CERTIFICATIONS & QUALITY ASSURANCE

OUR BOTTLING FACILITY

Our bottling facility is located in Alberta, Canada. The plant produces product for retail and commercial applications.

There is a high-speed automated production line where the products are bottled, labeled, packaged, coded and then prepared for both local, and international shipping.

KOSHER CERTIFIED WATER

With the growing demand to offer Kosher status, our product has successfully been designated Kosher (COR255924). The advantage is that a segment of your consumers, with specialized dietary concerns – requiring Kosher food/beverage products, would otherwise be overlooked. They have now completed the on-site facility inspection and are proud to announce that the process has been approved. For more information: www.cor.ca

LABORATORY TESTING FACTS

Independent laboratory tests show that after 90 days, dissolved oxygen levels were at 24.6 mg/L. Standard water is around 7.5 mg/L. Water is critical to cell function, energy levels, detoxification and many other positive benefits to the body. The water has a fresher taste and has higher levels of oxygen. If the water contains chlorine and other chemicals, it has less ability to carry toxins out of the body. If we drink water that contains trace synthetic chemicals, our kidneys and liver have to work harder to remove the chemicals.

SQF Certified - Food Safety Program

The Safe Quality Food (SQF) Program is a rigorous and credible food safety and quality program that is recognized by retailers, brand owners, and food service providers world-wide. Recognized by the [Global Food Safety Initiative](#) (GFSI), the SQF family of food safety and quality codes are designed to meet industry, customer, and regulatory requirements for all sectors of the food supply chain – from the farm all the way to the retail stores. For more information: www.sqfi.com

CANADIAN BOTTLED WATER ASSOCIATION

Our bottling facility is now officially a new candidate bottler member of the Canadian Bottled Water Association. The CBWA was founded in 1992 to represent the Canadian bottled water industry and to ensure a high standard of quality for bottled water. Members must adhere to the CBWA's stringent Bottled Water Model Code, Bottled Water Food Safety Practices, CPO Program and Audit requirements, as a condition of membership. For more information: www.cbwa.ca

BPA FREE

Did you know Quantum Water bottles are 100% BPA free? Our bottles use #1 plastic (rPET) which means absolutely no BPA. We remain committed to delivering high quality - great tasting water, which is without compromise and without fail: 100% impurity free. We value customer inquiries on our products and encourage any questions that may remain on this topic or which pertain to our quality assurance program.
