FOSTERING CREATIVITY AND ENDLESS POSSIBILITIES

Low-Profile Lock

The FOW Low-Profile Lock and Keeper is our most cost effective locking system. We most commonly combine the lock with standard Ladder Pulls to create a minimalistic locking feature, with the durability of long-term security. This lock can be keyed to base building during initial install or as a retrofit later on.

Office Interior

Office Exterior

FOW Low Profile Center Lock 2 3/4" x 5 5/8" has been designed to compliment low profile hardware. The sleek housing features standard thumb turns and keyed cylinders. For locking glass to sidelite, a glass keeper must also be ordered separately.

Flexibility

- Complements the FOW Ladder Pulls and low profile rail systems.
- Features standard thumb turn's and keyed cylinders.
- Non-handed.
- Accommodates Glass thickness in 3/8" or 1/2"
- For use with monolithic tempered glass
- Glass to glass or glass to jamb options
- Finish Options:
 - • Clear and Black Anodized
 - • Stainless Steel
 - • RAL Powder Coating available
