

# TapeChek® XCL

## **HIGH SPEED** Professional VHS Videotape Cleaner/Conditioner/Rewinder

**THE PROVEN CLEANING  
AND CONDITIONING  
METHOD NOW BEING  
USED BY OVER 3000  
PROFESSIONAL VIDEO  
LIBRARIES WORLDWIDE!**

### **All Videotapes Get Dirty... When was the last time you professionally cleaned and conditioned yours?**

Each time a videotape is used, it is subject to static-drawn dirt, dust, loose oxide, hair and other contaminants that can make a tape look bad. And these same contaminants can cause costly head clogs and other expensive damage in VCRs.

### **If your tapes are not in top condition, they...**

- ✓ **LOSE VIEWER INTEREST**
- ✓ **HAVE SHORTER LIFE**
- ✓ **LOSE IMPACT**
- ✓ **CAUSE EXPENSIVE DAMAGE  
TO VCRs**
- ✓ **CAUSE VIEWER COMPLAINTS**
- ✓ **ARE MISTAKEN FOR DEFECTIVE**

...and you may needlessly replace them, wasting money that could be spent for new titles.

### **CLEANS AND CONDITIONS**

Specially formulated cleaning tissue gently removes loose dirt, oxide and other debris that cause poor picture and sound. The TapeChek ultra-precision sapphire polishing system conditions the tape for improved performance. And cleaning your videotapes protects VCRs from dirt, oxide buildup and head clogs. Moreover, TapeChek uses no toxic chemicals!

#### **BEFORE TAPECHEK**

Loose oxide, dust and dirt on the tape causes distracting dropouts in both video and audio...and leads to shorter tape life.

#### **AFTER TAPECHEK**

Videotape is cleaned and polished to "like-new" condition. With TapeChek, you can maintain the quality of your tapes for years to come.

### **HIGH-SPEED PERFORMANCE!**

TapeChek-XCL will clean, condition and rewind a T-120 tape in as little as 2 minutes...restoring it to "like-new" condition.

Products for Videotape Care Since 1970...from
