Our S.T.E.P. compatible concrete septic/pump tanks are designed with two compartments separated by a baffle and 4" ells for efficient wastewater management. Each tank features an inlet opening and includes one septic tee for easy installation. With two top openings with 24" PRTA so these tanks are ready to easily accept risers pipes. Built to last, our tanks deliver reliability and ease of use for residential and commercial projects. For more details, give us a call.
