What is Cost Segregation?

Cost Segregation is an application by which commercial property owners accelerate depreciation and reduce the amount of taxes owed. This savings generates substantial cash flow that owners often use to reinvest in business, purchase more property, apply to their principal payment or spend on themselves.

How Does Cost Segregation Work?

Cost Segregation Services, Inc. (CSSI) an experienced and qualified company, performs an engineering-based cost segregation study on your property. The study accelerates the depreciation of your building/renovation components into shorter depreciation categories such as 5-, 7-, 15-year rather than the conventional 27.5- and 39.5 -year schedules. Five- and 7-year items might include decorative building elements, specialty electrical for dedicated computer equipment and medical equipment, and carpet, tile, etc. Fifteen-year items might include site utilities, landscaping, and paving. This engineering-based cost segregation study results in a much higher depreciation expense and significantly reduced taxable income for the property owner. Best of all, tax code ruling states cost segregation can be applied to categories of buildings purchased or built since 1986, including renovations. There is no need to amend your tax returns.
