Creating Secure Places: Not Everyone Gets it Right

TEN CORE PRINCIPLES OF CORPORATE CULTURE

- Principle 1** Every organisation has a culture
- Principle 2** Culture impacts performance
- Principle 3** Culture can be a significant business risk
- Principle 4** Culture works on human logic, not business logic
- Principle 5** Organisations are shadows of their leaders
- Principle 6** Culture can and will drift (evolve)
- Principle 7** Policies drive culture (more than is realised)
- Principle 8** You get the culture (behaviours) you ignore
- Principle 9** There is no 'perfect' corporate culture
- Principle 10** Leaders and workers change culture; not consultants

Continually review your protective measures
