Colors shown represent the actual color as closely as possible. The purpose of this sales aid is to show the color choices and ranges available. Do not use this color chart as the final selection as colors are affected by age, texture, lighting conditions, heat and application procedures. Color chips may vary in color and finish to the actual product due to jobsite conditions and application methods. To ensure exact color for final approval, selection should be made from a 3" x 5" metal color chip available on request.
