Treatment Authorization

Chiropractic healthcare is primarily concerned with the relationship between structure (primarily the spine) and function (primarily of the nervous system). Dr. Neff evaluates the patient using standard examination and testing procedures (orthopedic and neurologic evaluation, labs, x-rays) along with specialized chiropractic evaluation. The chiropractic evaluation focuses on structural and/or functional abnormalities which damage or irritate nearby nerves, joints and/or tissues. The primary goal of chiropractic treatment is to restore normal joint motion, decreasing the body's inflammatory response, resulting in improved function and/or decreased symptomology. This is accomplished by performing a procedure unique to the chiropractic profession called an "adjustment". A chiropractic adjustment involves the application of a quick, precise force, by hand, directed over a very short distance to a specific vertebra or bone. In addition to adjustments, other treatments used by Dr. Neff include physiotherapy modalities (e.g. ultrasound, ice, electric stimulation, soft-tissue manipulation), nutritional and supplemental recommendations and rehabilitative procedures.

Chiropractic treatments are one of the safest interventions available to the public as evidenced by malpractice statistics. While there are risks involved with treatment, these are seldom great enough to contraindicate care. Nonetheless, they must be considered when making the decision about whether or not to receive care. Local discomfort, headache, tiredness and radiating discomfort are all possible side effects of an adjustment, but most resolve in 24 to 48 hours. Rare complications include rib fracture, burns (with certain physiotherapies), disc herniation, Cauda Equina Syndrome (1 case per 100 million adjustments) and compromise of the vertebrobasilar artery (i.e. stroke) (1 case per 1-5 million adjustments).

I understand that x-rays should NOT be taken on pregnant women. I have advised Dr. Neff if I am pregnant or if I may be pregnant.

I am informed and understand that there are some very slight risks with chiropractic adjustments, including, but not limited to, muscle sprain, ligament strain, disc injury and stroke. I expect Dr. Neff to exercise judgment, based upon the known facts, and act in my best interest.

I have discussed with Dr. Neff the nature and purpose of chiropractic adjustments including any questions that I have.

I have been informed that it is not uncommon for patients to become tired or to be sore after an adjustment. I am aware that I should apply ice to the area and rest if I do experience discomfort. If I am concerned about any symptom, I understand that I may call Dr. Neff. If I am unable to contact Dr. Neff, I am aware that I can go to the emergency room.

I hereby request and consent to the performance of chiropractic adjustments and other chiropractic procedures, including physical therapy and x-rays, by Dr. Neff or his authorized personnel.
