

## **Concrete Pump Operator**

Custom Concrete Pumping is a concrete pumping company located in central PA. We provide concrete pumping services for commercial, agricultural, and residential jobs. Founded in 2007, we are continuing to EXPAND and GROW in central Pennsylvania, with the addition of 2 new pump trucks and 3 Telebelt conveyors to our Belleville and Harrisburg locations.

We are looking for CONCRETE PUMP OPERATORS in the Belleville, State College, Huntingdon, or Harrisburg areas.

A CONCRETE PUMP OPERATOR is a skilled machine operator typically working on construction job sites. As opposed to a crane operator, who may go to one job site for six months or a year, a pump operator typically goes to one or even two different job sites per day. Duties include controlling the operation of the pump and the output of concrete by directing the boom. The CONCRETE PUMP OPERATOR will also drive the machine to and from the job site and make sure the pump is ready for the next job.

### **Essential Duties and Responsibilities:**

- Perform pre-trip and post-trip inspections to ensure concrete pumps are maintained according to DOR regulations (brakes, fluid levels, etc.).
- Fill water tanks before each project and ensure all valves are properly secured and shut.
- Drive the pump in a safe and conscientious manner to the job site and back to the yard.
- Evaluate site conditions and work with contractors or supervisors to park/set up the truck.
- Operate boom and concrete pump to place concrete in desired locations, placing special focus on provided instructions.
- Load and unload concrete pump attachments and ensure that all associated tools are used in a safe manner.
- Clean concrete pumps at the end of the day to ensure they remain in good working condition, minimizing breakdowns and downtimes.
- Follow all safety measures before, during, and after each project.
- Know the pump well enough to recognize problems and perform light maintenance.
- Represent the Company through efficient work and courteous service.

### **Physical Demands:**

- Must be able to meet DOT requirements for hearing and seeing.
- Must be able to verbally communicate with others.
- Good manual dexterity to climb on and around the pump in all weather conditions.
- Must be able to lift up to 75 pounds to an overhead position.
- Must be able to push and pull up to 50 pounds.
- Must have the balance and dexterity to maneuver around a construction site and must enjoy working outdoors in all weather conditions.
- Must be drug and alcohol-free.

A Class B CDL is required for CONCRETE PUMP OPERATORS.

Pay is DOE and higher than industry wages. Many of our projects pay prevailing wages.

We offer paid vacation, paid holidays, retirement and health, dental and vision insurance.
