Start enjoying the great outdoors more!

"After adding the ShadePorch to our lake home, we can say more than ever, life is better at the lake!"

"We waited years for an outdoor porch and can't believe how the ShadePorch has changed our lives!"

We completed our "family" ShadePorch project last year at our lake home in Wisconsin. It has totally transformed the use of our lake home. Before, the hot sun in the afternoon made it impossible to sit out on our patio. The mosquitoes moved in at dusk and drove us inside. Now we live out there all day and into late evening in perfect comfort, rain or shine. We even use our place in the winter for skating, skiing and other activities. The porch is a great place to store skis, boots, etc.

The size (12' x 42') was one of the biggest you have ever made. I have only highest praise for both your sales and manufacturing people. We were on the phone frequently with them and they were always helpful and very professional. The end product was outstanding, even when constructed by a group of amateur builders.

"Life is better at the lake!"

— The McLellan Family, Illinois

ShadePorch®
Sunroom Screenroom
(Shaded insulated roof)

We installed the ShadePorch and were very impressed with the quality of the product and the instruction manual. The Zebra Blinds create a cozy room in winter and keep the sun out in the summer. We use our ShadePorch everyday! Now we can't imagine life without it! It's Perfect!

— Diane and James B., Massachusetts

(Shaded insulated roof)

Beat the bugs and the weather forever!

"The sliding windows and sliding screens give an open feeling that is simply amazing!"

"We loved being able to leave our patio furniture inside our porch all year round!"

We have been enjoying our SunPorch every summer. Most of our evening meals are spent there as we are no longer bothered by the mosquitoes. Watching the birds six feet away in our cherry tree has been just delightful. We love being in there during the Wisconsin Fall and being able to leave the patio furniture inside our porch all year round. Your sales and service staff have been a pleasure to work with. Thank you very much for making such a great product!

— Susan & Mike F., Wisconsin

SuperPorch® has the sliding screen and sliding window panel configuration for your choice of weather protection!

Easy to handle screen and vinyl glazed window panels weigh just 6 lbs each and are simple to insert and remove.

EasySlide 4 Track System allows for quick sliding, insertion, and removal of all screen and window panels.

Heavy gauge vinyl window glazing is totally optically clear. Looks like glass at a fraction of the weight or cost. Simply wipes clean with a damp microfiber cloth.

Screen and window panels are thick framed rigid aluminum for added strength. They are surrounded by dense double pile seals for a rattle-free, weather-tight fit.

Strong and durable, even when stretched, the flexible vinyl window glazing quickly returns to its original shape. If needed, the vinyl can be easily replaced in just a few minutes.
