

Teva Canada Limited | Update (CEA) | March 7, 2025

¹⁷C TEVA-CLOBAZAM 10 mg TABLETS SUPPLY

We are pleased to advise that ¹⁷C TEVA-CLOBAZAM (clobazam) 10 mg Tablets, is again available at Canadian pharmacies following a temporary shortage.

Patients are advised to speak with their local pharmacist, a vital and accessible healthcare resource in the community, to discuss their specific medication requirements.

Teva Canada has accelerated the return to market of this medication, initially anticipated for April 2025, in recognition of its critical importance for epilepsy patients.

We appreciate your efforts to provide this resource to your patients but request that all media inquiries related to Teva Canada be directed to our Public Relations firm, Relevants Inc. by emailing media@relevants.ca.

Teva Canada Limited | Media Statement | January 16, 2025

¹⁷C TEVA-CLOBAZAM 10 mg TABLETS SUPPLY

As an update to the temporary backorder of ¹⁷C TEVA-CLOBAZAM (clobazam) 10 mg Tablets, Teva Canada can confirm that we do not have any remaining stock at our distribution centre in Toronto and wholesalers across Canada are out of inventory. We expect product to be available again in Canada in April 2025 as posted on Health Canada's Drug Shortages website. (<https://www.drugshortagescanada.ca/shortage/229230>)

We would like to remind patients requiring treatment with this medication that there is an alternative brand of 10 mg clobazam tablets available in the Canadian market manufactured by Apotex.

Patients are encouraged to contact their local pharmacist, who plays a crucial role in our healthcare system and serves as an accessible resource for discussing available treatment options. Patients with questions regarding their medication are also advised to speak to their healthcare professional to discuss a treatment regime tailored to their specific health concerns.

Teva Canada's focus remains on expediting the return of ¹⁷C Teva-Clobazam to the market recognizing the importance of this medicine to patients living with epilepsy. As updates become available on the backorder situation, they can be found on the Drug Shortages Canada website or on the Teva Canada website (<https://www.tevacanada.com/en/news-media>).

Teva Canada appreciates your efforts to provide this resource to your patients but requests that all media inquiries related to Teva Canada be directed to our Public Relations firm, Relevants Inc. by emailing media@relevants.ca.
