

# Southside Virginia Volunteer Firefighters Association

## One firefighter hose Coupling Contest

**There will be 2 (two) fifty foot sections of standard 2-1/2" fire hose coupled and laid in a strait line.**

Runner to stand fifty feet from center line on a line parallel with hose line and with regulation shut-off nozzle in hand.

When signal is given, firefighter will run fifty feet, lay down nozzle, break coupling and attach nozzle. Time will be taken when nozzle hits ground. **Judge to check for tightness and one-half second penalty will be added to running time for each one-half turn of nozzle needed to make tight.**
