

# PXG 0311 GEN6 FAIRWAYS

PXG 0311 GEN6 Fairways feature an innovative, low-profile with a flat sole and squared face design ideal for golfers of every playing ability. Offering PXG's most versatile fitting technology, these easy to launch fairways provide maximum distance and tight dispersion off the tee or turf coupled with an amazing sound and feel.

## FEATURES

- High-Strength AM355 Body
- High-Speed HT1770 Squared Face
- High-Strength Carbon Fiber Crown
- Supported Weight Structure
- 3-Weight Precision Weighting Technology
- Robotic Polishing
- Adjustable Hosel

## BENEFITS

- Maximum Distance
- High MOI
- Outstanding Forgiveness
- Optimal Spin
- High Trajectory
- Extremely Fast Ball Speeds
- Impeccable Sound and Feel

## PXG 0311 GEN6 FAIRWAYS SPECIFICATIONS

CLUB	LOFT	LIE	LENGTH	HEAD MASS
2	13°	57.5°	43.5"	212g
3	15°	58°	43"	215g
5	18°	58.5°	42.5"	219g
7	21°	59°	42"	224g

## PRECISION WEIGHTING TECHNOLOGY

PXG 0311 GEN6 Fairways present one light (2.5g) and two heavy (10g) sole weights that are interchangeable to support preferred spin and bias settings.

Weights are available in 2.5, 5, 7.5, 10, 12.5, 15, 17.5, and 20 gram options and can also be used to adjust the overall head mass.

*(Dot scheme identifies the weight.)*

### WEIGHT IN TOE

- Fade Bias
- Pulls CG Toe Side
- Anti-Hook Performance

### WEIGHT IN HEEL

- Draw Bias
- Pulls CG Heel Side
- Easier to Square the Face

### WEIGHT BACK

- High MOI
- Added Forgiveness
- High Trajectory Launch Conditions

## SUPPORTED WEIGHT STRUCTURE

Through rigorous modal analysis testing, PXG designed an innovative supported weight structure that delivers unbelievable sound and feel. With Precision Weighting Technology positioned in the extreme perimeter of the clubhead and anchored to the outer wall, a sophisticated stiff and stable structure that generates high frequency vibrations is created. Using modal analysis to study the vibrations, PXG determined that this geometry produces an optimal feel and sound at impact.

## HIGH-STRENGTH CARBON FIBER CROWN

The PXG 0311 GEN6 Fairway crown is made entirely from high-grade carbon fiber. This lightweight material saves mass in the crown, allowing it to be redistributed low and to the perimeter of the clubhead for optimal CG and added forgiveness.

## ROBOTIC POLISHING

Robotic polishing is a high-precision process that ensures the face thickness and the face curvature (the bulge and roll radii) are manufactured to design specs that maximize performance and impart corrective spin for ideal ball flight on off-center shots.

## HIGH-SPEED, SQUARE FACE

PXG 0311 GEN6 Fairways present a HT1770 stainless steel face engineered to position the CG low for high launch, optimal spin performance, and insanely fast ball speeds. The optimized squared face design shifts the perimeter skirt more vertical, increasing the surface area to significantly boost forgiveness of the clubhead.

## HEAD DESIGN

Made from a high-strength AM355 steel the 0311 GEN6 Fairway has a comfortable, low profile head shape. The clubhead body features a squared face and a flat sole design that helps position mass low and to the perimeter, delivering increased forgiveness.
