

TapeChek VT3100

Evaluates, Cleans, Conditions and Rewinds your U-Matic Videotapes

A SYSTEM DESIGNED TO HELP THE VIDEO PROFESSIONAL TO:

- ✓ Save time and money
- ✓ Protect and extend the life of your videotapes
- ✓ Preserve irreplaceable archival program material
- ✓ Recycle-erase tapes to blank like-new condition, if you choose

The VT3100 system inspects your 3/4" videotapes edge to edge to find physical damage such as wrinkles and creases. It simultaneously cleans the tape surface using specially formulated tissues... uses no chemicals..

TapeChek® VT3100 FOR 3/4" U-MATIC VIDEOTAPES

- **Evaluates...** unique opto-electronic inspection module finds tape damage at high speed
- **Cleans...** specially formulated cleaning tissues gently wipe away dirt, dust, loose oxide and other contaminants that can cause poor picture and sound
- **Conditions...** ultra-precision sapphire polishing system conditions the tape for better performance
- **Simple to Operate...** tapes are cleaned, conditioned and rewind automatically
- **Safe...** proven method used worldwide. Uses no chemicals. Microprocessor electronics control speed and tension for gentle, safe tape handling
- **High Speed...** Works at 30 times standard play speed. Inspects, cleans conditions and rewinds a 60 minute tape in as little as 2 minutes, restoring it to "like-new" condition
- **Heavy Duty...** no flimsy plastic parts. All solid state electronics. Direct drive motors...no belts. All components rated for continuous operation

Television Stations and Other Commercial Tape Users:

Recondition your tapes to like-new quality and reduce your tape budget by half! Automatically inspect your videotapes. Protect your valuable masters. Extend the useful life of your vtr heads.

Videotape Libraries:

Extend the useful life of your videocassettes. Circulate clean tapes, inspect the quality of tapes. Why spend hours tediously viewing tapes to find the damaged ones? TapeChek does it for you quickly and automatically.

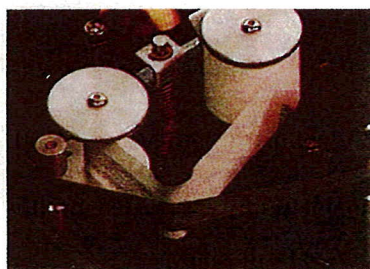

Before TapeChek

Loose oxide, dust and dirt on the tape cause distracting dropouts in both video and audio... and lead to shorter tape life.

After TapeChek

Videotape is cleaned and polished to "like-new" condition. With TapeChek, you can maintain the quality of your tapes for years to come.

TapeChek VT Series Evaluator-Cleaner-Recycler
