

Australian Water Asset Services

At Australian Water Asset Services, we understand that every customer has unique needs and requirements. That's why we offer custom water treatment solutions that are tailored to the specific needs of each customer

Who We Are

Our team comes from service and maintenance backgrounds in the water and wastewater industry with knowledge and skills to support the needs of our customers. We have served customers from industries including mining, food and beverage, leisure and tourism, and infrastructure with a commitment to providing the best possible service.

Our Values

Relationships

We are committed to creating and maintaining long term relationships with our customers, suppliers and stakeholders through reciprocal agreements.

Integrity

We do what we say we will do. The strength of our relationships is backed by our promise to deliver on our word and accept responsibility for our actions.

Leadership

If we have the ability to help others we will. Through coaching, mentoring and leading by example we work with others to reach their true potential.
