

CONTRACTING AND CONSTRUCTION

SKY EYE offers comprehensive general contracting services for a wide range of construction projects. Our experienced team manages every aspect of the project, from planning and permitting to construction and quality assurance. We ensure that projects are completed on time and within budget, adhering to the highest industry standards.

CONSTRUCTION PROJECT MANAGEMENT:

Our project management experts oversee all phases of construction projects, ensuring seamless coordination among contractors, subcontractors, and suppliers.

We prioritize safety, quality, and efficiency, resulting in successful project outcomes

CIVIL ENGINEERING

Our team of civil engineers offers engineering design and consulting services, ensuring that construction projects are structurally sound, environmentally responsible, and compliant with local regulations.

CONSTRUCTION PROJECT MANAGEMENT

Construction Project Management: Our project management experts oversee all phases of construction projects, ensuring seamless coordination among contractors, subcontractors, and suppliers. We prioritize safety, quality, and efficiency, resulting in successful project outcomes.

HIGH QUALITY MATERIAL

At SKY EYE, our dedication to excellence is evident in every project we undertake and every service we provide. We take pride in our commitment to delivering high-quality work, and it serves as the cornerstone of our reputation and success.

Quality Worker

Our team comprises experienced and skilled professionals who bring their expertise and creativity to every project, ensuring superior outcomes.

Quality Control

Rigorous quality assurance measures are embedded in our workflow to guarantee the highest standards of performance and deliverables.

WHY CHOOSE SKYEYE

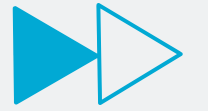

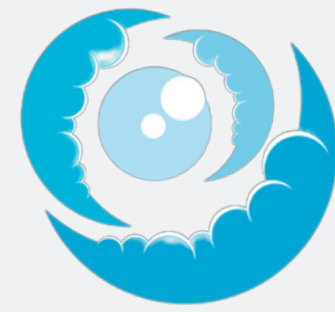

FOR HIGH QUALITY WORK:

- Proven Expertise: We have a history of delivering projects and services that consistently meet or surpass industry standards.
- Client Satisfaction: Our clients' testimonials and repeat business demonstrate their trust in our ability to provide high-quality work.
- Skilled Team: Our team is composed of experts in their respective fields who bring creativity, skill, and dedication to every project.
- Innovation: We are committed to staying ahead of the curve, integrating the latest technologies and best practices to ensure the quality of our work.
- Quality Assurance: Our quality control measures are comprehensive and rigorous, designed to validate our commitment to excellence.

SAFETY FIRST & ENVIRONMENTAL RESPONSIBILITY

SKY EYE places the utmost importance on safety. We have stringent safety protocols in place to protect our employees, subcontractors, and clients during every phase of the construction process. Our safety record is a testament to our commitment to creating secure work environments.

Environmental Responsibility

We are dedicated to sustainable construction practices. SKY EYE actively seeks eco-friendly materials and construction methods to reduce our environmental footprint. We integrate green building principles and energy-efficient solutions into our projects whenever possible.

PROJECTS IN KURDISTAN

KURDISATN NOTARY OFFICE

- RENOVATION OF EXISTING OFFICE SPACES TO MEET CURRENT STANDARDS AND REGULATIONS.
- DESIGN AND CONSTRUCTION OF NEW WAITING ROOMS WITH A FOCUS ON FUNCTIONALITY AND AESTHETICS.

Awards

Client-Oriented

SKYEYE has state-of-the-art infrastructural facilities powered with latest hardware and software.

Our agile infrastructure coupled with VPN and Cloud computing make it perfect for outsourcing.

Mission

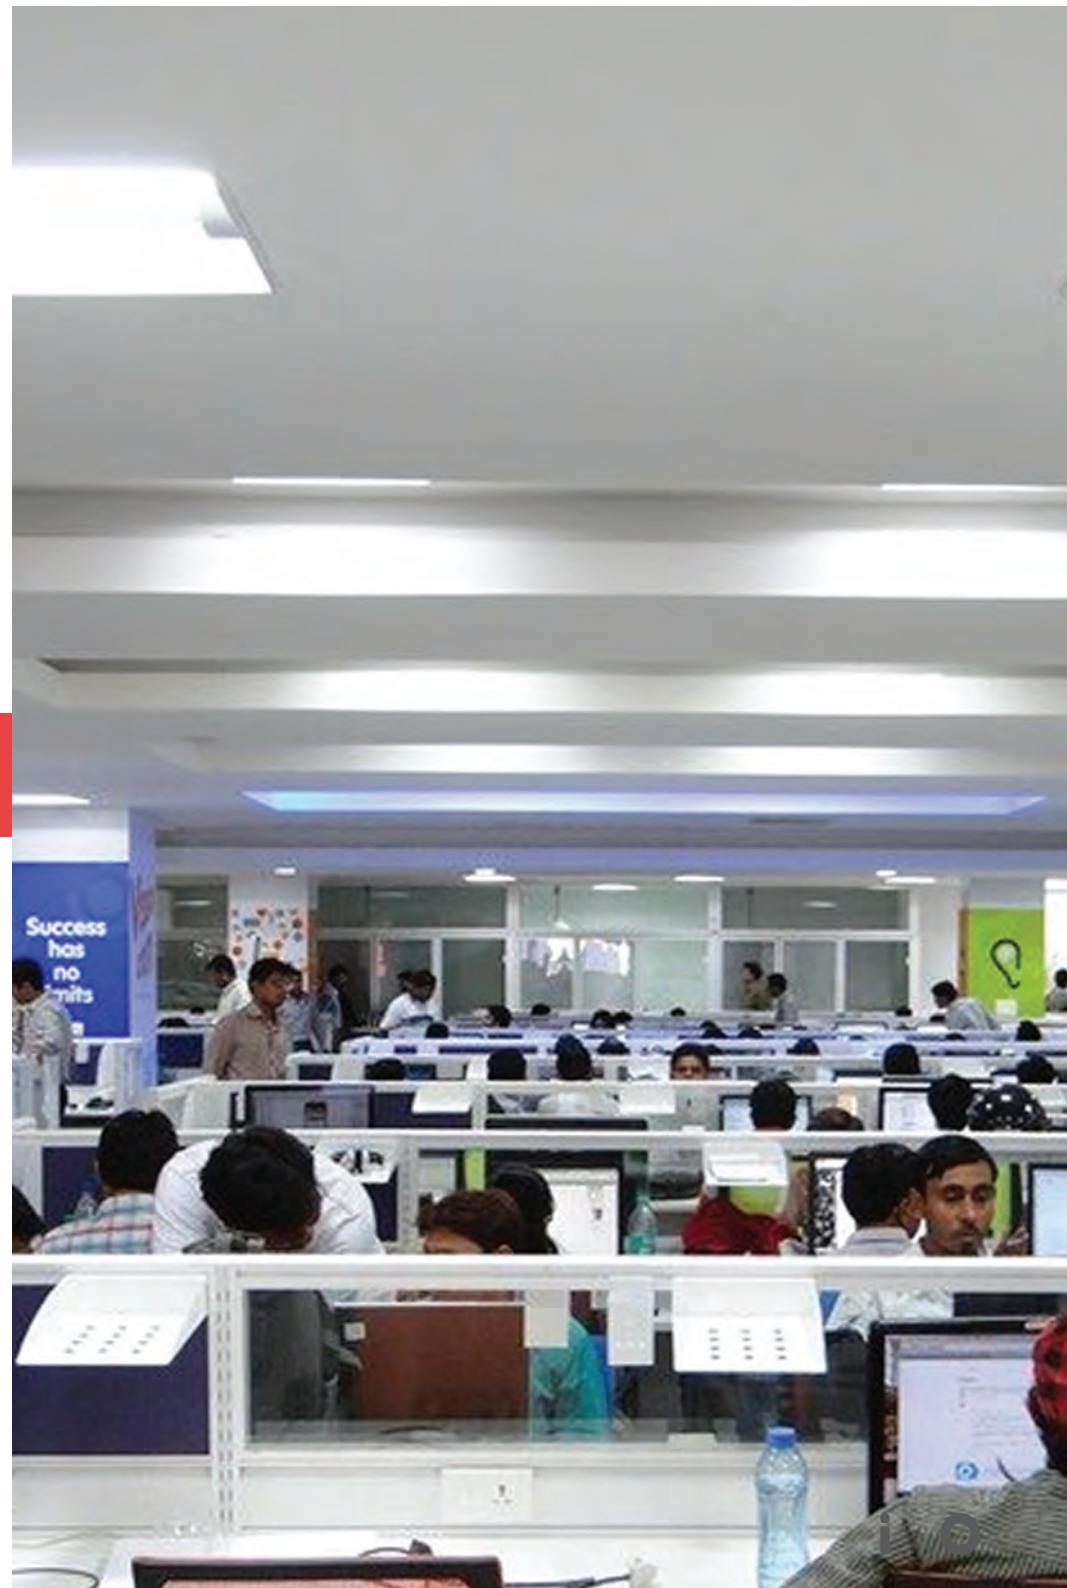

To be the most recognised and trusted software development company.

- Honesty
- Excellence
- Respect
- Learn
- Experience
- Personal Approach

Vision

To be first choice software outsourcing company, to deliver high quality software development services with integrity, honesty and transparency with reasonable margins, while maintaining profitability.

Infrastructure Solutions

The top business performers make the necessary investments to set themselves apart from their competitors. They recognize that their infrastructure requires not only regular upkeep, but also new ways to do things better—as well as more with

less. Our infrastructure outsourcing services help clients reduce costs and gain efficiency, flexibility and scalability. We help jump-start growth and achieve greater responsiveness to always-shifting markets.

Service desk outsourcing

Reduce risk through multi-site support and introduce remote or self-service capabilities to cut help desk costs by 30 percent to 50 percent.

Workplace outsourcing

Provide a more secure, stable environment that can reduce total cost of IT ownership up to 40 percent.

Data center outsourcing

Reduce complexity, improve utilization, mitigate risks associated with staff turnover and reduce data center operating costs by 15 percent to 25 percent.

Network outsourcing

Establish a more secure and robust network infrastructure, minimize network downtime and reduce network operating costs 10 percent to 20 percent.

Managed security

Comprehensive tools including identity management, intrusion and firewall protection and end-user device and messaging security.

IT spending management

Lower hardware and software costs, reduce telecommunications expenses by up to 20 percent and curb exposure to software license audit penalties by up to 80 percent.

Cross-functional Service

A business-led, service-oriented approach to IT management that reduce the need for manual interaction and enable the platform to react on demand to requests.

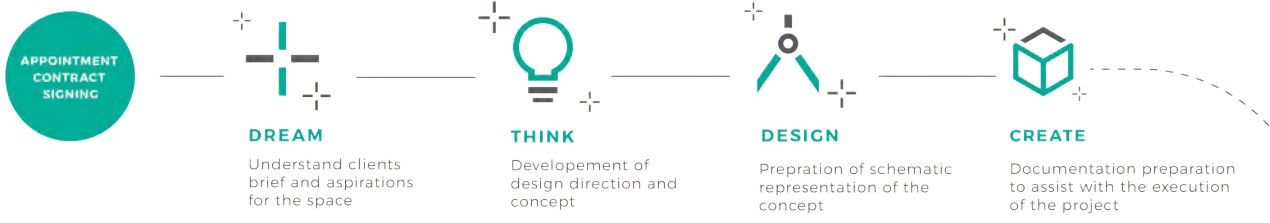

Infrastructure capacity

Highly skilled professionals to bolster capacity or provide specialized capabilities.

Software Dedicated Team (Consultancy & Development)

SKYEYE software development outsourcing engagements start with a basic discovery meeting to completely assess the size and scope of the effort. We don't just think about how to get your software project built, we also plan how the project will be measured, tested, and deployed. We have the ability to do as little

or as much as your team needs – from providing additional software development resources to managing the entire engagement. However we engage with you, we will be part of your team during the entire software development lifecycle – from requirements to maintenance.

Flexible Engagement Models

We wish to satisfy your need of highly flexible engagement models so that you can extract maximum from our talent, culture, and resources.

DEDICATED DEVELOPMENT TEAMS

We offer dedicated development teams for end-to-end coverage of your technology-driven needs. We leave it to you to determine the preferred degree of monitoring and involvement, while ensuring full visibility into the project progress.

PROJECT-BASED ENGAGEMENT

We recommend Project based engagement model for those who come up with well-defined project requirements and deliverables. Employing this engagement model, you'll have your project/s executed by one or more experts from SKYEYE adept in that domain.

CO-DEVELOPMENT

The Co-development model is recommended for extending your in-house development resources for a particular project. Our Co-developers maintain a cooperative and friendly yet professional environment so that we can fit in your work culture easily and deliver fast.

Software and Web System

Product Consulting

SKYEYE carries out complete product consulting while delivering software product engineering services.

REQUIREMENTS ENGINEERING

Our architects analyze possible product use cases and deployment scenarios to spot technically infeasible or expensive features and propose the most suited technology stack. We deliver well-considered system architectures, compatible with various environments.

SOFTWARE PROTOTYPING

We deliver specifications to describe desired functionality and behaviors; wireframes to acquire feedback early in the process; clickable prototypes to quickly test solution elements; proof-of-concept to evaluate and validate solution.

PRODUCT ARCHITECTURE

We assign engineers with domain knowledge to analyze, validate and document all functional and non-functional requirements, data exchange flows and user interface components, prepare product vision and project scope.

MOBILE APP DEVELOPERS

Developers for cross platform mobile application development.

MICROSOFT TECHNOLOGIES

Developers for cross platform web/mobile app development on Microsoft technologies.

PHP & FRAMEWORKS

Programmers for high end web application development with PHP & Frameworks.

CMS DEVELOPERS

CMS is the new and easier way to build web apps. Hire developers for high quality web development.

E-COMMERCE DEVELOPERS

Get dedicated eCommerce development teams for faster, robust and scalable online storefronts.

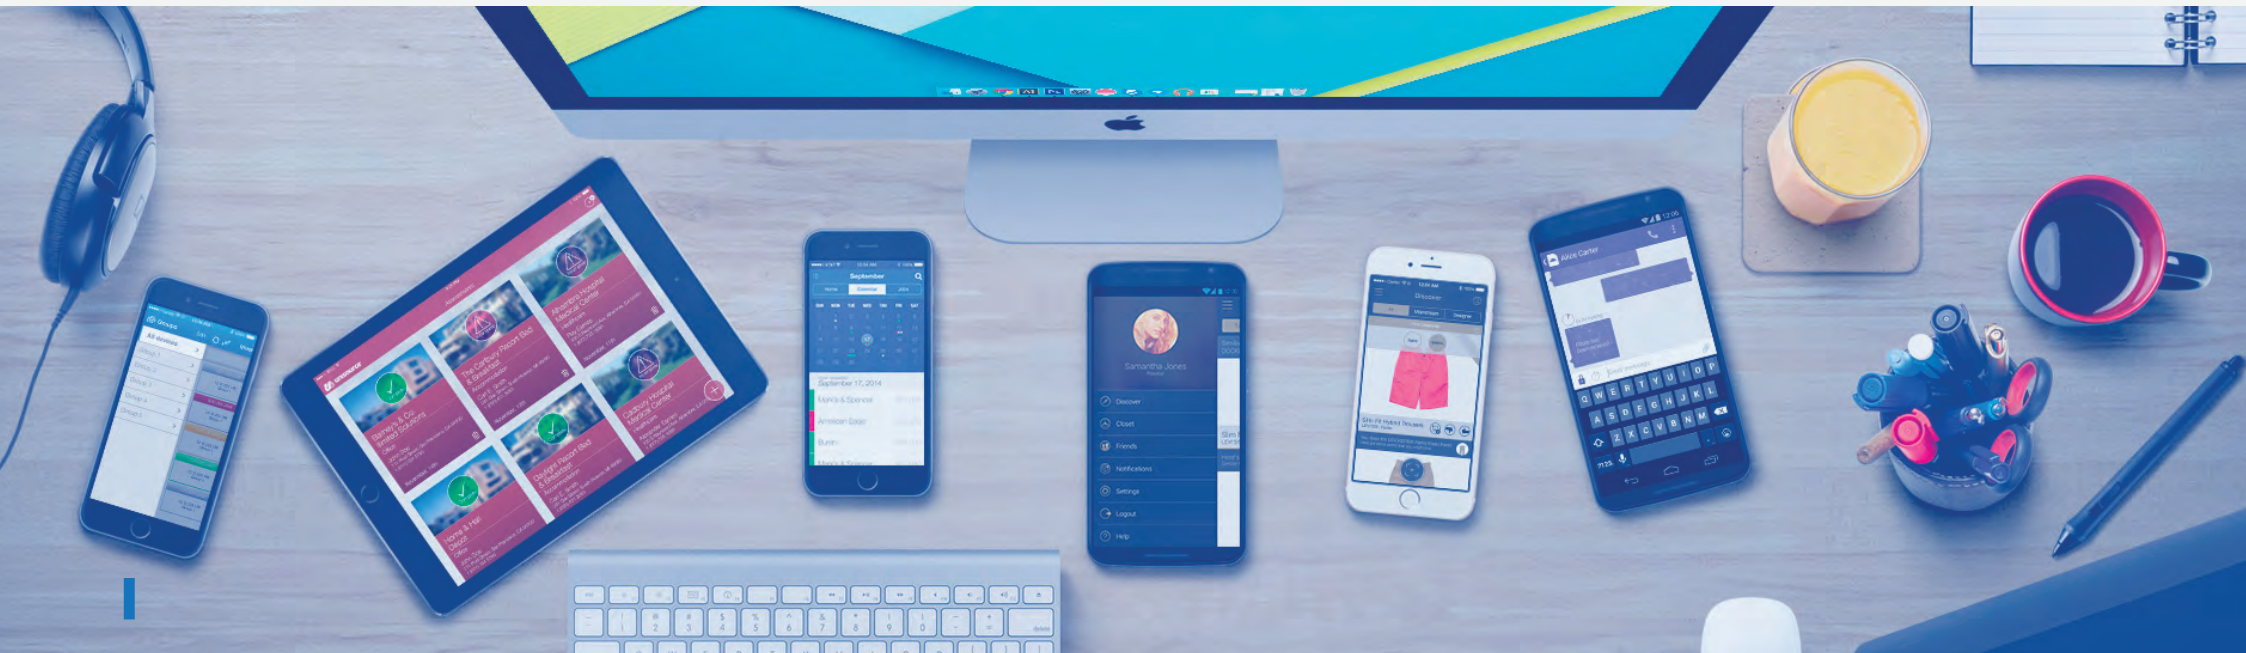

JAVASCRIPT

Developers adept at JavaScript development for all kinds of front-end development projects.

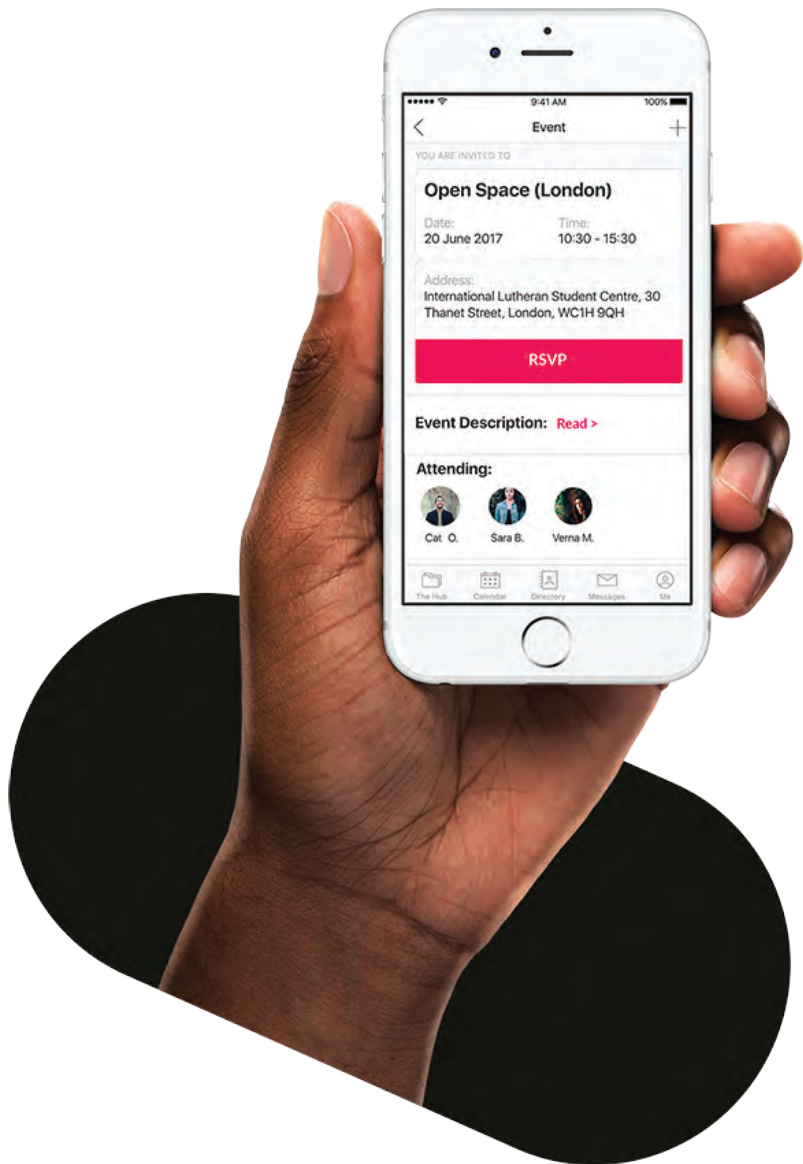

OTHERS

Programmers for all kinds of advanced data management, web & mobile app development projects. Our Software developers help you for end-to-end solutions.

Mobile App Devs

User Experience Design

Reduce risk through multi-site support and introduce remote or self-service capabilities to cut help desk costs by 30 percent to 50 percent.

Scalability & Interoperability

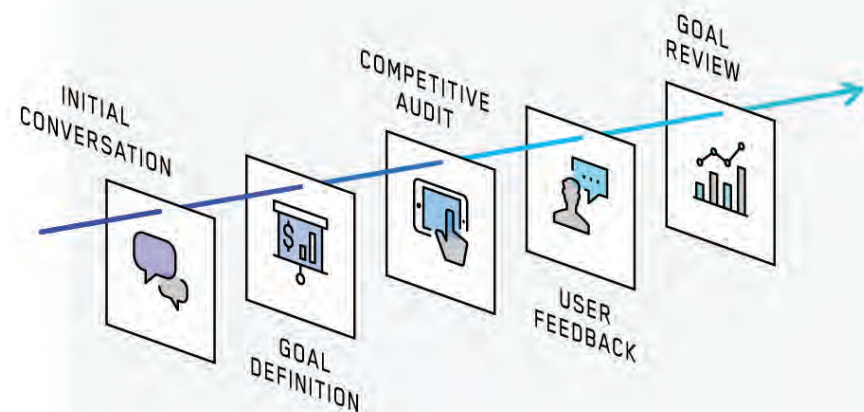

Provide a more secure, stable environment that can reduce total cost of IT ownership up to 40 percent.

Cross-platform Reach

Establish a more secure and robust network infrastructure, minimize network downtime and reduce network operating costs 10 percent to 20 percent.

Security & Compliance

Comprehensive tools including identity management, intrusion and firewall protection and end-user device and messaging security.

Big Data Technology

The information age gives businesses of all kinds access to big data that's growing in volume, variety, velocity & complexity. With more data coming from more sources faster than ever, the question is: what is your big data strategy?

SKYEYE will work to help you bring order to your Big Data. With proven expertise in mature technologies and thought leadership in those that are emerging, our team of senior-level consultants will help you implement the technologies you need to manage and understand your data – allowing you to predict customer demand and make better decisions faster than ever before. Whatever your Big Data challenges are, we'll provide you the strategic guidance you need to succeed.

Your Big Data is growing, and with our help, you can put it to work to grow your bottom line.

NoSQL Databases:

HBase
Hive

Solr
Elasticsearch

Our services include:

Expert MarkLogic Implementations Hadoop solutions designed by Hadoop-certified consultants Big Data Analytics

Cable Detection Sensor

Covert outdoor perimeter security intrusion detection sensor that generates an invisible radar detection field around buried sensor cables. If an intruder disturbs the field, an alarm is declared and the location of the intrusion is determined.

Detection is based on the intruder's electrical conductivity, size and speed. The Probability of detection (Pd) for an upright 35 kg (77 lbs.) intruder, penetrating through the detection field and moving between 50 mm (2 in.) per second to 8 m (26 ft.) per second is greater than 99%, with 95% confidence. Objects weighing less than 10 kg (22 lbs.) are rejected with a statistical confidence level of 95%. Any attempt to tamper with the cables, the processor or its enclosure, causes an alarm.

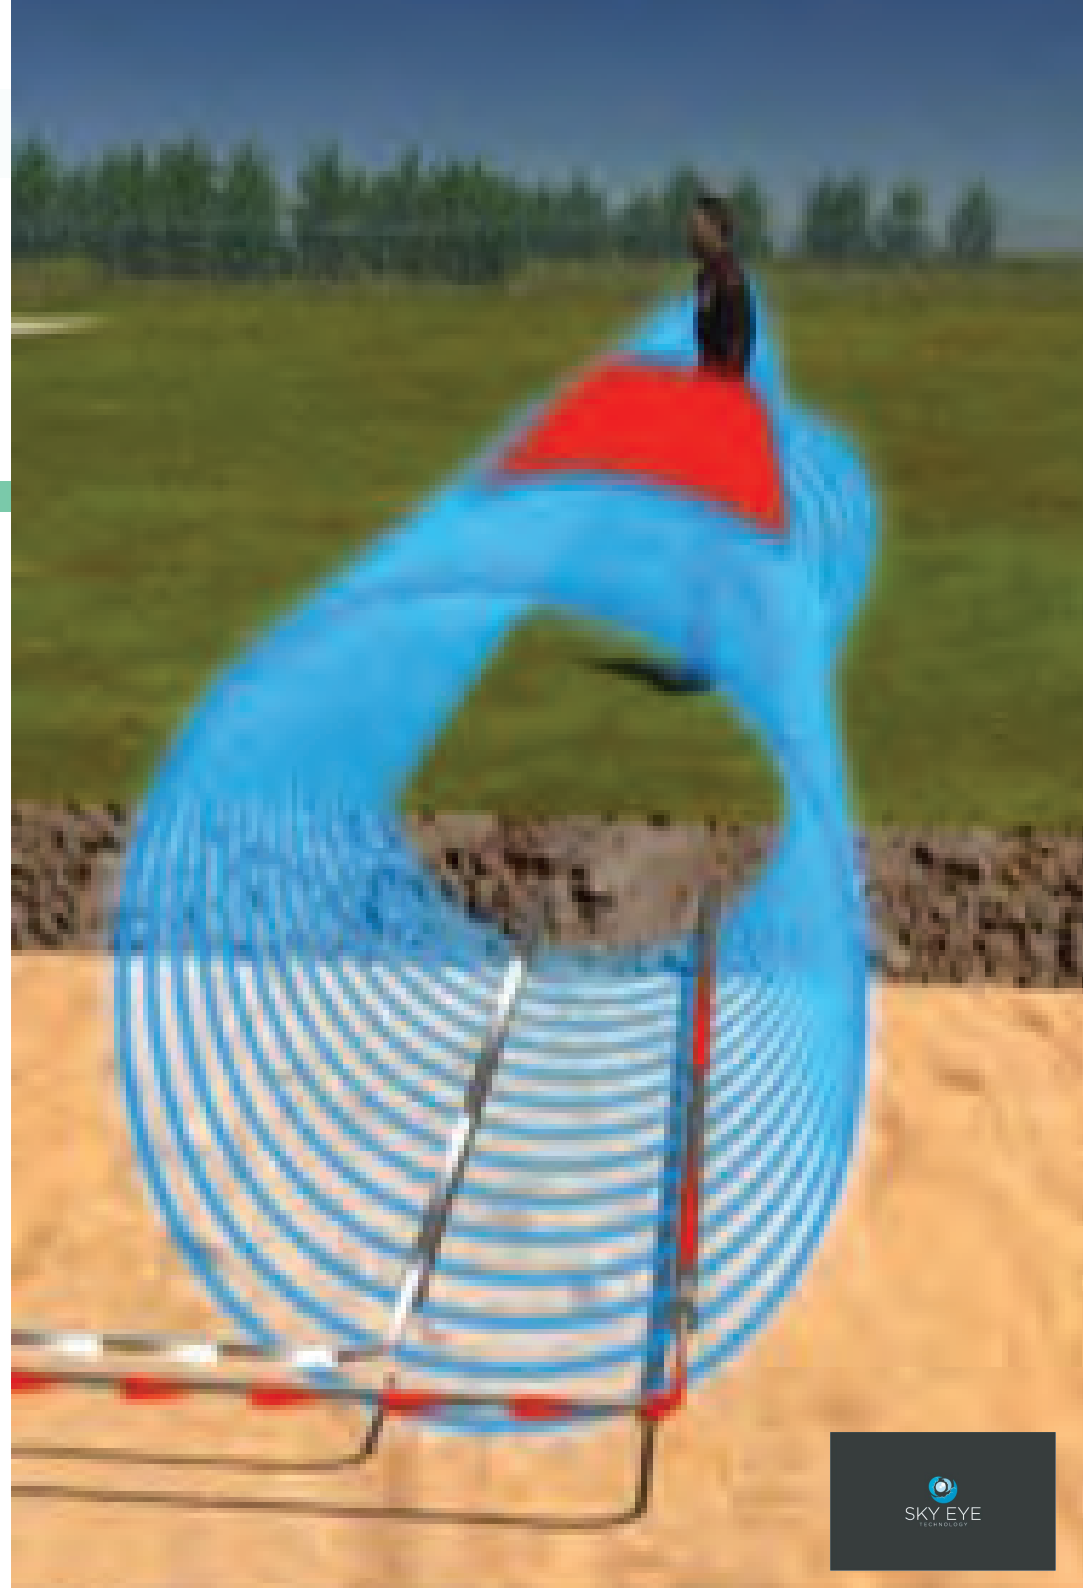

Monitor the detection fields of up to 2 sensor cable sets

Transmit and receive the RF signal without the use of an external antenna

Communicate alarm, status, and configuration information over a data network via an optional communications interface card

Full CCTV

SKYEYE is able to supply and install CCTV systems to meet all government and commercial needs. We can also provide speed cameras and supervision suites for city centers or security sensitive environments such as airports.

- + Meets Your Coverage Desired
- + Hi Resolution Quality
- + Night Vision Feature
- + Recording Capacity
- + Mobile Compatible
- + Wired and Wireless
- + Energy Saving
- + Remote Access
- + Pan, Tilt and Zoom

SKYEYE DOES

Supply and install equipment and software, we also deliver training courses.

We have delivered training to the police force.

Design and Print

Security A range of features appropriate for the varying needs of different issuing authorities, circulating environments, security requirements and denominations: From premium security threads like Active™, Kinetic StarChrome® and Optiks™ through to colour shifting threads and holographic features

which may suit a wider range of denominations .

A strong track record of successfully integrating features into a finished note and making features commercially available to third parties. We are recognised as experts in counterfeit detection and play a key role in training the industry through our acclaimed.

Basic and Advanced Computing

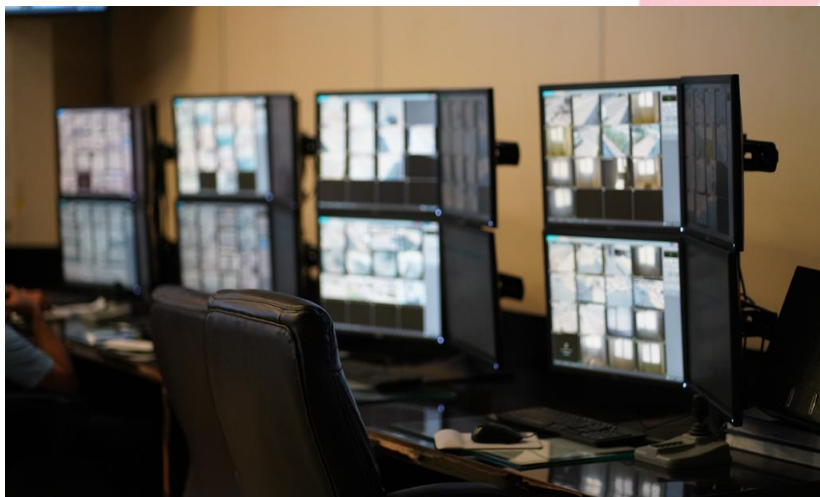

Operation Center and Control Room

When it comes to business agility and optimising your operations, information silos can be one of the biggest obstacles to delivering profitability.

With siloed IT and OT systems, your teams do not have full visibility to the data that drives real-time decisions, and ultimately drives your business. Operational inefficiencies make it difficult to align your processes or collaborate effectively. Eventually leading to frustrated teams and reduced profit margins.

Working side-by-side with leading pioneer companies, SKYEYE has productized best practices into templated, vertical solutions that are repeatable, scalable and adaptable, enabling fast implementation and payback.

SKYEYE can provide the Unified Operations Center which empowers the whole team with a centralized view to help make informed decisions, fast. Bringing end-to-end operational visibility across facilities helps you improve safety, operational efficiency, and ultimately the profit margins of your business.

Network

SKYEYE integrated managed infrastructure for networking can help you simplify network management, reduce costs and improve performance while driving economies of scale. The solution provides customizable, modular and catalog-based network monitoring, management and reporting services to support physical, virtual and software-defined networking.

Reduces complexity

Simplifies the management of network technologies and providers across traditional and software defined.

Enables network agility

Helps improve availability and performance.

Optimizes resources

Optimize resources through ITIL process utilization, robust network management tools, analytics, automation, etc.

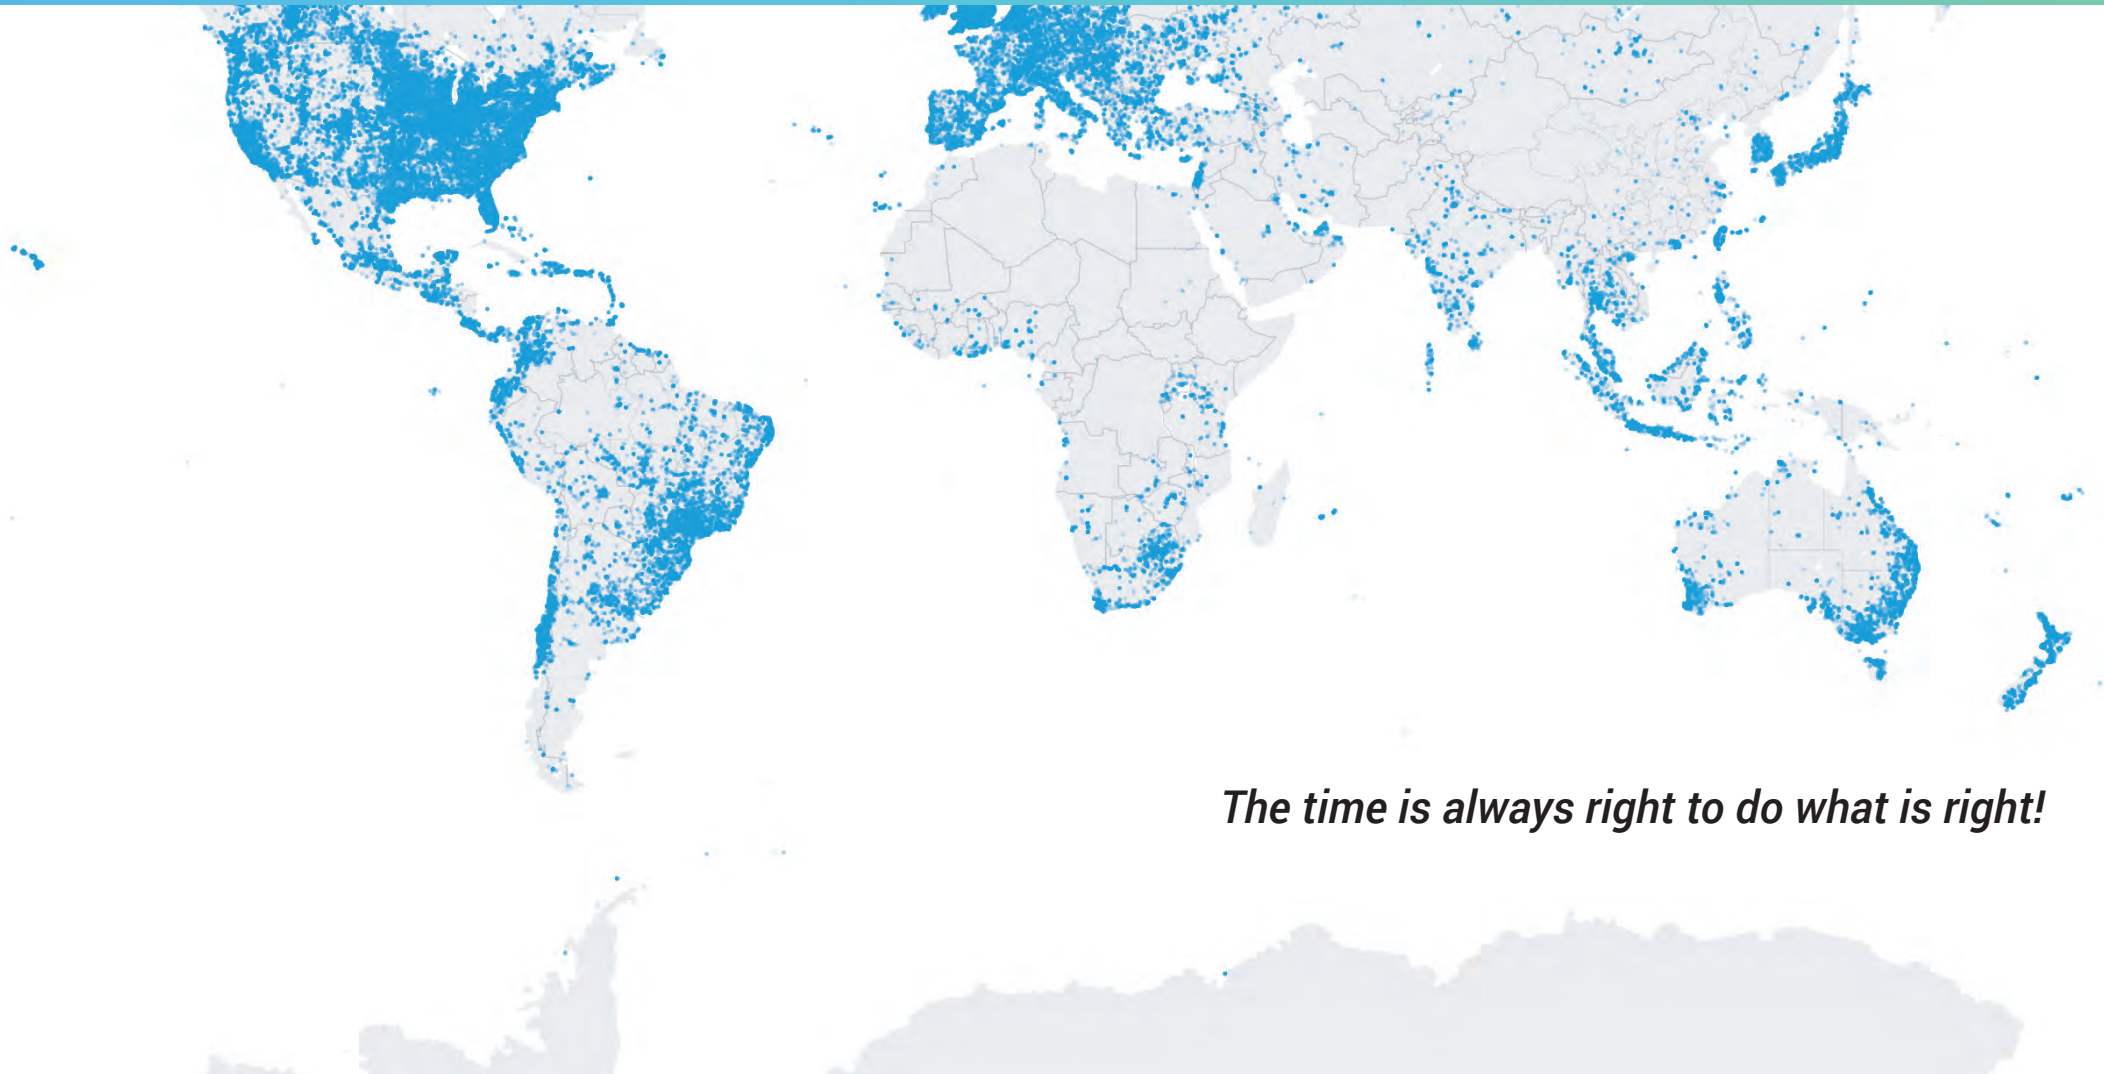

The proliferation of new applications, communications devices and network users makes infrastructure management more challenging than ever before.

Marketing is the most important parts of any business activity. It is what creates customers and generates income, guides the future course of a business and defines whether it will be a success or a failure.

We are one of the most preferred IT outsourcing companies in Kurdistan. We offer a complete bouquet of software development services to help businesses address their key technology challenges, enhance productivity and control costs.

The time is always right to do what is right!
