WILLIS SECURITY

HELPING ORGANIZATIONS NAVIGATE CYBER RISK & REGULATORY REQUIREMENTS

Why Cybersecurity Compliance Matters:

Compliance is more than just a suggestion. Regulatory Requirements from Privacy Laws to Cybersecurity Frameworks, now drive Board-Level Decisions, Customer Trust and Business Continuity. Non-Compliance can result in Penalties, Breaches and Lost Revenue.

Common Compliance Drivers Across All Sectors:

- Data Privacy Laws (e.g., GDPR, CCPA, HIPAA, GLBA)
- Security Frameworks (e.g., CIS Controls, NIST, ISO 27001)
- Third-Party Audits and Vendor Risk Management
- Regulatory Inquiries from Clients, Investors or Government Agencies
- Cyber Insurance Policy Validation

How Willis Security Supports Your Compliance Journey:

- Risk-Based Cyber Assessments tailored to your Business Size and Sector
- Written Policies & Plans including Incident Response, Access Control and Vendor Risk
- Security Hardening across Email, Cloud, Endpoint and Remote Environments
- Ongoing Monitoring & Reporting for Internal Use or External Audits
- Employee Security Awareness Training and Phishing Simulations
- Audit Readiness & Response Support for Clients, Partners and Regulators

What Sets Us Apart:

- Tool-Agnostic Approach – We design around your environment, not just one product
- End-to-End Delivery – We assess, build, configure, and help you maintain controls
- Scalable Solutions – From startups to enterprises, we match your pace and budget
- Proven Experts – Credentialed analysts and engineers with real-world delivery experience
- Simple, Actionable Reporting – Compliance without complexity

Take the Guesswork Out of Cybersecurity Compliance:

Whether you are preparing for an audit or building a security program from scratch, Willis Security can help you get it right the first time!
