

Hi,

Thank you very much for your purchase of our indoor and outdoor TVxF Antenna.

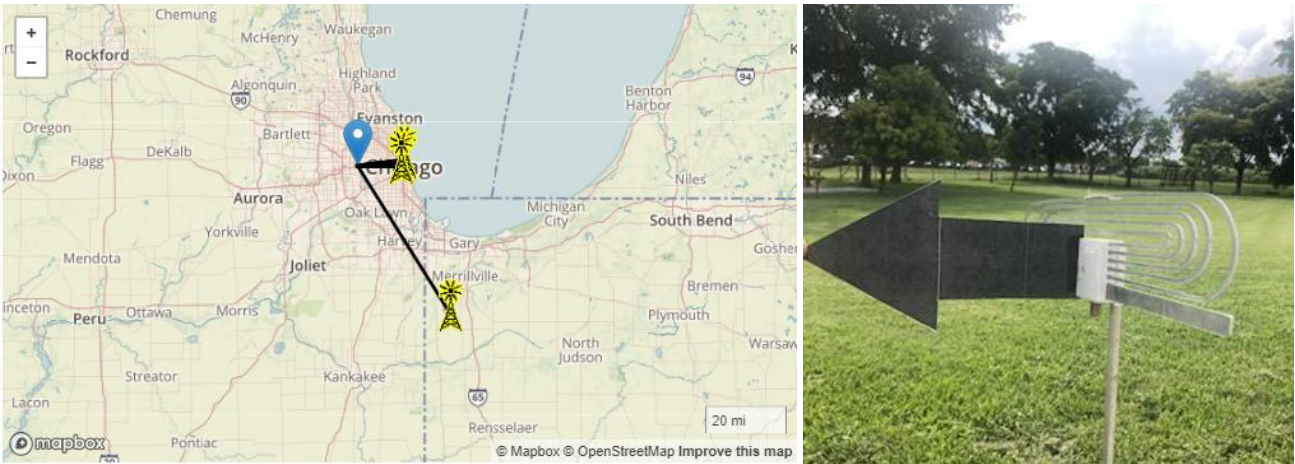

a) The map below is an example which shows the TV stations transmitting Towers. You can visit <https://www.fcc.gov/media/engineering/dtvmaps> or scan the QR code on the right and by entering your zip code learn about the transmitting stations in your area.

b) Please install the antenna front or back with the arrow as shown in the picture; facing approximately in the direction of the towers. We have included an optional read shield, you may want to try with and without the shield indoor or/and outdoor. For best reception, you may wish to use an RG6 coaxial cable (not included).

c) If you have any questions, please feel free to call (800) 755-9782 x 14 or ask for TVxF support M-F 9:00AM-4:00 PM (ET), you may leave a message or send an email info@hurricanetesting.com and we will promptly reply to your questions.

Please write a review, it will help us immensely, Thanks.

Note: We have identified a common error while programming/scanning for TV stations. There is a choice between Cable/Air, please choose Air as shown in the picture below.

Tuning Band has two options, Air or Cable choose Air
After selecting Air, proceed to "Auto Channel Search".

Installing Optional Rear Shield in Mountainous or Multi-Path Interference Areas

Note: This note may not apply in your case, so ignore it at first. Mountains or other reflective surface such as buildings in the background may cause signal cancellation, to overcome this problem, you can use the included optional rear shield as shown below. If you have any problems, please contact us and we will be delighted to help.

The hole in the 5 1/2" x 5 1/2" x 1 1/2" wooden base and the shield for table mount is 7/8" or 22mm.
