

Quality Machining & Mfg., Inc.

Capabilities Statement – Commercial & Distributor

Company Overview

Quality Machining & Mfg., Inc. is a U.S.-based, woman-owned precision manufacturing company providing made-to-print machining solutions for OEMs and distributors. We specialize in consistent, high-quality machined components with a strong focus on reliability, capacity planning, and on-time delivery.

Core Capabilities

Precision machining • CNC machining services • Acme screw machine products • Contract manufacturing • Made-to-print components • Tight-tolerance machining • Custom hydraulic fittings

Products Manufactured

Hydraulic fittings and adapters • Import-replacement fittings • Brazed and braze-on fittings • Tube assemblies • Custom machined metal components

Materials Machined

Carbon steel • Stainless steel • Brass • Other materials available upon request

Replace Imports with Domestic Supply

Reduce tariff exposure, freight costs, and supply-chain risk with U.S.-manufactured hydraulic fittings and machined components. We support direct import-replacement programs for distributors and OEM customers.

Production & Capacity

Short-run and high-volume repeat production • Blanket orders and long-term supply agreements • Release-based purchasing programs • Material procurement for pricing stability • Expedited releases available

Quality & Certifications

ISO 9001:2015 Certified • PPAP support • Certificates of Conformance (C of C) • Country of Origin (COO) documentation • Robust inspection and traceability processes

Supplier Diversity WBENC Certified Woman-Owned Business • Proudly manufacturing in the USA
