall") can essentially keep out water molecules (18 Daltons) which are tiny. The antibody molecule is 8000 times larger than a water molecule and simple diffusion across this lung barrier is insignificant for molecules in the size range of IgG antibody molecules (145,000 Daltons). There is not a single peer reviewed paper on earth describing an active transport for IgG molecules across this lung barrier, into the lung alveolus, which is where COVID is infecting lung cells. Do you really want to invoke a "teleporter" to explain scientifically how your "neutralizing antibody" made its way into the lung alveolus, where the infections are occurring?

Within a few weeks, this information will be spread worldwide.

Yes, imagine the anger of the public when they realize that the scientists don't even know how the COVID vaccine works and they were mandating it for our children and pregnant women.

Now that you have also been officially notified of the Fatal Flaw in your COVID vaccine paradigm, you must do the right thing and discuss with your top scientists ASAP. They will NOT have an answer. Refer to the 00463500 email from one of your pitiful scientists, formulated in response to my questions/information, under the direction your Chief Counsel (Mr. Douglas Lankler).

If you think you have a scientific response that is viable, your response will only change the very paradigm under which the COVID mRNA vaccine received its FDA approval. Which means, you must still halt the COVID vaccine roll-out.

If you still are unsure, you have access to me. I have vetted every aspect of this. The authors of one of the first published COVID mRNA vaccine papers in the New England Journal of Medicine, Dr. Baden, has been informed of these concerns and he can seem to only bury his head in the sand. The Chief editor of the NEJM, Dr. Eric Rubin, can only present a numbers argument which was easily destroyed by me. The CDC directors are shocked when I explain it to them, and they quietly just HANG UP (squawk squawk). I have a paper trail going back a year to Dr. Anthony Fauci and Dr. Emily Erbelding. Future lawsuits will dig up all my information and I have a mountain of it. Including a 74 page very detailed explanation of why you think your COVID vaccine actually shows good numbers in the research trials.

Just know that whatever "legal immunity" that Pfizer believes it has for this COVID vaccine, the immunity is fraught with uncertainty once this information lands in your lap, showing that the most fundamental aspects of the vaccine are flawed. In fact, I show very carefully how the COVID mRNA vaccine is infinitely

more likely to be a "medicine" than a "vaccine". When you don't even know if your COVID mRNA vaccine is a medicine or a vaccine, and you are made aware that the fundamental paradigm of the COVID vaccine is not just called into question, but shown to be fatally flawed, your accountability for the "COVID vaccine" completely changes and your "immunity" may well be considered to have no legal standing by many experienced plaintiff attorneys and the courts. Just remember thalidomide. Do you think a single court cares whether it was under FDA approval? From the moment physicians realized what a nightmare thalidomide might cause, to the actual time the FDA revoked its approval, during that window of time, the ethical responsibility of the physicians was still to NOT use the medication. This is the window in which Pfizer is currently sitting. Take appropriate action that your children will be proud of later. Not actions that will attempt to sweep this under the rug and later, when the truth surfaces, only evoke expressions of disgust from your own loved ones.

Of course, I don't trust that you'll do the right thing. But your whole future career will also be riding on the course of action you pursue from this moment on. Do the right thing and save your career and save our children, and probably even save Pfizer from complete bankruptcy. Or do the wrong thing, hide this information, save Pfizer a bunch of money, and have your loved ones and your children look at you with disgust. Your choice. It isn't hard.

And it gets worse or better, depends I guess on your particular viewpoint. You are misleading the country and the world. Because in January of 2020, no one in the US had a COVID antibody. Yet, 20 million people were infected with COVID last year and most recovered in a week or so, WITHOUT A COVID ANTIBODY in their whole system. Meaning, the human body has other incredible mechanisms that actually healed us. Once the world knows those mechanisms (which apparently scientists don't feel they have to understand because they've been hypnotized by your neutralizing antibody), we can facilitate that incredible system that DID NOT use antibodies and yet healed all these infected patients. If we can facilitate that system, then guess what? The pandemic is over with just simple behavioral adjustments that can be implemented by almost the whole world, at a fraction of a cost that COVID vaccines cost, and we can resume our lives. Oh, you don't know these mechanisms? Clearly you don't know. Otherwise, you would have told the world. I tried to even pay my own private money and tell the world via an infomercial in the Orange County Register. Cancel culture seems to scare everyone plenty. Well, guess what. The masses are fickle. And "cancel culture" works in reverse. Not that I approve of "mob mentality". I can't emphasize enough how important it is for you to DO THE RIGHT THING. Bio-ethicists? Never can find one when you need one. But, bring up a hypothetical, and they come out of the woodwork like flies to feces.

Regards,

/joseph lee/

RE: Response Package for Your Request 00463500 from Pfizer (ref:_00D3kuHav._500685ezuC:ref) in reference to my email, "Critical Flaw in COVID mRNA Vaccine FDA Trial Research Design"

Date: October 28, 2021

Dear Mrs. Margaret Madden, Mr. Douglas Lankler, Dr. Eric Rubin, Dr. Baden and Dr. Arthur Caplan (a bio-ethicist should be worth his salt),

Just absorb my science, don't pretend that my science isn't good because of my french and my attitude. Because the science here is incredible.

You are afraid to put a name down on this extremely low IQ email from Pfizer to me on October 28, 2021?

I will paraphrase a sentence from your email response to me, Our mRNA works well and our data "indicate(s)" that our antibodies in the blood work against respiratory virus infections. I paraphrase, because you indicate that your stupid one paragraph is copyright owned by you. You're big and dumb enough to try to strap me financially by suing me for infringing your stupid shxxx. So, I guess you can't sue me for quoting one stupid "indicate" word?

I explain to you in excruciatingly careful detail how you do not have a viable PATH into a single lung alveolus for your gigantic neutralizing antibody because the lung barrier is IN

FACT a lung barrier, and you would love to skittle away from the issue by using the word "indicate"? Okay, you're not off the hook. You are even MORE on the hook.

Open your mind, because guess what? **Pfizer has been informed.** Learn how to perform proper research trials. You didn't control for the side effects of your mRNA vaccines, now did you? Why don't you compare your COVID mRNA vaccines against say, hmmm, THE FLU VACCINE, which you also indicate you own in your copyrighted dumb email, so easy enough to do. Can you imagine why? No? Not a real scientist huh? BECAUSE if you don't control for the major side effect of your COVID mRNA vaccine which is activation of the innate immune system and production of cytokines/interferons (which protect against RNA viruses), THEN YOU DON'T KNOW IF YOUR RESULTING "NEUTRALIZING ANTIBODY" IS THE REASON FOR YOUR GOOD NUMBERS!!!!

Get it? "Indicate"? What your good numbers will "indicate", if you do the PROPER CONTROL USING A FLU VACCINE THAT YOU OWN, is that your COVID mRNA vaccine is "working" because of its SIDE EFFECT, the production of interferons which may I not so gently remind you ARE ANTIVIRAL. Interferons ARE antiviral. Research on interferons DON'T "INDICATE" that interferons are antiviral. INTERFERONS ARE ANTIVIRAL. LMAO. Now, the logical conclusion for that, of course, is that you FLU vaccine only works because of ... its side effect, activation of interferon... and let me show you how you do that. You control for the FLU vaccine against the FLU using your COVID mRNA vaccine, which you also happen to OWN. Wow, so you can use each vaccine as a control for the other, which will essentially prove that you're wrong on both counts. Because, your COVID mRNA vaccine will ALSO be effective against the flu for the same interferon reason, which essentially means... I have converted BOTH of your vaccines into short-lived MEDICINES. Fascinating, the way science works.

If you don't have a viable path for your antibody INTO the lung since I took away your phantom paradigm, THEN YOU NEED TO FIGURE OUT WHY YOUR NUMBERS LOOK GOOD. Well, guess what? If your flu vaccine looks like it ALSO works against COVID, then I guess it "indicate(s)" you should use your stockpile of the FLU vaccine for COVID, are you following??? You don't use a dumb word like "indicate" to a scientist like me, you dummy.

Now, you see how easily and quickly and logically I converted your dumb COVID mRNA vaccine into a ummmmmm a MEDICINE??? So guess what? If your COVID mRNA vaccine works because of the interferon it induced, and NOT the "neutralizing antibody", it is NOT a vaccine and now it is officially a... "MEDICATION". YOU ARE HEREBY OFFICIALLY INFORMED THAT YOUR COVID MRNA VACCINE IS A MEDICINE AND NOT A VACCINE. IF YOU DON'T AGREE, YOU NEED TO DO THE RESEARCH TO PROVE ME WRONG, WHICH YOU WON'T BE ABLE TO DO.

Wow. Guess what that does legally. Or what that means you are doing ILLEGALLY. YOU ARE FORCING A NON APPROVED MEDICATION INTO MILLIONS OF CHILDREN ILLEGALLY BECAUSE THE VACCINE MANDATE WAS FOR A VACCINE. YOU WERE GIVEN A VACCINE MANDATE. NOT A MEDICINE MANDATE. hahahahahaha. That should make your LEGAL TEAM WORK OVERTIME AND THEIR CONCLUSION WILL BE, WE NEED TO DO MORE RESEARCH.

Wow. So simple, when one uses the logical part of your brain, and NOT the profit desire part of the brain.

Now, you don't get to run away from your paradigm of a neutralizing antibody. Your CEO in

his open letter even talked about the "neutralizing antibody". Your teams of scientists freaked out when the delta variant arrived BECAUSE your "neutralizing antibody" might not "neutralize" a variant.

Grow a brain and remember that Pfizer no longer receives legal "immunity" because the "immunity" they provide with the mRNA vaccines is based on a FALSE PREMISE and you can't open your dumb mind to see what I logically lay out for you in excruciating detail, it's easier to walk a 5th grader through this shxxxxt.

Do the right thing. Have one of your smarter dumb scientists re-look at this. This doesn't merely just "indicate" that you don't have a brain. Your use of the word "indicate" is proof, not just "indication" that you're not a real scientist.

If you think your use of the word "indicate" still allows Pfizer to Pfxxxxsck up the world's citizens with their Pfxxxxing Stupid "indicate" logic, you are in for a real Pfxxxxxxxcking Pfxxxxck- Pfest of Pfxxxxing Pfizer lawsuits.

Pfizer has been officially notified and this lame paragraph that I didn't copy in this email does not extend your Pfxxxxing "immunity" from lawsuits.

Do you get it?

You make enough money. Prove to the world that your scientists are more logical than your last paragraph to me shows. Ah, this is in reply to my letter to your legal counsel that you are aPFraid to include in this email.... And don't even think about trying to kill me. Because I've sent my email out to thousands of scientists, law enforcement, etc and if I die in some weird way, all fingers will point to the COVID vaccine companies.

Here is the email I sent your Chief Legal Counsel, and he picked a loser scientist to respond? Can you at least pick a top ten scientist at Pfizer to respond to me? Because the Chief Editor's (NEJM) response to me isn't worth SHXXXT and Dr. Biden went radio-silent (a little less dumb, but about as smart as sticking your head in the sand). LMPFAO. IF YOU DON'T WANT TO SEE PFIZER PFIZZLE, MAYBE YOU SHOULD DO THE ETHICAL THING!!!

Behave in a way that you will confidently be able to look into the eyes of parents of children (and you know there will be side effects) who are harmed by this COVID mRNA vaccine, when the whole world later will know that the COVID vaccine paradigm was based on a "neutralizing antibody" that didn't have a viable path into the lung.

RE: Critical Flaw in COVID mRNA Vaccine FDA Trial Research Design

Dear Mrs. Margaret Madden and Mr. Douglas Lankler,

You are hereby official notified of the critical fundamental flaw in the very nature of how your "neutralizing antibody" works. It is this simple. There is no path for your antibody from its starting point (antibody formed in the blood/lymph) through the lung barrier (a.k.a. the "blood lung barrier" or the "alveolar wall"), to its end point, the lung alveolar sac where lung cells are being infected by COVID.

In regards to the size of this mistake, the "lung barrier" can stop the net influx of water molecules from crossing into the lung alveolus. Water molecules are 18 Daltons in weight. COVID neutralizing IgG antibodies are 145,000 Daltons in weight. There is not a single peer reviewed paper on earth that describes an active transport mechanism which can move very large antibodies across this lung barrier. As a reference point, the blood BRAIN barrier typically only allows molecules that are less than 500 Daltons to diffuse across. The blood LUNG barrier is truly a barrier and at the size of IgG antibodies, much less than 1% will be able to cross this barrier by simple diffusion.

This information was given to the CDC months ago. I notified my contact person at the CDC to also notify the mRNA vaccine companies and their scientists of this information, and for legal purposes, the exact date your company was made aware of this critical information was at the latest October 22, 2021, but possibly three months prior to this date but maybe even a year ago when I first notified Dr. Anthony Fauci and Dr. Emily Erbelding.

Whatever immunity was granted for this COVID vaccine, it is unlikely that the exact same immunity will apply once you have been informed of this gargantuan mistake. As an example, thalidomide was once FDA approved. But, once the pharmaceutical company was aware of the nightmare problems (severe birth defects) then regardless of whether the drug had FDA

approval, any further use of the drug was not only immoral but a potential legal quagmire.

Imagine what the public will think. The medical/scientific/pharmaceutical leadership were made aware that the antibody had no viable path into the lung where the infections were taking place, YET, the leadership did not STOP the COVID vaccine BUT continued to promote it, EVEN to our children. It is a PR nightmare for your company if you don't do the right thing.

No truer words are more apt for this situation than "haste makes waste". Or maybe, "the emperor has no clothes on". Or maybe, "when the shit hits the fan".

There is a reason that we value free speech in this country. You as an attorney know this much better than I do. Censorship has very little place in a democracy, especially when it comes to issues of science and medicine. You aren't always correct when you think you are. Basket of deplorables? All the negative rhetoric towards the unvaccinated? In the history of modern medicine, we were NEVER so callous as we are now with how we treated pregnant women and children. Stop the madness.

Your next step is to talk to your scientists. Do you want to get to the truth? Then use my approach. Have a meeting with three of your top scientists ASAP. Ask them to define how the COVID vaccine works in a few sentences or less. They will use the words "neutralizing antibody". Then, ask them which cells are the most damaged by COVID (the lung alveolar epithelial cells is the answer). Then ask them, is the paradigm of the "neutralizing antibody" the paradigm under which we got the FDA approval in the COVID vaccine FDA clinical trial (yes, is the answer). Then ask them, how did the antibody cross the blood lung barrier? Ask them if they know the size of the neutralizing antibody. Ask them if they know the molecule size limit for the blood BRAIN barrier. And this is how you'll get to the truth.

Smart people don't want to admit they're wrong. They will start spewing jargon in a way that doesn't make rational sense. They will throw in "it's complex". They will spin. They will say "transudation" (which is code for simple diffusion). They will say, "we don't know exactly how it works, but we don't have to know, it works, our numbers are fantastic". But, then they are "giving up" the neutralizing antibody in the lung and if they don't know how their vaccine works and they don't have a theory, I can provide them one and a very good one but then the COVID vaccine is no longer a vaccine. You see? The Covid Vaccine theory shouldn't be TOP SECRET should it? You yourself thought you understood how it worked, did you not? What I have learned in my year long journey in trying to alert the world to this issue is this. Humans are very good at "group think" and very poor at critical analysis. That doesn't mean I don't care about humans. And my life is at risk by doing this, I know. But, I didn't study my brains out during medical school to just suck out cataracts. I didn't study biochemistry and memorize every molecule in the Krebs cycle just to make a 100% on the final. I studied like crazy and scored 97 percentile on my boards because the biological sciences are my religion. I gave up religion for the religion of science and just realized this past year that humans so very much love their comfort zone. Change is hard. But, guess what? In this religion that is science, this particular brand of religion happens to be progressive. So, if you want to be a good scientist, guess what? You better get used to change.

I do expect a reply ASAP. Pfizer has a very good reputation in the medical community. Let's keep it that way. Don't be the person to ruin Pfizer's reputation because they were wrong on this.

Regards,

Joseph Lee, MD

Re: Fatal design mistake of "Efficacy and Safety of the mRNA-1273 SARS-CoV-2 Vaccine" trial.

Dear Dr. Baden and all authors,

Whether the mistake was knowingly made or truly an innocent mistake in your paper, "Efficacy and Safety of the mRNA-1273 SARS-CoV-2 Vaccine", the collective scientific communities' judgment of you (and how the whole world deals with you) will also depend on your response to this email.

It is this simple. Your design measures the safety and efficacy of an mRNA vaccine that results in a "neutralizing IgG antibody" which can bind COVID virus particles BEFORE the virus can infect lung alveolar epithelial cells.

Then, where is your active transport system to move very large 140,000+ Dalton neutralizing antibodies from the blood (where the b-lymphocytes produce the antibodies), THROUGH the blood lung barrier (a.k.a. as the alveolar wall) into the lung alveolar sac where the infections are taking place? There is not a single peer reviewed paper on earth showing an active transport mechanism to effect this transport. How do you imagine this occurred? Please remember, the blood lung barrier is a significant enough barrier to prevent the net influx of extremely small water molecules (18 Daltons in size) into the lung alveoli. You aren't allowed to tell me it occurred via a "teleporter". This is science.

It appears that your experimental design was tragically flawed in that it didn't control for what is well-known to be the major side effect of mRNA vaccines (I'm sure you are familiar with most of the review papers on mRNA vaccines, which all discuss this), the activation of the innate immune system and the generation of cytokines including interferons which are extremely well documented to reduce viral propagation.

Your study is a classic example of how not to design a research trial. Since you did achieve positive results, and since it doesn't require much further analysis to realize that your main paradigm of a "neutralizing antibody" preventing infection by binding to virus particles in the lung will be subject to ridicule since the final pathway of the neutralizing antibody moving through the lung barrier into the lung alveolus doesn't have any scientific basis (where the primary damage to the lung is occurring), isn't it far more likely that your favorable results were due to the MAIN side effect of mRNA vaccines, the fact that your mRNA vaccine "tricked" the human body into producing protective cytokines including interferons (thus the muscle aches and fevers). Your study is looking an awful lot like a "false positive". Your vaccine had two main effects: 1) production of a "neutralizing antibody" and 2) production of cytokines including interferons.

If you had only provided a proper control, the world would not be trying to "mandate" a vaccine that was approved based on a severely flawed research design. You could have added a "flu vaccine" as a control and that would have shed tremendous light on the issue. If in fact it turns out later that the "amazing" effect of your mRNA vaccine was merely from the side effect of the vaccine, then guess what? All the breakthrough cases make complete sense. The papers recently that showed that even a tetanus vaccine being effective against Covid makes sense. And now your "vaccine" is no longer a "vaccine", but a "medicine". The safety and efficacy have to be completely re-evaluated since the R/B ratio completely changes when the benefit is so short-lived. And there is then very little legal precedent for "mandating" a medicine in the field of medicine.

Isn't it appropriate for you to let the publisher know of this gargantuan mistake? Given the gargantuan size of the mistake and the chaos resulting from your study, isn't it only appropriate that you let the press know of this horrific mistake?

If in fact the correct research study is performed and the COVID mRNA vaccine's effect is controlled for correctly by a very useful positive control (the flu vaccine which DOES NOT create a COVID antibody but DOES also activate the innate immune system), then if BOTH arms of the study are effective with the correct positive control, the world will know that the vaccine's effect is merely due to the production of interferon AND that effect will clearly be shown to be short-lived. You see how in science and medicine, a correct understanding of the mechanism whereby we achieve positive results in a research study are critical?

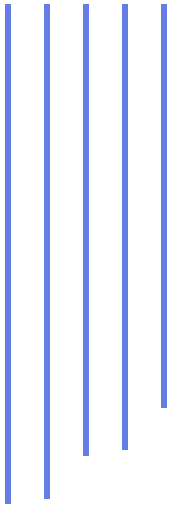

Are we truly scientists? Or are we all too political? Imagine how furious the public will be when they realize the medical and scientific leadership had no idea why the COVID vaccine "worked" and yet with their pro COVID vaccine snobbishness, insisting on even vaccinating our sacred cows, pregnant women and 5-year old children.

Do you have a conscience?

This is your official notification of your flaw. Do the right thing. I expect a reply. You do realize this information will get out. You do realize how the public deals with you later will depend on how you address this issue that I have raised tonight with you.

Very disappointed in scientists,

Joe Lee, MD

p.s. A second email will be sent with all the other authors' emails.
