

FOR LEARNERS WHO LEAD

AMPLEX

2026

COURSE BROCHURE

Why Amplex?

Amplex connects you with real professionals, future-focused skills, and opportunities that prepare you to lead, create, and impact the world.

1%

The 1%

Only 1% are willing to go beyond comfort — to think deeper, learn harder, and lead sooner.

Amplex exists for those who choose to become that 1%.

Vision

To become a national leader in relevant, practical exposure for future focused students in every major city of South Africa.

WHAT RESEARCH SHOWS

The Amplex programme is supported by a strong research foundation.

A research-based programme is essential because it is built on evidence rather than assumptions, ensuring that every activity, method, and outcome is grounded in proven effectiveness. This approach increases accountability, consistency, and impact—students are not simply exposed to experiences, but to interventions known to foster measurable growth in skills, understanding, and behaviour.

FUTURE FOCUSED SKILLS

1

With the explosion of “startup” culture, and the corresponding disruption to traditional workforce models and professional pathways, there are growing calls for students to develop their entrepreneurial skills. (OECD future of education and skills 2030)

EXPOSURE TO EXPERTS AND VARIOUS FIELDS

2

Work based learning Improved 1) Employability 2) Faster school-to-work transitions 3) Personal development 4) Better human and social capital 5) Higher productivity. (European Centre for the Development of Vocational Training)

FINANCIAL LITERACY

3

Financial literacy programmes are crucial in enhancing financial knowledge and behaviour among children and adolescents. Effective strategies include experiential learning, integration of real-life financial scenarios, and parental involvement. Challenges exist, such as adapting to rapid technological changes and addressing diverse learning needs. (Front. Educ., 24 October 2024)

PROCESSING INFORMATION

4

MISINFORMATION AND DISINFORMATION: Advancements in technology are accelerating the spread of false information, fostering civil unrest and threatening the free flow of information. The consequences could include heightened societal divisions and restrictions on communication. (World Economic Forum, 2025)

WORK BASED LEARNING

The purpose of WBL is to build student awareness of potential careers, facilitate student exploration of career opportunities, and begin student preparation for careers. These awareness, exploration, and preparation activities help students make informed decisions about high school course and programme enrollment and about postsecondary education and training. Exposure to careers through an individual WBL activity can be beneficial, but students attain best results when WBL activities are structured and sequenced over several years.

ABOUT US

A development and exposure programme designed for high school students

Amplex is a transformative educational platform designed to bridge the gap between classroom learning and real-world understanding.

Derived from the Latin roots Amplo (“We Develop”) and Ex (“We Provide Exposure”), Amplex embodies our dual purpose — to develop potential and expose learners to the opportunities and challenges that define life beyond school.

Our 9-month programme equips high school students with the tools, insight, and confidence to thrive in a rapidly changing world.

Through a carefully structured curriculum that combines financial literacy, digitalisation, artificial intelligence, and critical thinking, learners gain both practical competence and intellectual maturity.

What sets Amplex apart is our hands-on learning experience. Each session is enriched by guest speakers — professionals who bring their real-world expertise into the classroom. Students don’t just learn about the world — they engage with it, preparing themselves to lead, create, and contribute meaningfully in whatever path they pursue.

PARENT FEEDBACK

“

Dear Amplex Team,
Through Amplex it has been an incredible year of growth for Lourens. Over the past year, we have seen him develop both in his interests and in the way he approaches thinking. Each Thursday evening, after his sessions with Amplex, he was excited to share everything he had learned and experienced.

I wholeheartedly recommend this program to any teenager. The handpicked experts in each area helped Lourens gain a deep understanding of the topics covered. Where his interest was strongest, he was able to make new connections and build a valuable network for his future.

Thank you for this incredible journey and for all the hard work you've put into making it such a success. It has truly made a positive difference in Lourens's life.

”

STUDENT FEEDBACK

“

It is a wonderful program with a lot to offer this Generation, I would love to see it grow beyond Pretoria.

”

“

The programme is amazing, has taught me alot of new things to consider and different perspectives.
