

PLASMA SKIN TIGHTENING

WHAT IS PLASMA?

Plasma Fibroblast is an innovative development in aesthetic treatments using the fourth state of matter - Plasma. The Plaxpot device contains a small metal probe, that when exposed to atmospheric gas (nitrogen) produces a tiny plasma flash between the tip & skin, leaving a tiny superficial thermal trauma. This causes the skin in its vicinity to tighten & lift - giving results noticeable after just one treatment. As new collagen & elastin is produced, over the next 90 days, the tightening effect will continue to progress.

A \$59 30min consultation is necessary prior to your treatment, allowing us to discover your skin goals & create your treatment plan. **Please note the consultation price is redeemable against treatment booked on the day.**

For full information please ask or scan the QR code.

Pricing may vary, a consultation is required for exact cost.

VENUS TRIBELLA™

The Venus Versa Tribella treatment is an advanced, non-surgical solution for skin resurfacing, discoloration & laxity that works to improve the overall texture, tone & tightness of the skin. It combines Nano-Fractional Radio Frequency (RF) technology, Intense Pulsed Light & Diamond Polar technology (multi-polar RF & Pulsed Electro Magnetic Fields) to deliver total skin rejuvenation minimizing pigmentation, mild acne scarring & improving sun damage, fine lines, & wrinkles. Mild downtime will be experienced for 7-10 days. 3 treatments recommended 4 weeks apart.
