creativity with science*

About Us

Aroma Affair International established in year 2001 is a New Delhi-based company specializing in fragrances, flavors, essential oils, natural extracts, and aroma chemicals. The company serves a diverse range of industries, including personal care, home care, mouth fresheners, incense, burning fragrances, and space fragrances.

Operating as a manufacturer, distributor, and exporter, Aroma Affair International offers an extensive

portfolio of premium-quality fragrance and flavor solutions tailored to various market needs. The company is also an authorized distributor of **International Flavors & Fragrances (IFF)** in India, highlighting its association with one of the world's leading fragrance and flavor companies. Through its commitment to quality, innovation, and customer satisfaction, Aroma Affair International has established itself as a trusted partner in the fragrance and flavor industry.

Research & Development

Manufacturing Excellence & Quality Assurance: Aroma Affair International is equipped with a state-of-the-art infrastructure that enables the standardization and quality control of all raw materials, including aroma chemicals, essential oils, natural extracts, and other fragrance ingredients. This ensures the development of world-class products with consistent quality, purity, and performance. Supported by a team of highly qualified and experienced professionals from the aroma and fragrance industry, the company follows scientific processes and stringent quality standards to deliver superior products at competitive prices. All operations are conducted in accordance with the guidelines and standards established by the International Fragrance Association (IFRA), ensuring product safety and regulatory compliance.

Quality Control & Technical Capabilities :

- In-house GC-MS (Gas Chromatography–Mass Spectrometry) facility for advanced analysis and quality verification.
- Comprehensive testing facilities for raw materials, intermediates, and finished products.
- Rigorous quality assurance protocols to maintain consistency and purity across all product categories.
- Continuous monitoring and evaluation to meet international quality standards.
- Capability to create tailor-made solutions according to specific customer requirements.
- Efficient production processes designed to ensure consistency, scalability, and timely delivery.
