SLIMLINE SERIES

FEDERAL OFFICE WALL

Sustainability in Business

Slimline frame series, our best-selling system, it combines a minimal profile design that maximizes space design. Ideal for open-plan environments, bringing focus and distinction to every opening. Accommodating various door types and sizes, the frame supports different glass thicknesses and comes in a standard black finish. Slimline door framing enhances both functionality and aesthetics.

Workplace Wellness

At Federal, we believe that your office should be a reflection of your business. The Slimline Series door Frames allow more natural light, improving ambiance and audio privacy, appealing to modern design preferences. The use of durable, locally sourced materials ensures quick availability and competitive pricing, adding to its appeal.

FOSTERING CREATIVITY AND ENDLESS POSSIBILITIES

Speed

- Fastest lead times in the Architectural Partition industry with a standard 2-3 week lead time.
- Single trade install - fully trained installation experts produce fast and clean installations so clients can get into or back into their spaces faster!

Flexibility

- Reversible doors and door frames.
- Reuse of materials to reconfigure and accommodate most design layouts.
- Easily integrates with existing and new construction.
- Integrates with less than ideal building conditions such as non-level floors and out-of-plumb columns.

Barrel Hinge

FOW - FEDERAL OFFICE WALL

Affordability

- Options available to provide new partitions at a lower cost than traditional drywall construction.
- Reduced renovation costs and instead reconfigure the glass partitions to accommodate changing business needs.

Performance

- Standard Barrel Hinges have multiple adjustments to control the swing speed and back pressure to ensure proper seal on closing function.
- Ability to accommodate custom hardware and electric strikes.

FOW - FEDERAL OFFICE WALL

Project Initiation

- Tender/Awarding Phase - reviewing scop of work, hold job site meeting and confirm schedules.

Preliminary Set-up

- Review details of specifications, customizations, and schedules. Provide Pricing to the Client followed by shop drawings

Procurement and Fabrication

- Once we have a PO we start by site measuring each opening followed by the mobilization of materials. Finally, the installation begins! (most of our materials are kept in-stock, significantly reducing lead-times.

Monitoring & Controlling

- The project installation is tracked, any necessary adjustments are made. Full site review completed at end of the install to ensure no issues and a smooth hand-off.

Closure

- All project tasks are completed, final site review, deliverables are finalized and the project is formally handed off.
