## Whiskey River Siberians

### 1. Breeding Practices and Parentage

The Breeder affirms that responsible and ethical breeding practices have been followed. Both the sire and dam are AKC-registered Siberian Huskies and meet AKC National Breed Club guidelines and health standards. The Breeder certifies that both parents are sound breeding stock and have completed all standard breed-appropriate health testing. Official results are available through the Orthopedic Foundation for Animals (OFA) at [www.ofa.org](http://www.ofa.org).

---

### 2. Puppy Rearing and Early Care

The Puppy has been raised in a home environment with appropriate early socialization. Each Puppy is dewormed at **2, 4, 6, and 8 weeks** of age. No Puppy will leave the Breeder's care before reaching **eight (8) weeks of age**, being fully weaned, and receiving its first vaccination, Litter Certificate, assigned AKC number, and AKC-registered microchip.

---

### 3. Veterinary Examination and Health Guarantee

The Puppy will be examined by a licensed veterinarian before release and will be accompanied by a certification stating that the Puppy was believed to be healthy at the time of examination. The Purchaser is strongly encouraged to have the Puppy examined by their own veterinarian within seventy-two (72) hours of taking possession.

If the Purchaser's veterinarian determines in writing that the Puppy is unfit for sale due to a condition present at the time of purchase, and the Puppy is returned in the same condition within the 72-hour period, the Breeder will accept the return and refund the full purchase price.

The Breeder will not reimburse transportation or return expenses, nor accept liability for emotional distress associated with the return. The Breeder cannot guarantee against future conditions—genetic, developmental, or otherwise—that may arise during the dog's lifetime.

---

## Whiskey River Siberians

### 4. Purchaser Suitability

The Breeder has reviewed the Purchaser's experience with dogs, including any prior experience with Siberian Huskies, and deems the Purchaser knowledgeable based upon the information provided. Purchaser represents that they can provide a safe, loving home for the lifetime of the Puppy and agrees to maintain regular veterinary care, including annual vaccinations, and to license the dog according to local laws. The Purchaser further agrees to treat the dog with kindness, respect, and proper care.

---

### 5. Spay/Neuter Requirement

All Puppies are sold under **Limited AKC Registration**, which prohibits breeding. The Purchaser agrees to have the Puppy spayed or neutered before reaching **two (2) years of age**. The Breeder will remain listed as a co-owner on the AKC registration until proof of spay/neuter is received. Upon receipt of veterinary documentation, the Breeder will release co-ownership and transfer full ownership to the Purchaser.

The Breeder will assume all costs of AKC registration and ownership transfer.

---

### 6. Return-to-Breeder Clause

The Puppy will always be considered part of the Breeder's kennel program. If the Purchaser or any household member is unable to care for the dog at any time, the Breeder must be contacted immediately. The Breeder agrees to accept the dog back—temporarily or permanently and for any reason.

The dog must be returned with the AKC registration certificate. If the dog remains in the Breeder's possession for more than **thirty (30) days**, ownership automatically reverts to the Breeder.

There will be **no monetary compensation** to the Purchaser for returning the dog after the initial 72-hour health-guarantee window.

---

## Whiskey River Siberians

### 7. Microchip Registration

The Puppy will leave the Breeder with an **AKC Reunite microchip**. The Breeder has prepaid for lifetime registration and will enroll the Puppy with the Purchaser's contact information upon transfer. The Purchaser agrees to keep current phone and address information on file with both the microchip registry and the Breeder.

The Breeder will remain listed as a **secondary contact for the lifetime of the dog** to help ensure recovery if the dog is lost, abandoned, or surrendered.

---

### 8. Naming and AKC Registration

The Purchaser may choose the Puppy's call name. For AKC registration, the Purchaser must select a unique registered name not already in use by another AKC-registered Siberian Husky. The registered name may include the Breeder's kennel name, Whiskey River Siberians, or the Purchaser may select an entirely unique registration name.

The Breeder will complete the AKC registration when the puppy is received by the Purchaser. AKC will e-mail the registration to the Purchaser, who will then be able to choose the puppy's official name.

---

### 9. Communication and Community

The Breeder maintains a private Facebook group for all Whiskey River Siberians puppy owners, intended for communication, updates, questions, and community support. The Breeder may also offer puppy meetups, litter playdates, or kennel gatherings when feasible.

The Breeder welcomes all updates and photos the Purchaser wishes to share and enjoys staying involved in the Puppy's milestones. Any photos submitted may be used on the Breeder's website or Facebook page, unless the Purchaser requests otherwise.

---

## Whiskey River Siberians

### 10. Lifetime Support

The Breeder provides lifetime support to help ensure the dog's wellbeing. Support includes assistance with questions, concerns, and training guidance. The Breeder will also provide **complimentary vacation-care service**, subject to advance notice and availability.

### 11. Husky Breed Characteristics and Owner Expectations

Siberian Huskies are a high-energy working breed known for intelligence, independence, and a strong desire to run. By signing this Agreement, the Purchaser acknowledges the following breed-specific characteristics:

- 1. Exercise and Mental Stimulation:** Huskies require daily physical exercise and mental engagement, including running, long walks, hiking, and structured enrichment.
- 2. Containment and Escape Behavior:** Huskies may dig, climb, or slip through openings. The Purchaser agrees to maintain secure containment such as 5–6 ft fencing, proper gate latching, and supervised outdoor time.
- 3. Shedding and Grooming:** Huskies will blow their coats seasonally and require regular grooming. Their coats should **NEVER** be shaved.
- 4. Prey Drive:** Huskies may exhibit a strong prey drive. Caution is advised with small pets, wildlife, and off-leash environments.
- 5. Training and Social Development:** The Purchaser commits to continued training, socialization, and positive reinforcement to prevent unwanted behaviors.
- 6. Climate Considerations:** Due to their double coat, Huskies require protection from heat, shade in warm months, and should not be exposed to unsafe temperatures.
- 7. Working-Breed Instincts:** Owners are encouraged to engage the dog in appropriate activities such as sledding, bikejoring, skijoring, or canicross once physically mature (2 years). The breeder is happy to mentor with these activities if possible.

## Whiskey River Siberians

8. **Separation Anxiety:** Siberian Huskies are pack-oriented animals and thrive on companionship. They are accustomed to having people or other dogs around, and extended periods of isolation can lead to stress, anxiety, destructive behavior, and other unwanted habits. The Purchaser acknowledges that this breed requires consistent social interaction and agrees to provide appropriate companionship to support the Puppy's emotional and behavioral wellbeing.

9. **Personalities:** Siberian Huskies are highly intelligent, expressive, and vocal animals. They enjoy mental stimulation and challenges, and their natural independence can sometimes present as willfulness or boundary-testing behavior. Despite their spirited personalities, Huskies are also affectionate, gentle, and delightfully goofy companions. Their sweet nature and playful temperament often form deep, lasting bonds with their families.
