

5 Firefighters Hose Coupling and Shoot

Team to consist of 5 members.

Equipment to be supplied: 1 – 2 ½” Nozzle with shut off, 2 – 50’ sections of 2 ½” Hose rolled.

Equipment to bring: Full Structural Turnout Gear with all appropriate liners. (Minus Hood).

Event: At the starting signal the contestants will run 50’ to the equipment, connect the two sections of hose together, connect the nozzle, connect to the truck, and direct a stream of water through the nozzle to hit a target without crossing the 80’ mark. Time stops when the target falls. Pressure will be maintained at 90 PSI. **(Discharge of Truck Will Be Capped)**

Rules: All connections must be hand tight.
This is a timed event.

Penalties: **Helmet falls off (5 seconds per infraction)**

Connection must be hand tight **1/2 second penalty per connection for every half turn** on each coupling and nozzle. Only the nozzle man can be touching nozzle or hose when water is discharged.

Apparatus operator may touch the truck but may not touch the discharge hose or coupling.
Anyone else touching the hose or couplings will result in a team disqualification.

Crossing the 80’ Stop Line (5 seconds)
