## CORE COMPETENCIES

**GERM PATROL Disinfectant Spray** has not 1 but 6 Germ Killing Ingredients. No other leading disinfectant has 6 germ killing ingredients built into its formula. Germ Patrol is designed to kill “Super Bugs” like Covid and future variants including Disease X. Its patented formulation is proven to kill microbes for a clinically established 28 days. If the leading brands worked there would have never been a pandemic

**GERM PATROL®** is the only product on the market to have been independently tested by 17 hospitals and demonstrated an average of a 70% reduction in nosocomial infection.

**GERM PATROL** is on the N-list and is one of only 6 disinfectants proven effective against Covid-19 and future variants. Germ Patrol has been incorporated into paints, plastics and fabric. Recently passed the Boeing test for use on all aircraft.

## DIFFERENTIATORS

- Germ Patrol has **6 GERM KILLING INGREDIENTS**
- Hospital tested for 28-day longevity.
- Kills 99.9% of all Bacteria and virus including C-difficile
- 13 Cans of Leading Disinfectant = 1 bottles of Germ Patrol
- Designed to kill the new “SUPER BUG” Disease X
- Manufacturing Capacity 1 Million Bottles per Month
- Best Product for foot odor and fungus
- Available on GSA Advantage

## PAST PERFORMANCE

### GERM PATROL #1 SANITIZER IN JAPAN

Germ Patrol was the bestselling new sanitizer in Japan with a record \$40 million Dollars in sales its first year. The product sold under the names “Mold Cut” and “NoviGuard.” GP licensed a Japanese company and shipped product in 55-gallon drums to Japan for bottling.

### DICK’S SPORTING GOODS

Mummy sleeping bag was a big seller in the camping department. Customer sent Germ Patrol Anti-microbial additive to China where GP was added to the finishing bath during production. Product was mold and mildew resistant and germ free.

### JAY FRANCO & SONS

Manufactures and private labels for retail customers in the bed and bath categories. These customers include Walmart, Target, and Disney just to name a few. Germ Patrol provided its anti-microbial solution in 55-gallon drums where it was shipped to China to be impregnated into many different products.

### ROME HOSPITAL

Germ Pro in combination with the hospital’s ongoing infection prevention strategies reduced healthcare associated infections (HAIs) by 27.6%. Methicillin-resistant Staphylococcus aureus (MRSA) declined by 44.9% and Clostridium difficile (C. difficile) by 37.8%, Grace noted. The CDC’s hand hygiene guidelines require caregivers to wash their hands or use alcohol-based sanitizers before and after touching any patient. Hospitals also use effective disinfectants to kill germs on surfaces. These products kill germs at the time of use, but do not have any persistent killing power between cleanings.” Hospital Manager Grace said. “The beauty of the Germ Pro products is they keep working between cleanings so it’s less likely for germs to multiply and spread.”

### NOVARTIS ANIMAL DIVISION TESTED GP

Novartis Pharmaceuticals tested Germ Patrol in the dirtiest places on earth a pig pen and a chicken coop. The Novartis scientist who tested Germ Patrol said the product was “amazing”. It took the dirtiest place on earth and made it “clean enough to do surgery on the floor.”
