

COMPANY PROFILE

Engineering Excellence • Process Safety • Digital
Innovation • Artificial Intelligence

IAtech365 is a French engineering and technology company specializing in Process Safety, Technical Safety, Risk Management, Digital Transformation, Artificial Intelligence, Digital Twins, and Professional Training. Headquartered in Paris, IAtech365 supports industrial operators, EPC contractors, engineering companies, and regulatory stakeholders in delivering safer, smarter, and more sustainable projects.

By combining engineering expertise with innovative digital solutions, IAtech365 helps organizations improve operational performance, manage risk, strengthen workforce competence, and accelerate their digital transformation journey.

About IAtech365

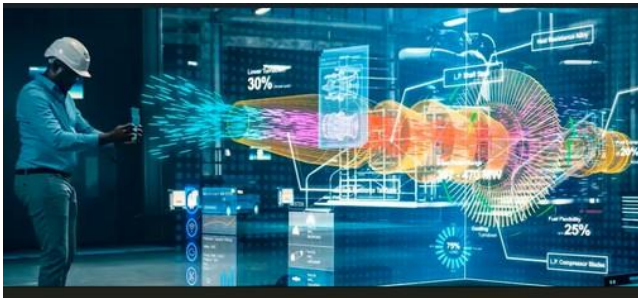

IAtech365 provides consulting, engineering, training, and digital solutions to industries where safety, reliability, and operational excellence are critical.

We serve clients in:

- Oil & Gas
- LNG & Gas Processing
- Petrochemical & Refining
- Chemical Industries
- Power Generation
- Hydrogen Projects
- Biogas Installations
- Battery Energy Storage Systems (BESS)
- Renewable Energy
- Marine & Offshore Facilities
- Industrial Manufacturing
- Infrastructure Projects

Our Core Services

Process Safety & Risk Management

Our specialists assist clients throughout the entire project lifecycle with :

- HAZID
- HAZOP
- SIL Assessment
- LOPA
- BowTie Analysis
- Quantitative Risk Assessment (QRA)
- Fire & Explosion Risk Assessment (FERA)
- Consequence Modelling
- ALARP Demonstration
- Process Safety Management (PSM)
- Safety Cases
- Safety Critical Elements (SCE)
- Performance Standards Development

Digital Engineering & AI Solutions

IAtech365 leverages advanced digital technologies to improve decision-making and operational excellence:

- Digital Twins
- Artificial Intelligence Applications
- Knowledge Management Systems
- Engineering Collaboration Platforms
- Predictive Risk Analysis
- Digital Competency Management
- Intelligent Learning Systems
- AI-Powered Technical Coaching

EPC365 Digital Platform

IAtech365 develops and supports EPC365, an integrated digital platform designed for project and safety management.

EPC365 enables:

- Process Safety Management
- Risk Management
- HSE Management
- Integrity Management
- Safety Critical Element Management
- Competency Monitoring
- Action Tracking
- Interface Management
- Project Collaboration
- Technical Documentation Management

Digital Learning & Professional Development

Through ADEPP Digital & Training and EPC365 Workspace, IAtech365 delivers:

- E-Learning Courses
- Instructor-Led Training
- Technical Coaching
- Competency Assessment
- Customized Training Programs
- Process Safety Certification Pathways
- VR/AR Immersive Learning Solutions
- AI-Assisted Learning Platforms

Engineering & Technical Studies

IAtech365 provides multidisciplinary engineering and technical assistance services including :

- Safety Engineering
- Process Engineering
- Fire Protection Engineering
- Risk-Based Engineering
- Technical Audits & Independent Reviews
- Engineering Verification
- Project Monitoring
- Regulatory Compliance Support
- Environmental Studies
- Emergency & Crisis Management Planning

Areas of Expertise

Process Safety

- HAZOP
- SIL
- LOPA
- BowTie
- QRA
- PSM

Fire & Explosion Protection

- Fire Water Systems
- Foam Systems
- Fire & Gas Detection
- Fireproofing Design
- Hazardous Area Classification
- Emergency Response Planning

Energy Transition

- Hydrogen Safety
- Biogas Safety
- Renewable Energy Projects
- BESS Risk Management

Digital Transformation

- AI Solutions
- Digital Twins
- Smart Learning Systems
- Cloud Collaboration Platforms

Leadership

FRÉDÉRIC SALIMI

Founder & President

Frédéric Salimi is a Process Safety and Technical Safety Specialist with more than 35 years of international experience in Oil & Gas, LNG, Petrochemical, Offshore, Pipeline, Power, and Renewable Energy projects. His expertise includes :

- Process Safety Management
- Technical Safety Engineering
- HAZOP & SIL Facilitation
- Fire Protection Engineering
- Quantitative Risk Assessment
- Functional Safety
- Safety Critical Elements
- Digital Transformation & AI Applications

Why IAtech365?

- ✓ More than 30 years of international engineering experience
- ✓ Strong expertise in Process Safety and Technical Safety
- ✓ AI-powered digital solutions
- ✓ EPC365 integrated digital platform
- ✓ Customized engineering and training services
- ✓ Support for energy transition projects
- ✓ International project and regulatory experience
- ✓ Commitment to safety, innovation, and excellence
